

## Invitation for Participation

### Crypto-Currencies in a Digital Economy

### 3<sup>rd</sup> Berlin Conference (CCConf 2021, CCC3)

16. - 17. June, 2021

#### Einstein Center Digital Future, TU Berlin

Wilhelmstraße 67, 10117 Berlin Germany

**(Format will be decided on April 30<sup>th</sup>)**

Since its introduction in 2008, distributed ledger technology emerged from its use in crypto-currencies and continues to disrupt numerous of technological and economic applications. Despite its potential as a trust-free, cost-efficient, and automated system, DLT is still an emergent technology and, therefore, faces a number of challenges.

The Berlin Crypto-Currencies Conference 3 (CCC3) provides a platform for interdisciplinary discussion of these challenges, as well as the technological and economic potential of blockchain-based systems. We welcome researchers and practitioners working on topics such as:

- macro-economic consequences, decentralized monetary policy, CBDC
- high-frequency exchanges, portfolio optimisation and risk management
- privacy, security, and alternative DLT approaches
- governance by and of blockchain-based systems
- legal aspects

Speakers are invited individually.

If you are interested in giving a talk, please let us know it via [registration](#).

### Programme and Speakers

Keynotes by:

[Prof. Dr. Steven Kou](#)

**Questrom Professor in Management and Professor of Finance, Questrom School of Business, Boston University**

- Ph.D. in Statistics. May 1995, Columbia University.
