A Word from Thepthida Sopraseuth Head of T2M Scientific Committee

Dear participants,

It is my pleasure to welcome you all to the 19th T2M conference. The program reflects the major concerns expressed in the public debate on the effectiveness of monetary and fiscal policies, sovereign risk, labor market issues and inequality in a globalized world. I hope that, in these turbulent times, our work will help shape eagerly-awaited policy guidelines.

I would like to thank **Michael Burda** for hosting the conference at the Humboldt University as well as the Labex Medii and the Deutsche Bundesbank for their financial support. The sponsorship is very much appreciated since registration fees cover only half of each participant's cost.

Julien Albertini (Humboldt) and **Stéphane Moyen** (Deutsche Bundesbank) did not spare their effort to make this conference an exciting event. The organizing team has been very effective in meeting the fundraising target, which is no mean feat. The T2M network cannot survive without the energy and enthusiasm of local organizers. I would like to express my warmest appreciation to this amazing team. I am also grateful to **Klaus Adam** for contributing to the scientific quality of the conference as well as all members of the **T2M Scientific Committee** for their work in selecting the papers. Finally, I extend my thanks to **all participants** for presenting and discussing the papers. We strive for intensive and fruitful interactions between senior and junior researchers. I congratulate all participants for their unfailing good will.

Next year's event will be hosted by the **Banque de France** in **Paris**. We will proudly celebrate the 20th anniversary of the T2M conference in March 24-25th 2016. **Julien Matheron, Jean-Guillaume Sahuc** and **Hervé Le Bihan** kindly accepted to organize the celebration.

After organizing 4 annual conferences in Lyon, Lausanne, Berlin then Paris, my mandate as head of the Scientific Committee of the T2M network will come to an end in 2016. As I step down, I have no doubt that new ideas will emerge to bring T2M to a next level.

Welcome to Berlin and enjoy the conference!
