

## Synopsis of the Modules in the Master's Degree Program in Business Information Technology (M.Sc.)

<b>Mandatory Modules</b>	<b>Study Points</b>	
Einführung in Datenbanksysteme (DBS I)	8-11	Freytag
Methoden und Modelle des Systementwurfs	8-10	Reisig
Business Analytics and Data Science	6	Lessmann

<b>Mandatory Elective Modules in Business Information Technology and Computer Science (fields of specialization)</b>	<b>Study Points</b>	
Implementierung von Datenbanksystemen (DBS II)	10	Freytag
Zuverlässige Systeme	8	Malek
Werkzeuge der empirischen Forschung	8	Kössler
IT Security and Privacy	6	Lessmann
Applied Predictive Analytics	6	Lessmann
Informationsintegration	10	Leser
Data Warehousing and Data Mining	10	Leser
Text Analytics (TAN)	10	Leser
Entrepreneurship – Unternehmensgründung im Informationszeitalter	8	Malek
Lineare Optimierung	8	Popova-Zeugmann
Informationspolitik/-ethik/-recht	10	Seadle
Business Process Management	6	Lessmann
E-Business and Online Marketing	6	Lessmann
Seminar Information Systems	6	Lessmann
Informatik und Informationsgesellschaft I: Digitale Medien	10	Coy
Informatik und Informationsgesellschaft II: Technik, Geschichte, Kontext	10	Coy
Architektur paralleler und verteilter Systeme	8	Reinefeld
Neue Konzepte und Techniken für Datenbanksysteme (NDB)	8	Freytag
Betriebssystem UNIX – Systemadministration und Sicherheit	8	Bell
Bildverarbeitung	8	Meffert
Verteilte Algorithmen	10	Reisig
Grundlagen der Signalverarbeitung	8	Meffert
Signalverarbeitung	10	Meffert
Kommunikationssysteme 1	8	Sommer
Einführung in die Komplexitätstheorie	8	Köbler
Einführung in die Kryptologie	8	Köbler
Software Engineering	8	Bothe
Computergraphik	8	Eisert
Automatisierung industrieller Workflows	8	Fischer
Techniken und Konzepte zum Schutz der Privatsphäre	6	Freytag

<b>Mandatory Elective Modules in Business Administration</b>	<b>Study Points</b>	
General Management	6-27	Adam/Gassen/Klapper/ Lessmann/Maiterth/Müller Schade/Schöttner
Entrepreneurship and Innovation	6-18	Schade
Seminar on Entrepreneurship and Innovation	6	Schade
Finance	6-21	Müller
Management	6-24	Schöttner
Marketing	6-24	Klapper
Accounting Courses	6-24	Gassen/Maiterth
Master Thesis Seminar Accounting	6	Gassen
Master Tax Seminar	6-12	Maiterth
Financial Economics	6-24	Adam/Stomper
Thesis Seminar Corporate Finance	6	Adam
Thesis Seminar Financial Economics	6	Stomper
Strategic Management	6	Hubert
Financial Contracting	6-12	Hubert
Topics in the Theory of Markets and Organizations I/II	9-18	Hubert

Topics in Energy and Network Economics	6-15	Hubert
Real Estate Economics	6	Hubert
Analysis of Competition	6	Hubert

<b>Mandatory Elective Modules in Economics</b>	<b>Study Points</b>	
Information Economics	6	Strausz
Decision-Making under Uncertainty	6	Weizsäcker
Empirical Labor Economics	6	Spitz-Oener
Advanced Monetary Economics	6	Weinke
Advanced International Trade: Theory and Empirics	6	Wolf
Competition Policy	6	Kamecke
Public Economics	6	Engelmann
Advanced Microeconomics	6	Strausz
Theory of Incentives	6	Strausz
Game Theory	6	Strausz
Topics in Microeconomics	6-18	Strausz/Weizsäcker
Advanced Microeconomic Theory I (PhD-level)	6	Weizsäcker
Advanced Microeconomic Theory II (PhD-level)	6	Strausz
Introduction to Advanced Macroeconomic Analysis	6	Burda/Weinke
Labour Markets and Social Policy	6-12	Burda/Spitz-Oener
Advanced Labor Economics	6	Burda
Current Issues in Macroeconomics	6	Burda/Weinke
Topics in Macroeconomics	6	Burda/Weinke
Advanced Macroeconomic Analysis I (PhD-level)	6	Burda/Weinke
Advanced Macroeconomic Analysis II (PhD-level)	6	Burda/Weinke
Current Research in Macroeconomics	6	Burda/Weinke
Economic History	6-18	Wolf
Spatial Economics	6	Wolf
Advanced Topics in Public Economics	6-15	N.N.
Social Preferences	6	Engelmann
Selected Topics in Competition Policy	6	Kamecke
Topics in Industrial Organization	6-12	Kamecke
Datengrundlagen der Wirtschaftspolitik (German)	6	N.N.
Trust and Reputation	6	Weizsäcker
Voting Behavior	6	Engelmann
Emerging Markets	6	Menkhoff
Network based energy systems	6	Hubert
Economic Growth	6	Schwark

<b>Mandatory Elective Modules in Quantitative Methodology</b>	<b>Study Points</b>	
Multivariate Statistical Analysis	6-9	Härdle
Advanced Statistics	6-15	Härdle
Statistics and Finance	6-15	Härdle
Privatissimum Statistics	30	Härdle
Applied Econometrics	6	Droge/Fitzenberger
Econometric Methods	12	Droge/Fitzenberger
Time Series Analysis	6-9	Droge/Fitzenberger
Selected Topics in Econometrics	6	Droge/Fitzenberger
Econometric Projects	6	Droge/Fitzenberger
Analysis of Panel Data	6	Droge/Fitzenberger
Multiple Time Series Analysis	6	Droge/Fitzenberger
Microeconometrics	6	Droge/Fitzenberger
Financial Econometrics	6-9	Droge/Fitzenberger
Advanced Econometrics	6	Droge/Fitzenberger

<b>Elective Modules</b>	<b>Study Points</b>	
Variable Module for completing courses inside the economic department	3-11	Prüfungsausschuss
Elective Module for courses outside of the economic department which students may select on their own initiative	3-11	Prüfungsausschuss

**Master Thesis**

The students are awarded 30 study points for the Master thesis.

**Competency Targets of the Mandatory and of the Mandatory Elective Modules in the Master Degree Program in Business Information Technology**

- Students will acquire specific knowledge in the disciplines of computer science and in economics which they will be able to apply in concrete situations, as well as a broad knowledge of the most recent developments in these economic disciplines.
- Students will be able to synthesize their specialized knowledge from computer science and from economics such that they will be able to apply their methodologies as well as to develop skills to combine and to apply the technologies so that the students can meet both the demands of the academic disciplines (interdisciplinarity) and of industry (which aims to bring together knowledge from the fields of computer science and economics).
- Students will be able to communicate their knowledge of the border region between technology and business; they will learn to structure it, to classify it, to visualize it, as well as to judge this information with a critical eye, to weigh it and to assess it.
- Students will be motivated (encouraged) to make the effort necessary for a successful course of studies, as well as to create the preconditions, through their dedication and commitment, for a productive intellectual climate through all the various phases and stages of their course of study.
- Students will learn to select and apply the appropriate scientific and academic methodologies as well as the specific tools and resources needed to solve a specific problem.
- Students will improve their ability to accept criticism and to engage with this criticism in a fruitful manner. They will also improve their ability to contribute intelligently to discussions and to defend their arguments. Students will also learn to assume various roles, such as participants in discussions, or experts or moderators.
- Students will improve their abilities to work in teams and to sustain their own life-long learning
- At the end of their course of studies, students will be able to work independently and to assume responsibility when they undertake demanding and challenging tasks in business and in public administration.
- Students will acquire the ability to undertake analytical analysis, within the framework of which technical and economic methodologies are used, to analyze complex economic problems in order to describe these problems clearly and lucidly, and in so doing to assist and prepare the management of firms and corporation in regard to important decisions.
- Students will be introduced to the most recent research and will be able and qualified to apply the most recent methodological developments in information technology and economics; indeed, students will have reached a level such that they would be qualified to independent academic work or to do a doctorate in these fields.

### **Kompetenzziele des Pflicht- und Wahlpflichtbereiches im Masterstudiengang Wirtschaftsinformatik**

- Die Studierenden erwerben vertiefendes und anwendungsorientiertes Wissen auf den Fachgebieten der Informatik und der Wirtschaftswissenschaften sowie weiterführendes Wissen über die aktuellsten Entwicklungen in diesen Wissenschaftsdisziplinen.
- Die Studierenden sind befähigt, die Fachkenntnisse aus der Informatik und aus den Wirtschaftswissenschaften sowie die Fähigkeiten zur Anwendung von Methoden und Arbeitstechniken so zu kombinieren, dass sie den Anforderungen der Wissenschaft (Interdisziplinarität) und der Industrie (Kombinationen aus IT- und Wirtschaftskenntnissen) gerecht werden.
- Die Studierenden sind in der Lage, dieses Wissen im Grenzbereich von Technik und Wirtschaft wiederzugeben, zu strukturieren, konstruktiv und kritisch einzuordnen, zu gewichten und darzustellen.
- Die Studierenden sind motiviert, den für einen positiven Studienerfolg notwendigen persönlichen Einsatz zu leisten und schaffen durch ihr Engagement die Voraussetzungen für ein konstruktives Studienklima in den verschiedenen Formen des Studiums.
- Die Studierenden lernen, die für ein erfolgreiches Studium erforderlichen und geeigneten wissenschaftlichen Arbeitsmethoden und Hilfsmittel zu wählen und gezielt zur Lösungsfindung/Problemlösung einzusetzen.
- Die Studierenden können fundierte Kritik akzeptieren und sich damit auseinandersetzen. Gleichzeitig sind sie in der Lage, kritische Argumente in Diskussionen einzubringen und zu verteidigen. Sie lernen dabei verschiedene Rollen als Diskutant/in, Expert/in oder Moderator/in einzunehmen.
- Die Studierenden erwerben die Fähigkeit zu Teamarbeit und lebenslangem Lernen.
- Die Studierenden sind in der Lage, in der freien Wirtschaft und in der Verwaltung anspruchsvolle und verantwortliche Aufgaben selbstständig zu übernehmen.
- Die Studierenden erwerben die Fähigkeit zum Einstieg in analytische Tätigkeiten, im Rahmen derer technische und wirtschaftswissenschaftliche Methoden genutzt werden, um komplexe wirtschaftliche Probleme übersichtlich darzustellen und so wichtige Entscheidungen des Managements von Unternehmen vorzubereiten.
- Die Studierenden werden an den aktuellen Stand der Forschung herangeführt und dabei befähigt, informationstechnische und wirtschaftswissenschaftliche Methoden auf einem Niveau anzuwenden, das sie für eine selbständige akademische Tätigkeit oder eine Promotion in diesen Gebieten qualifiziert.

Mandatory Module: Einführung in Datenbanksysteme (DBS I)		Study Points: 8-11	
<p>Goals: Die Vorlesung gibt einen Überblick über die Konzepte und die Architektur moderner Datenbankmanagementsysteme (DBMSe). Die Vorlesung umfasst u.a. Zugriffstrukturen, Anfragesprachen, Views, Mehrbenutzerkontrolle und Fehlererholung. Das Praktikum dient der Erweiterung und der Vertiefung des Vorlesungsstoffes. Hier liegt ein Schwerpunkt auf dem Umgang mit einem existierenden DBMS. Das optionale Seminar dient der Vertiefung von Datenbankkenntnissen anhand aktueller Forschungsliteratur. Ausgewählte Forschungsartikel sind inhaltlich vom Studenten/Studentin selbständig zu erarbeiten und deren Ergebnisse zu präsentieren.</p> <p>Qualifikationsziele: Grundkenntnisse von Datenbanksystemen, ihrer Funktion und ihrer grundsätzlichen Realisierung. Die Studierenden erlangen die Fähigkeit, Datenbanksysteme zu bewerten und mit existierenden relationalen Datenbanksystemen umgehen zu können, insbesondere Anfragen formulieren zu können.</p>			
Prerequisites to participate in the module: Grundkenntnisse des Compilerbaus, Algorithmen und Datenstrukturen			
Course	Periods/Week	SP; work load	Topics
Lecture DBS I	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Konzepte und Architektur moderner Datenbankmanagementsysteme
Praktikum	2	2; Teilnahme am Praktikum (30h), Vor- und Nachbereitung des Praktikums (30h)	Bewertung von Datenbank-systemen, Umgang mit existierenden relationalen Datenbanksystemen
Seminar DBS (optional)	2	3 ; Teilnahme am Seminar (30 h), Lesen von Artikeln (30 h), Vorbereitung Vortrag (30h)	Seminar Datenbanksysteme
Module examinations		mündliche oder schriftliche Prüfung; benotetes optionales Seminar: Präsentation	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

Mandatory Module: Methoden und Modelle des Systementwurfs		Study Points: 8-10	
Goals:			
<p>Inhalt: Software wird zuverlässiger, änderbarer und preiswerter, wenn vor der Codierung ein Modell erstellt wird, das die Wirkung der Software auf ihre (technische oder organisatorische) Umgebung beschreibt. Die Vorlesung behandelt Methoden, um solche Modelle zu entwerfen und zu analysieren, unterstützt von Softwarewerkzeugen. Alle vorgestellten Methoden (ASM, CCS, CSP, LARCH, MSC, Petrinetze, Pi-Kalkül, Prozessalgebren, SDL, Statecharts, TLA, UML, Z) und Analysetechniken (Invarianten, Model Checking, Refinement Calculus) werden in der industriellen Praxis verwendet.</p>			
<p>Qualifikationsziele: Überblick über derzeit gängige Modellierungsmethoden, Grundlagen und Prinzipien für zukünftige Methoden.</p>			
Prerequisites to participate in the module: Mathematische Grundkenntnisse, insbesondere zur Logik			
Course	Periods/Week	SP; work load	Topics
Lecture MMS	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Überblick über derzeit gängige Modellierungsmethoden, Grundlagen und Prinzipien für zukünftige Methoden
Tutorial	2	2; Teilnahme an den Übungen (30h), Vor- und Nachbereitung der Übungen (30h)	betreute Übung; Selbststudium mit Unterstützung durch Übungen und die Verfügbarkeit aller Folien und der verwendeten Literatur
Seminar MMS (optional)	2	2; Teilnahme an den Vorträgen (30h), Vorbereitung und Ausarbeitung des eigenen Themas als Vortrag und Hausarbeit/Programm/Modell (30h)	Vorstellung einer Software zur Systemmodellierung
Module examinations		mündliche Prüfung (30 Min) oder schriftliche Prüfung (180 Minuten). Voraussetzung zur Prüfung ist das Bestehen der Übung. SE: Präsentation eines Seminarthemas und Seminararbeit (benotet)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

Learning Objectives:

The module is concerned with the theories, concepts, and practices of Information Systems, emphasizing the support of managerial decision making by means of formal, data oriented methods. Students have the opportunity to develop a variety of skills, including:

- Students are familiar with the three branches of **descriptive, predictive and prescriptive analytics** and appreciate the relationships between these streams.
- Given some data, students are able to select appropriate techniques to **summarize and visualize the data** so as to maximize managerial insight.
- Students understand the **potential and also the limitations of predictive analytics** to aid decision making. They comprehend when and how business applications can benefit from predictive analytics. Given some decision task, they are able to recommend suitable prediction methods.
- Students are familiar with the fundamentals of predictive modelling. Using standard software packages, they can **develop basic and advanced prediction models and assess their accuracy** in a statistically sound manner.

Language: English

Fachliche Voraussetzungen für die Teilnahme am Modul: none

Lehrveranstaltungsart	Präsenzzeit, Workload in Stunden:	Leistungspunkte und Voraussetzung für deren Erteilung	Themen, Inhalte
Lecture Business Analytics and Data Science	<u>2 SWS</u> 60 Hours <u>Contact hours: 25 h</u> <u>Course preparation: 35 h</u>	2 SP, attendance	<ul style="list-style-type: none"> <li>• Fundamentals of Business Analytics</li> <li>• Making data accessible: Tools for summarization, grouping, and visualization</li> <li>• The business case for predictive modeling</li> <li>• Prediction methods for regression and classification</li> <li>• Advanced data types: time series, text, survival, and network data</li> <li>• Fundamentals of intelligent search</li> </ul>
Tutorial Business Analytics and Data Science	<u>2 SWS</u> 60 Hours <u>Contact hours: 25 h</u> <u>Course preparation: 35 h</u>	2 SP, attendance <i>Special working task</i> (only if MAP is written exam): Completion of a programming task related to business analytics including a written report (ca. 5.000 ZoL)	<ul style="list-style-type: none"> <li>• Further elaboration of lecturing material.</li> <li>• Practical PC exercises using various software packages (e.g., Excel, Matlab, Python)</li> </ul>
Modulabschlussprüfung	<u>60 Hours</u> Practical assignment: solve modeling problem using R and document solution in a written report (ca. 10.000 ZoL) <i>or</i> Written exam (60 min)		2 SP Pass written exam Business Analytics and Data Science (100%)
Dauer des Moduls	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester		
Beginn des Moduls	<input checked="" type="checkbox"/> Wintersemester <input type="checkbox"/> Sommersemester		

<b>Mandatory Elective Module Business Information Technology and Computer Science: Implementierung von Datenbanksystemen (DBS II)</b>			<b>Study Points: 10</b>
Goals: Studierende erlangen vertiefende Kenntnisse von Datenbanksystemen bezüglich ihrer Implementierung/ Realisierung und ihrer Funktion. Sie erhalten die Fähigkeit, die Internas (objekt-) relationaler Datenbankmanagementsysteme zu verstehen und Realisierungsalternativen abzuwägen.			
Prerequisites to participate in the module: Grundkenntnisse in Datenbanksystemen			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	60 Stunden Anwesenheit, 90 Stunden Vor- und Nachbereitung inkl. Prüfungsvorbereitung	Die Vorlesung gibt einen Überblick über die Architektur und Implementierung moderner Datenbankmanagementsysteme (DBMSe). Die Vorlesung umfasst u.a. Zugriffstrukturen, Anfragesprachen, Anfragebearbeitung und -optimierung, Mehrbenutzerkontrolle und Fehlererholung.
Internship	2	30 Stunden Anwesenheit, 120 Stunden Bearbeitung der Aufgaben	Das Praktikum dient der Erweiterung und der Vertiefung des Vorlesungsstoffes durch eine prototypische (Teil-) Realisierung eines relationalen DBMS. Erfolgreiche Teilnahme am Praktikum ist Voraussetzung zur Prüfungszulassung.
Module examination		Oral exam (30 minutes) or written exam (120 minutes)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Zuverlässige Systeme (ZS)</b>			<b>Study Points: 8</b>
Goals:			
<p>ZS ist ein in die Tiefe gehender Halbkurs auf dem Gebiet der fehlertoleranten, verteilten, parallelen und web-basierten Systeme. Teilnehmer des Kurses lernen sowohl die Grundlagen zuverlässiger Systeme als auch tiefergehende Techniken und Methoden für Modellierung, Design und Entwurf solcher Systeme. Spezielle Themen sind u.a.: Fehlertoleranz, Zuverlässigkeit, Responsivität, Messungen, Anwendungen, Systemmodelle und Techniken, Ausfallverhalten, Fehlermodelle, Software/Hardware – responsives Systemdesign, Analyse und Synthese, Bewertung, Fallstudien in Forschung und Industrie.</p>			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Grundlagen zuverlässiger Systeme als auch tiefergehende Techniken und Methoden für Modellierung, Design und Entwurf solcher Systeme
Project work	2	2; Projektbearbeitung (60h)	
Module examinations		Oral exam	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Werkzeuge der empirischen Forschung</b>			<b>Study Points: 8</b>
Goals:			
Inhalt: Es werden Basisverfahren der Beschreibenden Statistik (Statistische Maßzahlen, Boxplots, Häufigkeitstabellen und -diagramme, Zusammenhangsmaße) und der Schließenden Statistik (Ein- und Zweistichprobenproblem, Varianzanalyse, Anpassungstests, Nichtparametrische Tests, Korrelation, Regression, Clusteranalyse, Hauptkomponentenanalyse, Diskriminanzanalyse) behandelt. Die Methoden werden anhand des Statistik-Programmpakets SAS und mit Hilfe von vielen Beispielen demonstriert.			
Qualifikationsziele: Grundkenntnisse statistischer Methoden und ihrer praktischen Anwendung. Der Schwerpunkt liegt auf den Methoden. Ihre praktische Umsetzung wird in der Vorlesung demonstriert und im Praktikum vertieft. Die Studierenden erlangen die Fähigkeit, statistische Probleme zu erkennen, zu lösen und die Ergebnisse zu interpretieren.			
Prerequisites to participate in the module: Mathematik 1-2, Grundkenntnisse in Wahrscheinlichkeitsrechnung sind von Vorteil			
Course	Periods/Week	SP; work load	Topics
Lecture	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Basisverfahren der beschreibenden und der schließenden Statistik,
Internship	2	2; Teilnahme am Praktikum (30h), Vor- und Nachbereitung des Praktikums (30h)	Praktische Umsetzung der in der Vorlesung demonstrierten Anwendung
Module examinations		Oral exam	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: IT Security &amp; Privacy</b>		<b>Study Points: 6</b>	
<p><u>Learning Objectives:</u></p> <p>The module presents an introduction to engineering and management of IT security and privacy in networked organizations. Students have the opportunity to gain knowledge and develop skills in the following areas:</p> <ul style="list-style-type: none"> <li>▪ Security and Privacy Requirements</li> <li>▪ Cryptography</li> <li>▪ Network Protocols</li> <li>▪ System, Network and Web Security</li> <li>▪ Privacy-Enhancing Technologies</li> <li>▪ Security Management</li> </ul>			
<p>Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: None</p>			
Lehrver- anstaltungsart	Präsenzzeit Workload in Stunden	Leistungspunkte , Voraussetzung für deren Erteilung	Themen, Inhalte
Lecture IT Security & Privacy	<u>2 SWS</u>  <u>60 Hours</u> Contact hours: 25 h Course pre- paration: 35 h	2 LP, Attendance	There will be a lecture-style introduction to IT Security & Privacy. In parallel, students work together in groups and prepare a seminar thesis. The thesis relates to a current topic or project in the scope of IT Security and Privacy. Seminar topics vary each year and will be announced in due course before the start of the seminar.
Seminar IT Security & Privacy	<u>2 SWS</u>  <u>60 Hours</u> Contact hours: 25 h Course pre- paration: 35 h	2 LP, Attendance	All papers will be presented and discussed in the seminar sessions.
Modulabschluss- prüfung	<u>60 Hours</u> Preparation of seminar thesis: 30 h Literature retrieval and analysis: 15 h Preparation of seminar presentation: 15 h	2 LP;  Seminar thesis (50%), Systematic retrieval and analysis of relevant literature (25%), oral presentation (25%)	
Dauer des Moduls	<input checked="" type="checkbox"/> 1 Semester		<input type="checkbox"/> 2 Semester
Beginn des Moduls	<input checked="" type="checkbox"/> WS		<input type="checkbox"/> SS

<b>Mandatory Elective Module Business Information Technology and Computer Science: Applied Predictive Analytics</b>		<b>Study Points: 6</b>	
<p><u>Learning Objectives:</u></p> <p>The model give students an opportunity to participate in a real-world forecasting challenge related to planning problems in business areas such as marketing, finance, or others. In this scope, students have the opportunity to develop a variety of skills, including:</p> <ul style="list-style-type: none"> <li>▪ Students further develop their <b>team work and project management</b> abilities through participating in a <b>real-world project setting</b>.</li> <li>▪ Students get acquainted with contemporary <b>software packages for predict analytics</b>.</li> <li>▪ Students are able to <b>develop advanced forecasting models</b> using a variety of techniques from statistics, machine learning, and other domains.</li> <li>▪ Students advance their knowledge in <b>data integration, preparation, and transformation</b> which allows them to create predictive variables from noisy real-world data sets.</li> </ul> <p><u>Language:</u> deutsch, english</p>			
<p>Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: Module Business Analytics &amp; Data Science</p>			
Lehrver- anstaltungsart	Präsenzzeit Workload in Stunden	Leistungspunkte, Voraussetzung für deren Erteilung	Themen, Inhalte
Seminar Applied Predictive Analytics	<u>2 SWS</u> <u>90 Hours</u> Contact hours: 25 h Preparation and post- processing: 15 h Model development and evaluation: 50 h	3 LP, Teilnahme	The module involves participating in a real-world forecasting competition such as the annual data mining cup, the ACM KDD cup, or a kaggle challenge. In this scope, students will experience several typical challenges that arise in real-world modeling projects, and develop the necessary skills to overcome these obstacles.
Modulabschluss- prüfung	<u>90 Hours</u> Preparation of written report: 45 h Preparation of seminar presentation: 45 h	3 LP; Written report (80%), presentations within the seminar (20%)	
Dauer des Moduls	<input checked="" type="checkbox"/> 1 Semester		<input type="checkbox"/> 2 Semester
Beginn des Moduls	<input type="checkbox"/> WS		<input checked="" type="checkbox"/> SS

<b>Mandatory Elective Module Business Information Technology and Computer Science: Informationsintegration</b>		<b>Study Points: 10</b>	
Goals:			
<p>Inhalt:  Die Vorlesung vermittelt Grundlagen der anfragebasierten Integration von heterogenen, verteilten und autonomen Quellen. Dies reicht von klassischen Themen föderierter relationaler Datenbanken (Architekturen, Anfrageoptimierung, Anfrageplanung) über Techniken zur Integration von Webquellen (Screen Scraping, Wrapper, Web Services und Semantic Web) zu neusten Entwicklungen im Bereich der Informationsintegration (Schema Mapping und Schema Matching, Integration semi-strukturierter und unstrukturierter Daten, Datenintegration und Datenqualität). Ein Schwerpunkt liegt auf der Behandlung semantischer Konflikte, zum Beispiel durch Ontologien. Die Vorlesung wird durch ein Praktikum begleitet.</p>			
<p>Qualifikationsziele:  Probleme der Verteilung und Heterogenität bei der Informationsintegration; Architekturen für integrierter Informationssysteme; Techniken zur anfragebasierten Datenintegration. Die Studierenden erlangen die Fähigkeit, integrierte Informationssysteme zu entwerfen und zu bewerten.</p>			
Prerequisites to participate in the module: Kenntnisse in Datenbanken (z.B. DBS-I), Kenntnisse in Algorithmen und Datenstrukturen			
Course	Periods/ Week	SP; work load	Topics
Lecture Informations-integration	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Methoden der Informationsintegration
Internship	2	4; Teilnahme am Praktikum (60h), Vor- und Nachbereitung des Praktikums (60h)	Durchführung eines Integrationsprojekts zur Anwendung des Vermittelten
Module examinations		Written or oral exam	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Data Warehousing und Data Mining (DWH)</b>			<b>Study Points: 10</b>
Goals:			
Die Studenten lernen Probleme und Lösungen bei Aufbau und Analyse sehr großer Datenbestände kennen. Die Studierenden erlangen die Fähigkeit, derartige Systeme zu entwerfen und mit aktuellen Werkzeugen zu implementieren.			
Recommended Prerequisites to participate in the module: Gute Kenntnisse in relationalen Datenbanken			
Course	Periods/ Week	SP; work load	Topics
Lecture  DWH	4	60 Stunden Anwesenheit, 90 Stunden Vor- und Nachbereitung inkl. Prüfungsvorbereitung	Mit Data Warehouses (DWH) werden sehr große, integrierte und auf die Datenanalyse ausgerichtete Datenbanken bezeichnet. Die Vorlesung behandelt diese Thematik in zwei Blöcken. Im ersten Block werden Methoden zum Aufbau und Management von DWH in relationalen Datenbanken vorgestellt (Architekturen, ETL-Prozess, das multidimensionale Datenmodell, OLAP Operationen, Bitmap-Indexe, materialisierte Sichten. etc.). Im zweiten Block besprechen wir Algorithmen, die auf den gesammelten Daten Analysen vornehmen (Data Mining), wie zum Beispiel Klassifikationsverfahren, Clustering und Lernen von Assoziationsregeln. Der Schwerpunkt liegt auf der performanten Implementierung solcher Algorithmen in Datenbanken.
Internship	2	30 Stunden Anwesenheit, 120 Stunden Bearbeitung der Aufgaben	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen anhand eines kommerziellen Datenbanksystems. Erfolgreiche Teilnahme am Praktikum ist Voraussetzung zur Prüfungszulassung.
Module examinations		Oral exam (30 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Text Analytics (TAN)</b>			<b>Study Points: 10</b>
Goals:			
Studierende erlangen die Fähigkeit, Informationssysteme, die textuelle Daten verarbeiten, zu entwerfen und zu bewerten. Sie lernen die grundlegenden Verfahren zur Suche in Texten, zur computerlinguistischen Aufbereitung von Dokumenten und zum Management und zur Analyse großer Dokumentsammlungen kennen.			
Inhalt: Die Themen umfassen Information Retrieval (Suchmaschinen, Anfragesprachen, Indexierung, Vektorraummodell, probabilistisches Retrieval, Relevance Feedback), Verfahren der Computerlinguistik (Kollokationsanalyse, Sprachmodelle, Wortart-Tagging, Disambiguierung) bis zu fortgeschrittenen Methoden im Text Mining (Dokumentklassifikation und -clustering, Informationsextraktion, Plagiaterkennung). Es werden sowohl algorithmische Grundlagen als auch Anwendungen behandelt.			
Prerequisites to participate in the module: Kenntnisse in Algorithmen und Datenstrukturen, gute Kenntnisse in der Programmierung mit Java			
Course	Periods/ Week	SP; work load	Topics
Lecture TAN	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Information Retrieval, Verfahren der Computerlinguistik, Text Mining
Internship	2	4; Teilnahme am Praktikum (60h), Vor- und Nachbereitung des Praktikums (60h)	Vertiefung der gelernten Methoden durch praktische Umsetzung: In Gruppen wird ein komplexes Problem des Text Mining, aufbauend auf existierenden Frameworks, gelöst.
Module examinations		Oral exam (30 min); provided that the Internship was successful	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Entrepreneurship – Unternehmensgründung im Informationszeitalter (ENT)</b>		<b>Study Points: 8</b>	
Goals:			
Die Studenten erarbeiten Grundkenntnisse von Innovation und Umwandlung der Geschäftsideen im High-Tech-Bereich in durchführbare Businesspläne und Unternehmen.			
<i>Inhalt:</i>			
Innovationen werden am häufigsten von den kleinen Firmen eingeleitet und vorangetrieben. In der Vorlesung werden Kenntnisse zur Unternehmensgründung (Geschäftsmodelle, Businessplan, Kapitalbeschaffung, Rechtsform, Finanzplanung, Marketing und Unternehmensbewertung) vermittelt, sowie verschiedene Fallstudien und Erfahrungsberichte von Existenzgründern vorgestellt.			
Im Projekt werden Geschäftsideen für Zukunftsmärkte erarbeitet, diskutiert und verfeinert. 2er- bis 5er Teams arbeiten jeweils eine innovative Geschäftsidee im High-Tech-Bereich zu einem Businessplan aus. Die Teams bekommen an drei Präsentationsterminen Gelegenheit, ihre Geschäftsidee vorzustellen und schrittweise auszureifen. Nach einem Businessvorschlag und einem Zwischenstatus wird schließlich der Businessplan in einer Abschlusspräsentation einer Expertenjury und den anderen Kursteilnehmern zur Evaluierung und Prämierung vorgestellt.			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture ENT	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Kenntnisse zur Unternehmensgründung (Geschäftsmodelle, Businessplan u.a.)
Internship	2	2; Teilnahme am Praktikum (30h), Vor- und Nachbereitung des Praktikums (30h)	Vertiefung der gelernten Methoden durch praktische Umsetzung: In Gruppen wird ein komplexes Problem des Text Mining, aufbauend auf existierenden Frameworks, gelöst.
Module examinations		Oral exam (30 min); presentation of a business plan	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Lineare Optimierung</b>			<b>Study Points: 8</b>
<p>Goals:</p> <p>Die Optimierung beschäftigt sich mit der Findung der besten Lösung(en) eines Problems. Die LO untersucht Probleme, bei denen die Gesamtheit aller Lösungen durch lineare (Un-)Gleichungen und das Ziel als eine bzw. mehrere lineare Funktionen gegeben sind. Angewandt in technischen, betriebs- und volkswirtschaftlichen Zusammenhängen, dient die bereits in der Planung eingesetzte Optimierung dazu, knappe Ressourcen so effektiv wie möglich zu verwenden bzw. ein gewünschtes Ergebnis mit möglichst geringem Ressourcenverbrauch zu erreichen.</p> <p>In diesem Modul werden wir die klassischen Lösungsverfahren kennenlernen: Simplex-methode, duale Simplexmethode, Methode der Potentiale zur Lösung der klassischen Transportaufgabe, sowie die Grundidee des polynomialen Algorithmus von Chachijian der eingeschriebenen Ellipsoide. Die entwickelten Verfahren werden wir auch zur Lösung von 1-parametrischen LO-Aufgaben, verschiedenen Transportaufgaben und zur Lösung von Aufgaben aus der Spieltheorie anwenden.</p> <p><i>Qualifikationsziele:</i> Die Studierenden bekommen die Möglichkeit, grundlegende Kenntnisse auf dem Gebiet der Optimierung zu erlangen und mathematische Fähigkeiten und Fertigkeiten zu entwickeln und zu üben.</p>			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h)	Simplex-Verfahren, lexikographisches Simplex –Verfahren, Dualität, Ellipsoidenverfahren, 1-para- metrische Optimierung, Transportaufgabe, Spieltheorie (antagonistische Spiele)
Tutorial	2	2; Teilnahme an der Übung (30h), Vor- und Nachbereitung (30h)	
Module examinations		Oral exam (30 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Informationspolitik/-ethik/-recht</b>			<b>Study Points: 10</b>
Goals:			
Die Studierenden haben einen Überblick über Aufgaben und internationale Trends der Informationspolitik und des Informationsrechts und können die jeweiligen Auswirkungen im gesellschaftlichen Rahmen bewerten.			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture	6	6; Besuch der Vorlesung (60h), Nachbereitung Vorlesung (60h), Prüfungsvorbereitung (60h)	Nationale und internationale (Fach-)Informationspolitik - Auswirkungen der Informatisierung von Wissen- und Informationsarbeit - Digital Divide; Information Literacy - Ethische Aspekte der Informationspolitik und des Informationsrechts - Informationsethik - Urheberrecht/Copyright; - Medienrecht - Aspekte des Verwaltungsrechts - Rechtsformen von BI-Einrichtungen - Verwertungsrechte und –organisationen; Patentrecht - Digital Rights Management - Vertrauensmanagement
Seminar	2	4; Teilnahme Übung (60h), Vor- u. Nachbereitung (60h)	Referat und Diskussionsbeiträge in einer elektronischen Forum
Module examinations		Oral exam (30 min); seminar paper	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Information Technology and Computer Science: Business Process Management</b>		<b>Study Points: 6</b>	
<p><u>Learning Objectives:</u></p> <p>The module is concerned with theories, concepts, methods, and practices to analyze and continuously improve business processes. Students have the opportunity to develop a variety of skills, including:</p> <ul style="list-style-type: none"> <li>▪ Students understand the origins, motivations and <b>objectives of business process management</b> and are familiar with the <b>process management lifecycle</b>.</li> <li>▪ Students appreciate the role and potential of <b>information and communication technology</b> to improve business process performance.</li> <li>▪ Students are familiar with the basic principles of qualitative and quantitative <b>process analysis</b>.</li> <li>▪ Students have a sound knowledge of <b>BPMN</b> and are able <b>to create process models</b> for basic and advanced business processes.</li> <li>▪ Students acquaint themselves with methods for assessing the relative merits and demerits of <b>business process outsourcing</b>.</li> <li>▪ Students have a basic understanding of process mining and recognize the potential and limitations of automatic process detection.</li> </ul>			
<p>Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: none</p>			
Lehrver- anstaltungsart	Präsenzzeit Workload in Stunden	Leistungspunkte, Voraussetzung für deren Erteilung	Themen, Inhalte
Lecture Business Process Management	<u>2 SWS</u>  <u>60 Hours</u> Contact hours: 25 h Course pre- paration: 35 h	2 LP, Attendance	<ul style="list-style-type: none"> <li>▪ Process management lifecycle</li> <li>▪ Principles of business process modeling using BPMN</li> <li>▪ Process analysis</li> <li>▪ Technologies for business process automation (e.g., BPEL)</li> <li>▪ Business process outsourcing</li> <li>▪ Process mining</li> </ul>
Tutorial Business Process Management	<u>2 SWS</u>  <u>60 Hours</u> Contact hours: 25 h Course pre- paration: 35 h	2 LP, Attendance	<ul style="list-style-type: none"> <li>▪ Further elaboration of lecturing material</li> <li>▪ Exercises from the field of BPM</li> <li>▪ Solving process modeling tasks using BPMN</li> </ul>

Mandatory Elective Module Business Information Technology and Computer Science: E-Business & Online Marketing		Study Points: 6	
<p><u>Learning Objectives:</u></p> <p>The module is concerned with theories, practices and technologies in the field of E-Business and Online Marketing. Students have the opportunity to develop a variety of skills, including:</p> <ul style="list-style-type: none"> <li>▪ Students appreciate the <b>state-of-the-art in E-Business and Online Marketing</b> from a theoretical and practical standpoint.</li> <li>▪ Students familiarize themselves with core <b>E-Business applications</b> (e.g., SCM, CRM, etc.), understand their origins, and how they depend on information and communication technology. Through generalizing these links, students are able to fully appreciate the relationship between internet technologies and E-Business strategy.</li> <li>▪ Students are aware of key <b>E-Business models</b>, understand their relative merits and demerits, and are able to judge the appropriateness of these models for specific business applications.</li> <li>▪ Students appreciate the <b>internet marketing mix</b>, know about the different digital channels for marketing communication, and understand the concept of <b>multi-channel management</b>.</li> <li>▪ Students are familiar with the <b>fundamentals of web analytics</b> to measure the effectiveness of online marketing initiatives.</li> <li>▪ Students are familiar with the concept and methods of web mining and understand the role of web mining in online marketing.</li> <li>▪ Students have a basic understanding <b>search engines</b> and their underlying <b>algorithms</b>.</li> </ul> <p><u>Language:</u>    english</p>			
<p>Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: none</p>			
Lehrver- anstaltungsart	Präsenzzeit Workload in Stunden	Leistungspunkte, Voraussetzung für deren Erteilung	Themen, Inhalte
Lecture E-Business & Online Marketing	<u>2 SWS</u>  <u>45 hours</u> 25 hours Attendance 20 hours Literature study and preparation	1,5 credits, participation	E-Business strategy; E-Business infrastructure; E-Business applications; Internet marketing mix; Marketing communication using digital channels; Web analytics fundamentals; Web Mining
Seminar E-Business & Online Marketing	<u>2 SWS</u>  <u>75 hours</u> 25 hours Attendance 50 hours Literature study and preparation	2,5 credits Special working task: presentation of a topic in the scope of the lecture (ca. 30 min)	Based on the content of the lecture, students prepare a presentation on current and emerging trends in E- business and online marketing and give an oral presentation.
Modulabschluss- prüfung	<u>60 Hours</u> Written exam (60 min) and preparation	2 credits, Pass	
Dauer des Moduls	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester		
Beginn des Moduls	<input type="checkbox"/> WS <input checked="" type="checkbox"/> SS		

**Wahlpflichtmodul Seminar Information Systems:**

Leistungspunkte: 6

Learning Objectives:

The module is concerned with recent developments and emerging technologies in the field of Information Systems. Students have the opportunity to develop the following skills:

- Students further develop their knowledge and understanding of the theories, applications, and methods of Information Systems.
- Students are able to critically appraise recent IS trends and developments using established IS theories and practices.
- Students further develop their ability to conduct scholarly research, concentrating on academic writing, information retrieval and literature analysis.

Language: english

Fachliche Voraussetzungen für die Teilnahme am Modul: none

Lehrver-anstaltungsart	Präsenzzeit Workload in Stunden	Leistungspunkte , Voraussetzung für deren Erteilung	Themen, Inhalte
Seminar Information Systems I	<u>1.5 SWS</u> <u>45 hours</u> Contact hours: 25 h Preparation and post- processing: 20 h	1,5 LP, Attendance	Students work in groups of two to three members and prepare a seminar thesis. The thesis relates to a current topic in the scope of IS. Seminar topics vary each year and will be announced in due course before the start of the seminar. All papers will be presented and discussed in the seminar sessions.
Seminar Information Systems II	<u>1.5 SWS</u> <u>45 hours</u> Contact hours: 25 h Preparation and post- processing: 20 h	1,5 LP, Attendance <i>Special working task: seminar presentation and discussion (ca. 30 min) with preparation</i>	
Modulabschluss- prüfung	<u>90 Hours</u> Seminar thesis (ca. 30.000 ZoL)	3 LP; Pass	
Dauer des Moduls	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester		
Beginn des Moduls	<input checked="" type="checkbox"/> WS <input type="checkbox"/> SS		

<b>Mandatory Elective Module in Information Systems and Computer Science: Informatik und Informationsgesellschaft I: Digitale Medien</b>			<b>Study Points: 10</b>
Goals: Kenntnis von Methoden und Techniken der Digitalisierung, der Kompression, der Speicherung und Präsentation mit offline- und online-Medien. Befähigung mit digitalen Medien in den Bereichen Text, Grafik, Ton, Bild und Bewegtbild umzugehen.			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture	4	Attendance (60 h); Preparation (60 h); Exam preparation (60 h)	Computer lassen ihre eigentliche Bestimmung durch Multimedia und Vernetzung erkennen: Es sind digitale Medien, die alle bisherigen Massen- und Kommunikationsmedien simulieren, kopieren oder ersetzen können und neue Medien ermöglichen. Der Prozess der Mediatisierung der Rechner und Rechnernetze wird in der Technik, seiner Geschichte, in Theorie und in Praxis untersucht.
Internship	2	Attendance (30h); Completing the tasks (90h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Module examination		Oral exam (30 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module in Information Systems and Computer Science: Informatik und Informationsgesellschaft II: Technik, Geschichte, Kontext</b>		<b>Study Points: 10</b>	
Goals: Kenntnis der relevanten technischen Grundlagen der Informationsgesellschaft und ihrer Geschichte. Kenntnis ihrer wichtigsten ökonomischen, politischen und juristischen Rahmenbedingungen. Befähigung zur Beurteilung ihrer wichtigsten kulturellen und sozialen Auswirkungen und einflussreicher Wechselwirkungen.			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture	4	Attendance (60 h); Preparation (60 h); Exam preparation (60 h)	Informatik als Technik wird in ihrer Entwicklung unter gesellschaftlichen Randbedingungen betrachtet, die mit wachsender Verbreitung ihrerseits die Gesellschaft transformiert: von einer industriell geprägten Arbeitsgesellschaft mit nationalstaatlicher Organisation zu einer globalen „Informationsgesellschaft“. Dieser (durchaus problematische) Begriff beschreibt eine Vielzahl unterschiedlicher und widersprüchlicher Entwicklungen: von den globalen Finanznetzen und ihren politischen und juristischen Fixierungen über das Internet als hochaktiver Kommunikations- und Medienraum bis hin zu militärischen Planspielen des Information Warfare.
Tutorial	2	Attendance (30h); Completing the tasks (90h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Module examination		Oral exam (30 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module in Information Systems and Computer Science: Architektur paralleler und verteilter Systeme</b>			<b>Study Points: 8</b>
Goals: Die Entwicklung effizienter Algorithmen für parallele und verteilte Systeme erfordert ein gutes Verständnis der zugrundeliegenden Architekturen. In dieser Lehrveranstaltung werden Konzepte und Basisalgorithmen für massiv-parallele Systeme, Client/Server-Systeme und Peer-to-Peer-Systeme vorgestellt, analysiert und in den Übungen bzw. im Praktikum implementiert und erprobt.			
Prerequisites to participate in the module: BA including Computer Science, good programming skills, knowledge of Computer architecture			
Course	Periods/Week	SP; work load	Topics
Lecture	2	Attendance (30h); Preparation (60 h); Exam preparation (30 h)	Es werden die folgenden Themen behandelt: Kommunikationsprotokolle, Serialisierungs-klassen, Skalierbarkeit, Fehlertoleranz, Nebenläufigkeitskontrolle, Konsens- und Transaktionsverfahren, datenorientierte Programmierparadigmen.
Tutorial	2	Attendance (30h); Completing the tasks (60h)	Die Themen der Vorlesung werden durch die praktische Erarbeitung von Lösungen zu ausgewählten Problemen vertieft. Die erfolgreiche Teilnahme an den Übungen ist Voraussetzung zur Prüfungszulassung.
Internship	2	Attendance (30h); Completing the tasks (60h)	Im Praktikum (Programmierarbeit in Gruppen) werden ausgewählte Algorithmen mit MPI, OpenMP sowie der funktionalen Programmiersprache Erlang implementiert.
Module examination		Oral exam (30 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (every 1 to 2 years)	

<b>Mandatory Elective Module in Information Systems and Computer Science: Neue Konzepte und Techniken für Datenbanksysteme (NDB)</b>		<b>Study Points: 8</b>	
Goals: Kenntnisse neuester Entwicklungen im Bereich Datenbanksystemen, ihrer Funktionen und ihrer grundsätzlichen Realisierung. Die Studierenden erlangen die Fähigkeit, fortgeschrittene und neuartige Funktionalitäten in Datenbanksystemen zu bewerten und zu nutzen.			
Prerequisites to participate in the module: Module „DBS1 (Einführung in Datenbanksysteme)“ or equivalent; „DBS2 (Implementierung von Datenbanksystemen“ beneficial; advanced skills of C/C++ required			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	6; Attendance (60h); Preparation (90 h);	Datenbanksysteme haben sich in den vergangenen Jahren kontinuierlich weiterentwickelt. Diese Vorlesung führt in folgende Entwicklungen der letzten Jahre ein: parallele DBMS, XML-DBMS, erweiterte Optimierungsansätze; erweiterte Transaktionsansätze, neuartige Speicherstrukturen, Column-Store-Ansatz, Hauptspeicher-DBMS. Es werden unterschiedliche Ansätze auch nach verschiedenen Kriterien bewertet.
Tutorial	2	2; Attendance (30h); Completing the tasks (60h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen, auch in Form von Vorträgen anhand der Originalliteratur. Erfolgreiche Teilnahme an der Übung und die erfolgreiche Teilnahme an allen Interviews ist Voraussetzung für die Prüfungszulassung.
Module examinations		Oral exam (30 min) or written exam (max. 3 hours)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module in Information Systems and Computer Science: Betriebssystem UNIX – Systemadministration und Sicherheit</b>		<b>Study Points: 8</b>	
Goals: Grundlegende Kenntnisse über die Konfigurationsmöglichkeiten und Sicherheitsmechanismen in aktuellen UNIX-Systemen. Beherrschung der grundlegenden UNIX-Werkzeuge und Techniken zur Systemadministration. Einsatz aktueller Sicherheitstechniken in UNIX-Systemen.			
Prerequisites to participate in the module: BA including Computer Science, basic knowledge of OS UNIX, Shell-programming			
Course	Periods/Week	SP; work load	Topics
Lecture	3	Attendance (50h); Preparation (130 h); Exam preparation (60 h)	<ul style="list-style-type: none"> <li>- Grundlagen der Systemadministration UNIX</li> <li>- Grundwissen: Prozesse, Files, Geräte, Dokumentation</li> <li>- Booten von UNIX-Systemen – Konfigurationsmöglichkeiten für den Systemadministrator</li> <li>- Speichermedien, Filesysteme, Sicherheit von Daten</li> <li>- Backup und Restore</li> <li>- Netzwerkverwaltung und Firewall-Techniken</li> <li>- Spooling</li> <li>- Authentifizierungsdienste unter UNIX</li> <li>- Härten von UNIX-Systemen</li> <li>- Transportsicherung</li> <li>- Zertifizierungstechniken</li> <li>- Analyse und Tuning von UNIX-Systemen, Werkzeuge</li> <li>- Thinclients</li> </ul> <p>Für die korrekte Bearbeitung der Praktikumsaufgaben werden Punkte vergeben. Eine Mindestpunktzahl ist die Voraussetzung für die Zulassung zur Prüfung am Ende des Semesters.</p>
Internship	1		Komplexe Praktikumsaufgaben; Managementaufgaben für unterschiedliche Betriebssysteme
Module examination		Oral exam	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester    (every 2 years)	

<b>Mandatory Elective Module in Information Systems and Computer Science: Bildverarbeitung</b>		<b>Study Points: 8</b>	
Goals: Studierende erhalten einen Einblick in grundlegende Verfahren der Bildverarbeitung. Sie lernen Art und Funktionsweise verschiedener Algorithmen zur Manipulation von Bildern kennen. Ein Schwerpunkt liegt auf der Vermittlung der zugrunde liegenden mathematischen Verfahren.			
Prerequisites to participate in the module: Module „Grundlagen der Signalverarbeitung“ or equivalent			
Course	Periods/Week	SP; work load	Topics
Lecture	2	Attendance (30h); Preparation (60 h); Exam preparation (30 h)	Digitalisierung und Charakterisierung von Bildern, ihre Kodierung und die wichtigsten Operatoren zur Verarbeitung von zweidimensionalen Signalen.
Tutorial	2	Attendance (30h); Completing the tasks (60h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Internship	1	Attendance (15h); Completing the tasks (15h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen.
Module examination		Oral exam (30 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester (every 3rd or 4th semester)	

<b>Mandatory Elective Module in Information Systems and Computer Science: Verteilte Algorithmen</b>			<b>Study Points: 10</b>
<p>Goals:  Zentraler Gegenstand der Vorlesung sind verteilte Basisalgorithmen, die in vielerlei Zusammenhängen vorkommen. Dazu gehören Algorithmen zur Verwendung knapper Ressourcen (wechselseitiger Ausschluss), zur Bildung von Konsens, zur verteilten Selbststabilisierung und zur Erkennung und Wiederbeschaffung verlorener Nachrichten (alternating bit, sliding window), für Paare von Agenten und für nachrichtenbasierte Netzwerke. Außerdem werden weitere wichtige Netzwerkalgorithmen (leader election, Echo, Phasensynchronisation) behandelt. Die Prinzipien verteilter constraint – und online – Algorithmen werden an Beispielen erläutert. Alle Algorithmen werden formal modelliert und verifiziert.</p> <p>Qualifikationsziele: Kenntnis der wichtigsten verteilten Basisalgorithmen und der Techniken zu ihrer Modellierung und Verifikation. Abstrakter formuliert, erkennen die Studierenden, dass Algorithmen insbesondere auch verteilte, mathematische Objekte sind und einen entsprechenden Umgang verdienen. Deshalb spielt die Implementierung der Algorithmen in derzeit aktuellen Programmiersprachen in dieser Vorlesung keine Rolle.</p>			
Prerequisites to participate in the module: Basic Knowledge of algorithms and data structure			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	Attendance (30h); Preparation (60 h); Exam preparation (60 h)	Der erfolgreiche Besuch dieses Moduls befähigt die Teilnehmer, verteilte Algorithmen zu spezifizieren und zu entwerfen und die Korrektheit ihres Entwurfs nachzuweisen. Es werden klassische Algorithmen zum wechselseitigen Ausschluss, zum Crosstalk, zum bestätigten Nachrichtenaustausch und Algorithmen auf Netzwerken (Leader Election, Echo, Konsens, Phasensynchronisation, Selbststabilisierung) behandelt. Als Modellierungssprache werden Petrinetze verwendet.
Tutorial	2	Attendance (30h); Completing the tasks (90h)	Selbständige Konstruktion spezieller Varianten der Algorithmen aus der Vorlesung und Übung der Verwendung von Petrinetzen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungsanmeldung.
Module examinations		Oral exam (30 min) or written exam (90 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2 years)	

<b>Mandatory Elective Module in Information Systems and Computer Science: Grundlagen der Signalverarbeitung</b>			<b>Study Points: 8</b>
Goals:			
<p>In der Lehrveranstaltung werden die (vor allem mathematischen) Werkzeuge für die Signalverarbeitung und Anwendungsbeispiele vorgestellt. Dazu gehören als wichtigste die Signalstatistik, Reihenentwicklungen und orthogonale Transformationen, Korrelation und Faltung. Im Praktikum wird die Handhabung des Algebraprogrammes MATLAB erlernt.</p> <p>Qualifikationsziele sind der sichere, kritische Umgang mit den Werkzeugen und die Vermittlung des Zusammenhangs zwischen den Werkzeugen und ihren Anwendungsmöglichkeiten in der Signalverarbeitung.</p>			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture	4	Attendance (30h); Preparation (60 h); Exam preparation (30 h)	In der Lehrveranstaltung werden die (vor allem mathematischen) Werkzeuge für die Signalverarbeitung und Anwendungsbeispiele vorgestellt. Dazu gehören als wichtigste die Signalstatistik, Reihenentwicklungen und orthogonale Transformationen, Korrelation und Faltung.
Tutorial	2	Attendance (30h); Completing the tasks (30h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Internship	1	Attendance (15h); Completing the tasks (15h)	Im Praktikum wird die Handhabung des Algebraprogramms MATLAB erlernt.
Module examinations		Oral exam (30 min) or written exam (180 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester <u>and</u>	

<b>Mandatory Elective Module in Information Systems and Computer Science: Signalverarbeitung</b>		<b>Study Points: 10</b>	
Goals: Vermittlung von Kenntnissen zur Verarbeitung eindimensionaler Signale und zu den Anwendungsmöglichkeiten			
Prerequisites to participate in the module: Module „Grundlagen der Signalverarbeitung“ or equivalent			
Course	Periods/Week	SP; work load	Topics
Lecture	4	Attendance (30h); Preparation (90 h); Exam preparation (30 h)	Die Baugruppen einer typischen Signalverarbeitungskette werden erläutert und typische Verarbeitungsaufgaben (Filterung, Datenreduktion, Kenngrößenermittlung) vorgestellt.
Tutorial	2	Attendance (30h); Completing the tasks (60h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Internship	1	Attendance (15h); Completing the tasks (45h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen.
Module examination		Oral exam (30 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester (ca. every 2 years)	

<b>Mandatory Elective Module in Information Systems and Computer Science: Kommunikationssysteme 1</b>			<b>Study Points: 8</b>
Goals: Studierende erlangen grundlegende Kenntnisse über Rechnernetzwerk- Hard- und –Software einschließlich nachrichtentechnischer Aspekte. Sie beherrschen den Entwurf und die Konfiguration von Rechnernetzwerken, speziell TCP/IP-Netzwerken und verstehen das Zusammenspiel der Komponenten auf der Basis von Netzwerkprotokollen. Sie können Netzwerkprotokolle im Ansatz selbst programmieren.			
Prerequisites to participate in the module: Module „Grundlagen der Programmierung“ and Module „Digitale Systeme“ or equivalent			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	Attendance (60h); Preparation (90 h);	<ul style="list-style-type: none"> <li>- Grundlagen von Rechnernetzwerken auf Hard- und Software-Ebene</li> <li>- Protokollgrundlagen, OSI-Modell</li> <li>- nachrichtentechnische Grundlagen</li> <li>- Hardware-Architekturen</li> <li>- Local Area Networks (LAN)</li> <li>- Protokolle der TCP/IP-Welt, Routing, Protokolle des Internet</li> </ul>
Internship	2	Attendance (30h); Completing the tasks (90h)	Im Praktikum werden die erworbenen Kenntnisse durch die Programmierung von Netzwerkprotokollen und deren Erprobung in Laborumgebungen vertieft. Die erfolgreiche Abnahme des Praktikums ist Voraussetzung für die Prüfungszulassung.
Module examination		Written exam (120 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

Mandatory Elective Module in Information Systems and Computer Science: Einführung in die Komplexitätstheorie			Study Points: 8
<p>Goals:</p> <p>In diesem Modul beschäftigen wir uns mit der Frage, welcher Aufwand nötig ist, um ein algorithmisches Problem zu lösen. Ist die Korrektheit eines Algorithmus' nachgewiesen, so stellt sich die Frage, ob die beanspruchten Ressourcen – in erster Linie Rechenzeit und Speicherplatz – auch tatsächlich nötig sind. Hierzu muss man nachweisen, dass es keinen wesentlich effizienteren Algorithmus für dieses Problem gibt. Um derartige Fragestellungen präzise formulieren zu können, werden reale Rechner mathematisch modelliert. Dabei ist man nicht nur an gegenwärtigen, sondern auch an zukünftigen Technologien (etwa Parallel- und Quantenrechnern) interessiert. Die Frage, ob es für praktisch relevante Problemstellungen effizientere Algorithmen als die bisher bekannten gibt, hängt sehr eng damit zusammen, ob bestimmte Komplexitätsklassen (wie etwa P und NP) gleich sind oder nicht (P= NP-Problem). Welche Beziehungen zwischen den unterschiedlichen Komplexitätsklassen bestehen, ist daher ein zentrales Forschungsthema der Theoretischen Informatik.</p> <p>Qualifikationsziele: Studierende erlangen die Fähigkeit, die Komplexität verschiedener algorithmischer Probleme abzuschätzen und einzuordnen. Aneignung von Fähigkeiten, die Komplexität verschiedener algorithmischer Problemstellungen abzuschätzen und zu vergleichen.</p>			
Prerequisites to participate in the module: BA including Computer Science			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	Attendance (60h); Preparation (60 h); Exam preparation (30 h)	<p>Die Komplexitätstheorie beschäftigt sich mit der Frage, welcher Aufwand, etwa an Rechenzeit oder Speicherplatz, erforderlich ist, um bestimmte algorithmische Probleme zu lösen. Dieses Modul ist eine Einführung in die Themen und Methoden der Komplexitätstheorie. Im Mittelpunkt stehen dabei die grundlegenden Zeit- und Platzkomplexitätsklassen.</p> <p>Konkrete Inhalte des Moduls sind: Hierarchiesätze, NP-Vollständigkeit und die P vs NP-Frage, Orakelmodelle und die polynomielle Hierarchie, deskriptive Komplexität und der Satz von Fagin, Platzkomplexität und der Satz von Savitch, die Klassen L, NL und PSPACE.</p>
Tutorial	2	Attendance (30h); Completing the tasks (60h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Module examinations		Oral exam (30 min) or written exam (120 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2 years)	

<b>Mandatory Elective Module in Information Systems and Computer Science: Einführung in die Kryptologie (KRY)</b>			<b>Study Points: 8</b>
Goals: Studierende erlernen grundlegende Techniken beim Entwurf und der Analyse von Kryptosystemen und von kryptografischen Protokollen.			
Prerequisites to participate in the module: Basic knowledge of probability theory			
Course	Periods/Week	SP; work load	Topics
Lecture	4	Attendance (60h); Preparation (60 h); Exam preparation (30 h)	Das Modul führt in grundlegende Verfahren der Kryptografie ein. Dabei werden sowohl klassische Verschlüsselungsverfahren (wie DES und AES) als auch Public-Key Systeme (wie RSA und ElGamal) behandelt. Die Verwendung von sicheren Verschlüsselungsverfahren bietet allerdings noch keine Garantie für einen sicheren Informationsaustausch. Hierzu bedarf es zusätzlich der Ausarbeitung so genannter kryptografischer Protokolle, die den Ablauf aller Aktionen der verschiedenen Teilnehmer von der Schlüsselgenerierung über den Schlüsseltransport bis hin zur Ver- und Entschlüsselung der Nachrichten regeln.
Tutorial	2	Attendance (30h); Completing the tasks (60h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Module examinations		Oral exam (30 min) or written exam (120 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2 years)	

<b>Mandatory Elective Module in Information Systems and Computer Science: Software Engineering</b>			<b>Study Points: 8</b>
<p>Goals:</p> <p>Software Engineering beschäftigt sich mit Methoden der systematischen Entwicklung komplexer Software. Die Erstellung komplexer Softwaresysteme unterscheidet sich nicht nur quantitativ, sondern auch qualitativ von der kleineren Programme. So werden nur 5 % aller Softwareprojekte termingerecht fertig und etwa 50 % des Entwicklungsaufwandes wird für die Fehlersuche und Fehlerbeseitigung aufgewendet.</p> <p>Die Studierenden erlangen die Fähigkeit, Software systematisch zu entwerfen, Anforderungen an Softwaresysteme zu analysieren und zu modellieren sowie durch systematisches Vorgehen, korrekte Software zu realisieren.</p>			
Prerequisites to participate in the module: BA including Computer Science or Module „Grundlagen der Programmierung“ or equivalent			
Course	Periods/Week	SP; work load	Topics
Lecture	4	Attendance (30h); Preparation (30 h); Exam preparation (30 h)	Methoden der systematischen Entwicklung komplexer Software; Vorgehensmodelle und Software-Entwicklungsstandards; Qualitätskriterien, Metriken und Aufwandsabschätzung; Anforderungsanalyse: Pflichtenheft und Produktmodell; Objektorientierte (UML) und strukturierte Analyse; Software-Architekturen, Entwurfsmuster und Modularisierung; Einsatz formaler Methoden; Validierung, Verifikation und Test; Produktzyklen, Weiterentwicklung und Reverse Engineering; Konfigurationsmanagement und Entwicklungswerkzeuge; Einführung in die Software-Ergonomie
Tutorial	2	Attendance (30h); Completing the tasks (90h)	Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung.
Module examinations		Oral exam (30 min) or written exam (120 min)	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module in Information Systems and Computer Science: Computergraphik</b>			<b>Study Points: 8</b>
Goals:			
Die Vorlesung gibt einen Überblick über Themen der Computergraphik und des Visual Computings. Dazu gehören Methoden zur 3D Szenenmodellierung, Beleuchtungs- und Schattenberechnung und Rendering auf GPUs genauso wie Raytracing oder Radiosity. Darüber hinaus werden moderne Verfahren des Bild- und Video-basierten Renderings vorgestellt. Für naturgetreue Darstellungen gewinnen in der Computergraphik zunehmend Verfahren der 3D Videoanalyse sowie die Kombination von realen Szenen mit Graphikelementen an Bedeutung. Daher werden Konzepte der Modell-basierten Bewegungs- und Formschatzung sowie der Virtuellen und Erweiterten Realität vorgestellt.			
Prerequisites to participate in the module: BA including Computer Science			
Course	Periods/ Week	SP; work load	Topics
Lecture / Tutorial	4 + 1	Attendance (60h); Preparation (120 h); Exam preparation (60 h)	<p>Die Vorlesung gibt einen Überblick über Themen der Computergraphik und des Visual Computings. Dazu gehören Methoden zur 3D Szenenmodellierung, Beleuchtungs- und Schattenberechnung und Rendering auf GPUs genauso wie Raytracing oder Radiosity. Darüber hinaus werden moderne Verfahren des Bild- und Video-basierten Renderings vorgestellt. Für naturgetreue Darstellungen gewinnen in der Computergraphik zunehmend Verfahren der 3D Videoanalyse sowie die Kombination von realen Szenen mit Graphikelementen an Bedeutung. Daher werden Konzepte der Modell-basierten Bewegungs- und Formschatzung sowie der Virtuellen und Erweiterten Realität vorgestellt.</p> <p>Vorlesungsbegleitend wird ein Praktikum angeboten, bei denen die Studierenden aktuelle Aufgabenstellungen aus den Bereichen Computergraphik und Visual Computing in praktischen Übungen bearbeiten.</p> <p>Das im Praktikum bearbeitete Projekt ist am Ende des Moduls vorzustellen. Eine Mindestpunktzahl ist Voraussetzung zur Zulassung zur Prüfung.</p>
Module examination		Oral exam (30 min)

<b>Mandatory Elective Module in Information Systems and Computer Science: Automatisierung industrieller Workflows</b>		<b>Study Points: 8</b>	
<p>Goals:</p> <p>Die Vorlesung gibt einen Einblick in die mathematischen und systemtheoretischen Grundlagen der Computersimulation zeitdiskreter Systeme. Eine dominierende Rolle spielt dabei der Ansatz der objektorientierten Prozesssimulation. Die vermittelten Methoden werden an Hand ausgewählter Modellierungssprachen (u.a. GPSS, SLX und UML) exemplarisch für die Modellierung, Dokumentation, simulative Ausführung, Leistungsbewertung und Optimierung realer Workflows praktisch angewendet. Die betrachteten realen Workflows dienen der Steuerung automatisierter Fertigungen. Sie stammen beispielhaft aus einem Projekt im Stahlwerksbereich. Ziel des Projektes ist es, Modelluntersuchungen weitestgehend so zu automatisieren, dass daraus konkrete Arbeitsprofile für die konkrete Produktion generiert werden können. Die Vorlesung wird durch die am Institut entwickelten Walzwerksimulatoren (C++) und Animatoren (Java) und durch Exkursionen vor Ort unterstützt.</p> <p>Die Studierenden lernen reale Probleme bei der modelltechnischen Erfassung und abstrakten Repräsentation komplexer domänenspezifischer Arbeitsgänge der Fertigungstechnik in Form einer arbeitsteiligen Herangehensweise kennen. In der begleitenden Vorlesung werden die Grundlagen zur Workflow-Modellierung, einschließlich ihres Zeit- und geteilten Ressourcenverbrauchs erarbeitet. Vermittelte Methoden der Next-Event-Simulation bilden im Praktikum nicht nur die Grundlage zur semantischen Präzisierung von UML, sondern auch die Basis für die Ausführung adaptierter UML-Zustands- und Aktivitätsdiagramme als Workflow-Modelle. Schließlich haben sich die Studierenden mit der Übertragbarkeit von gewonnenen Modellwahrheiten in die Produktionsrealität auseinander zu setzen.</p>			
<p>Prerequisites to participate in the module: BA including Computer Science, basic mathematical knowledge, skills in one object-orientated programming language (i.e. Java)</p>			
Course	Periods/ Week	SP; work load	Topics
Lecture	2	Attendance (30h); Exam preparation (60 h)	Siehe Inhalte & Qualifikationsziele
Internship	4	Attendance (60h); Preparation (90 h);	Siehe Inhalte & Qualifikationsziele
Module examination		Oral exam (30 min); Students must reach a minimum number of points in the tutorial tests to take part in the exam. Eine Mindestpunktzahl bei der Bearbeitung der Übungsaufgaben ist Voraussetzung für die Teilnahme an der Prüfung.	
Duration of the Module		<input type="checkbox"/> 1 Semester <input checked="" type="checkbox"/> 2 Semesters	
Module can be started in:		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2nd semester)	

<b>Wahlpflichtmodul der Wirtschaftsinformatik und Informatik (Vertiefungsgebiet): Techniken und Konzepte zum Schutz der Privatsphäre</b>		<b>Study Points: 6</b>	
Goals: Kenntnisse über Möglichkeiten zum Schutz der Privatsphäre; Kenntnisse zur Datenanalyse und Sensibilisieren bei Rückschlussmöglichkeiten auf Eigenschaften individueller Personen (De-Identification).			
Prerequisites to participate in the module: Lecture „Einführung in Datenbanksysteme (DBS1)“ or equivalent, knowledge of Data Mining, excellent knowledge in the field of data structure and algorithms			
Course	Periods/Week	SP; work load	Topics
Lecture	4	6; Attendance (60h); Preparation (90 h); Exam preparation (30 h)	Diese Vorlesung für Fortgeschrittene im Bereich Datenbanken und Informationssysteme gibt einen Überblick über Konzepte und Techniken zum Schutz der Privatsphäre bei der Bearbeitung großer Mengen personenbezogener Daten, aber auch beim Austausch von Daten in ubiquitären Systemen. Es werden unterschiedliche Schutzverfahren (Anonymisierung, differential Privacy) und Möglichkeiten der Anfragen auf geschützten Daten vorgestellt Weiterhin werden auf Anwendungsszenarien eingegangen und die vorgestellten Lösungen auf Ihre Passfähigkeit hin bewertet.
Module examination		Oral exam (30 min); as well as oral interviews during the semester and successfully completing the tasks	
Duration of the Module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in:		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester (irregularly)	

Elective Module Business Administration: General Management			Study Points: 6-27
<p>Goals:</p> <p>The mandatory module General Management aims at equipping students with necessary backgrounds in all relevant areas of management science, including finance and accounting. Students in the Master of Business Administration program are required to acquire 18 SP for completing this module. Students are suggested to select courses so that they obtain advanced background knowledge in the areas where they did not acquire sufficient skills in their undergraduate studies.</p>			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture Financial Accounting and Analysis	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	The goal of the course is to present students the basics of financial accounting and financial statement analysis. The course comprises three main parts. The first part deals with the objectives, fundamentals and institutions of financial accounting. The second part focuses on specific accounting rules under International Financial Reporting Standards (IFRS). The third part covers topics related to financial statement analysis such as financial analysis, forecasting methods and valuation models.
Exercise Financial Accounting and Analysis	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	
Lecture Economics of Entrepreneurship	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	<ul style="list-style-type: none"> <li>- theoretical and formal aspects of the macro- and microeconomic aspects of entrepreneurship</li> <li>- psychological foundations of entrepreneurship</li> </ul>
Exercise Economics of Entrepreneurship	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	<ul style="list-style-type: none"> <li>- absorption of the lecture content and deepening of knowledge of selected aspects</li> </ul>
Lecture Marketing Management	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	Theories and strategies of marketing management and the core principles of the marketing-mix
Exercise Marketing Management	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	Theories and strategies of marketing management and the core principles of the marketing-mix revisited
Integrated Lecture Corporate Finance	4	6; Class attendance (45 h) Literature study and preparation (75 h)	<ul style="list-style-type: none"> <li>- Financial Markets</li> <li>- Corporate Securities</li> <li>- Financial-Statement Analysis</li> <li>- Working-Capital Management</li> </ul>

		Exam preparation (60 h)	<ul style="list-style-type: none"> <li>- Capital Structure</li> <li>- Payout Policy</li> <li>- Company and Project Valuation</li> </ul>
Lecture Organization and Management	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	Boundaries and structure of the firm, incentive contracts, ownership and property rights
Exercise Organization and Management	2	3; Attendance (25 h) Preparation (35 h) Exam preparation (30 h)	Students deepen their understanding of the topics from the lecture by solving problem sets and discussing additional material
Vorlesung Grundzüge der Besteuerung	2	3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Vorbereitung der Klausur (30 h)	Grundprinzipien der Besteuerung; Grundzüge des deutschen Unternehmenssteuerrechts (Einkommen-, Körperschaft- und Gewerbesteuer)
Übung Grundzüge der Besteuerung	2	3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Vorbereitung der Klausur (30 h)	Übungsaufgaben zu den Themen der Vorlesung Grundzüge der Besteuerung
Module examinations		Written exam Marketing Management (90 min) Lecture and Exercise Business Analytics & Data Science Practical assignment: solve modeling problem using R and document solution in a written report (ca. 10.000 ZoL) or written exam (60 min) Written exam for each other course (90 min)	
Duration of the module		<input type="checkbox"/> 1 Semester <input checked="" type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Administration: Entrepreneurship and Innovation</b>			<b>Study Points: 6-18</b>
<p>Goals:</p> <p>Lecture and Exercise Entrepreneurial Decision Making: The students know normative and descriptive approaches of decision and game theory and their applications in order to better understand how entrepreneurial decisions are made. They also learn about their own decision tendencies in classroom experiments.</p> <p>Lecture and Exercise Design of Decision Experiments: The students have a thorough understanding of the basic scientific requirements of experimentation and experimental design in entrepreneurship, management and related fields. They are in particular familiar with the different methods employed in the field of experimental economics and their respective advantages and disadvantages. Students furthermore know how to critically evaluate and discuss scientific work and how to potentially improve such work. Participants are also capable of programming basic experiments using the experimental software z-Tree (Fischbacher, 2007) and command the required econometric / statistical tools for the successful analysis of (self-modelled) experimental designs.</p> <p>Advanced Research on Entrepreneurship and Innovation (irregular schedule, depending on the availability of guest professors; see the precise name of the lecture in schedule): Covers application of advanced economic and management research to entrepreneurship and innovation.</p>			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture Entrepreneurial Decision Making	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	- various theoretical aspects of designing decision experiments - critically discussing scientific studies and their experimental design - methodological aspects of experimental analysis
Exercise Entrepreneurial Decision Making	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	- absorption of the lecture content and deepening of knowledge of selected aspects
Lecture Design of Decision Experiments	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	- various theoretical aspects of designing decision experiments - critically discussing scientific studies and their experimental design - methodological aspects of experimental analysis
Exercise Design of Decision Experiments	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	- absorption of the lecture content and deepening of knowledge of selected aspects
Advanced Research on Entrepreneurship and Innovation (irregular schedule, depending on the availability of	2 - 4	3 - 6; Lecture: Visiting the lecture (30 h), Preparation for courses (30 h), Exam preparation (30 h)  Depending on the instructor the lecture might be accompanied by	Lecture: Application of economic and management research to entrepreneurship.  Tutorial: Exercises and model application; small

<p>guest professors; see the precise name of the lecture in schedule)</p>		<p>a tutorial, in this case: Attendance of sessions (30 h), Preparation for tutorial sessions (15 h), Assignments (45 h)</p>	<p>empirical studies</p>
<p>Module examinations</p>		<p>Lecture and Exercise Entrepreneurial Decision Making: Written exam (90 min) Lecture and Exercise Design of Decision Experiments: Written exam (90 min) Lecture Advanced Research on Entrepreneurship and Innovation (irregular schedule, depending on the availability of guest professors; see the precise name of the lecture in schedule): Depending on the lecturer: Written exam (60 minutes if 3 SP, 90 minutes if 6 SP) <b>or</b> assignment and presentation of results <b>or</b> assignment and written exam (60 minutes if 3 SP, 90 minutes if 6 SP)</p>	
<p>Duration of the module</p>	<p><input checked="" type="checkbox"/> 1 Semester      <input type="checkbox"/> 2 Semesters</p>		
<p>Module can be started in</p>	<p><input checked="" type="checkbox"/> Fall Semester <u>or</u>      <input checked="" type="checkbox"/> Spring Semester</p>		

<b>Elective Module Business Administration: Seminar on Entrepreneurship and Innovation</b>		<b>Study Points: 6</b>	
Goals:			
Students have a deep knowledge on selected aspects of behavioral entrepreneurial decision making, experimental design and innovation processes. Students know how to develop a research question and to design the respective experimental design or empirical research to solve it. They understand how to conduct a scientific literature search and know how to write and structure a scientific seminar paper. Finally, students are able to present their scientific work and to critically discuss it with the audience.			
Preconditions: Successful attendance of the lecture "Entrepreneurial Decision Making"			
Course	Periods/Week	SP; work load	Topics
Seminar on fundamental topics in Entrepreneurship and Innovation	1	6; Attendance (15 h) Literature study and preparation (30 h)	Fundamental topics in behavioral and/or entrepreneurial decision making and experimental economics
+ Seminar on specialized topics in Entrepreneurship and Innovation	1	Attendance (15 h) Literature study and preparation (30 h) Seminar paper and preparation (Presentation and discussion a small research project (30 min)) (90 h)	Specialized topics in behavioral and/or entrepreneurial decision making and experimental economics
Module examinations	Seminar on Entrepreneurship and Innovation: Seminar paper (45.000 ZoL ) and preparation		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester		

Mandatory Elective Module Business Administration: Finance			Study Points: 6-21
<p>Goals:</p> <p>To gain a deep understanding of advanced issues in financial decision making.</p> <p>The <u>lecture "Finanzierungstheorie"</u> aims at broadening the understanding of financial decision making through the application of normative and descriptive decision and game theoretic models. The tutorials will revisit these models and apply them to problems and discuss them in the financial context.</p> <p>The <u>seminar "Market Microstructure"</u> covers recent developments in trading rules at organized exchanges and trading platforms, both theoretically und experimentally.</p> <p>During the <u>seminar "Finance"</u> students will do some research on their own by applying these methods of lectures and tutorials to complex cases.</p> <p>In the lecture <u>"Börsen und ausserbörsliche Handelsplattformen"</u> students will learn about the latest and relevant developments in trading at exchanges and other trading platforms.</p>			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture Finanzierungstheorie (German)	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Valuation of Investments under Uncertainty, Capital Budgeting with Taxes and Inflation, Modigliani/Miller Model with Taxes, Optimal Dividend Policy, Agency Models Dealing with Separation of Ownership and Management, Leasing
Tutorial Finanzierungstheorie (German)	2	3; Attendance (30 h) Preparation (15 h) Assignments (45 h)	Exercises and Model Application
Seminar Market Micro-structure	2	6; Attendance (30h), Seminar paper (60 h) Preparation (courses, exam) (90 h)	Market Microstructure
Seminar Finance	4	6; Attendance (60 h) Seminar paper and presentation (120 h)	Topics in Finance
Lecture Börsen und ausserbörsliche Handelsplattformen (German)	2	3; Visiting the lecture (30h), Preparation for courses (30h) Exam preparations (30h)	Exchanges and Trading Platforms
Module examinations	Finanzierungstheorie: Written exam (90 minutes) Seminar Market Microstructure: seminar paper and written exam (60 minutes) Seminar Finance: seminar paper (50 %) and presentation (50 %) Börsen und ausserbörsliche Handelsplattformen: Written exam (60 minutes)		
Duration of the module	<input type="checkbox"/> 1 Semester <input checked="" type="checkbox"/> 2 Semesters		

Module can be started in

Fall  
Semester or

Spring Semester

Mandatory Elective Module Business Administration: Management			Study Points: 6-24
<p><u>Learning Objectives:</u></p> <p><u>Organization and Management:</u></p> <p>Students get familiar with fundamental incentive and coordination problems in organizations. They learn how to identify and discuss these problems based on concepts from new institutional economics.</p> <p><u>Personnel Economics:</u></p> <p>Students get familiar with advanced problems in personnel economics. They learn how to identify and discuss these problems based on concepts from principal-agent theory.</p> <p><u>Incentives in Organizations:</u></p> <p>Students get familiar with advanced problems of coordination and incentive provision within and between firms. They learn how to identify and discuss these problems based on concepts from organizational economics and contract theory.</p> <p><u>Advanced Topics in Management:</u></p> <p>Students learn how to identify and analyze current problems in the area of management.</p> <p><b>Please note:</b> You have to choose either three lectures or two lectures and the seminar.</p>			
Preconditions: none			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Organization and Management	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Boundaries and structure of the firm, incentive contracts, ownership and property rights
Exercise Organization and Management	<u>2 SWS</u> <u>60 hours</u> 25 hours attendance 35 hours preparation	2 credits, participation	Students deepen their understanding of the topics from the lecture by solving problem sets and discussing additional material
Lecture Personnel Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Monetary and non-monetary forms of motivation; problems of performance measurement; multitasking problems; delegation of authority; career concerns
Exercise Personnel Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation, presentation (30 min)	Students deepen their understanding of the topics from the lecture by solving problem sets and discussing additional material
Lecture Incentives in Organizations	<u>2 SWS</u> <u>60 hours</u>	2 credits, participation	Incentive and coordination problems within and between firms: adverse selection, team problems, relational

	25 hours Attendance 35 hours Literature study and preparation		contracts, relative performance evaluation
Exercise Incentives in Organizations	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation, presentation (30 min)	Students deepen their understanding of the topics from the lecture by solving problem sets and discussing additional material
Seminar Advanced Topics in Management	<u>2 SWS</u> <u>120 hours</u> 25 hours attendance 95 hours literature study and preparation	4 credits, participation	The cases discussed in this seminar encompass a wide variety of subjects, including specific problems from the fields of personnel, managerial, and organizational economics.
Modulabschluss- prüfung	<u>60 hours</u> exam Organization and Management (90 min)  <u>60 hours</u> exam Personnel Economics (60 min) and preparation  <u>60 hours</u> exam Incentives in Organizations (60 min) and preparation  <u>60 hours</u> seminar paper (30,000 ZoL) (70%), presentation (30 min) (30%) and preparation	2 credits, pass  2 credits, pass  2 credits, pass  2 credits, presentation and seminar paper	
Dauer des Moduls	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester		
Beginn des Moduls	<input checked="" type="checkbox"/> WS or <input checked="" type="checkbox"/> SS		

Mandatory Elective Module Business Administration: Marketing		Study Points: 6-24	
<p>Goals:</p> <p>Lecture and Exercise "Marketing Management" (if not selected in the General Management, preconditions: none): The students:</p> <ul style="list-style-type: none"> <li>- learn the core principles of marketing marketing management</li> <li>- understand how marketing affects consumer behavior and firms' outcome measures</li> <li>- learn how consumers respond to marketing activities</li> <li>- learn how firms' can understand consumer preferences and how they should respond to consumers' preferences</li> </ul> <p>Lecture and Exercise "Customer Analytics and Customer Insights" (preconditions: Marketing Management): The students:</p> <ul style="list-style-type: none"> <li>- learn to identify customer perceptions</li> <li>- learn to evaluate different multivariate techniques to investigate customer perceptions</li> <li>- learn to estimate customer needs</li> <li>- understand and learn to evaluate different approaches to estimate customer preferences</li> <li>- learn ways to estimate consumer willingness to pay for product features</li> <li>- learn how to estimate discrete choice models at the example of choice based conjoint analysis</li> </ul> <p>Lecture and Exercise "Advanced Marketing Modelling": (preconditions: Applied Econometrics): The students learn to empirically estimate the effect of marketing decision on sales, market shares and profits and learn to how to apply discrete choice models to aggregate data. They learn to work with big data sources readily available in firms and necessary for marketing decisions and learn to apply advanced econometric methods to solve marketing problems. The students learn to evaluate marketing activities of firms.</p> <p>Seminar "Marketing": (preconditions: "Advanced marketing Modeling" or "Customer Analytics and Customer Insights": The students understand and learn to apply quantitative models in marketing to solve marketing problems.</p>			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture Marketing Management	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	Theories and strategies of marketing management and the core principles of the marketing-mix
Exercise Marketing Management	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	Theories and strategies of marketing management and the core principles of the marketing-mix revisited
Lecture Customer Analytics and Customer Insights	2	3; Attendance (25 h) Literature study and preparation (35 h) Written assignment (30)	Concepts and methods for understanding customers need and preferences as the basis for strategic and tactic marketing decision. Special emphasis new product design, measuring customers preferences and conjoint analysis
Exercise Customer Analytics and Customer Insights	2	3; Attendance (25 h) Literature study and preparation (35 h) Written assignment (30)	Computer-based exercises on applying the course content to marketing data  (4 non-graded written special work performances (each 15000 Zol, excluding tables and graphs))

Lecture Advanced Marketing Modelling	2	3; Attendance (25 h) Literature study and preparation (35 h) Written assignment (30 h)	Quantitative models of consumer behavior, modeling the effects of marketing on market outcomes and firms' profitability
Exercise Advanced Marketing Modelling	2	3; Attendance (25 h) Literature study and preparation (35 h) Written assignment (30 h)	Computer-based exercises and applying the course content to real purchase and transaction data (4 non-graded written special work performances (each 15000 ZoL, excluding tables and graphs))
Seminar Marketing I +	1	6; Attendance (15 h) Literature study and preparation (30 h)	Recent topics in quantitative marketing
Seminar Marketing II	1	Attendance (15 h) Literature study and preparation (30 h) Seminar paper (90 h)	Recent topics in quantitative marketing
Module examinations	Marketing Management: Written exam (90 min) Customer Analytic and Customer Analytics: Written assignment (20,000 ZoL, excluding tables and graphs) Advanced Marketing Modelling: Written assignment (20,000 ZoL, excluding tables and graphs) Seminar Marketing: Seminar paper (30,000 ZoL, excluding tables and graphs)		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u>		

<b>Mandatory Elective Module Business Administration: Accounting Courses</b>			<b>Study Points: 6-24</b>
Goals:			
This module contains elective classes for master students. Students do not have to be enrolled into the accounting specialization in order to enroll into these classes.			
Prerequisites to participate in the module: Students need a thorough understanding of financial accounting, both based on HGB and on IFRS, of financial statement analysis and of group accounting.			
Course	Periods/ Week	SP; work load	Topics
Lecture Financial Accounting and Analysis	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	The goal of the course is to present students the basics of financial accounting and financial statement analysis. The course comprises three main parts. The first part deals with the objectives, fundamentals and institutions of financial accounting. The second part focuses on specific accounting rules under International Financial Reporting Standards (IFRS). The third part covers topics related to financial statement analysis such as financial analysis, forecasting methods and valuation models.
Exercise Financial Accounting and Analysis	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	
Lecture Accounting Theory and Earnings Management	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	Institutions of accounting; the role of accounting based information from a valuation and from a contracting perspective; accounting and capital market based asset pricing, incentives and earnings management
Exercise Accounting Theory and Earnings Management	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	
Lecture Advanced Topics in Accounting  +	2	6; Attendance (25 h) Literature study and preparation (35 h)	Topics include but are not limited to: accounting for lease transactions, accounting for financial instruments, hedge accounting, accounting for stock based compensation, accounting for special purpose entities, special industry accounting, recent regulative changes in standard setting, auditing and corporate governance, valuation based on accounting information, earnings management.
Lecture Valuation	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	Methods of financial statements analysis and company valuation as well as the economic interpretation of these methods

Exercise Valuation	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30 h)	
Applied Seminar Advanced Cases in Accounting and Auditing	2	Attendance (25 h) Literature study and preparation (35 h) Case study and preparation (60 h)	The cases discussed in this seminar encompass a wide variety of subject, ranging from specific problems in accounting measurement over valuation related problems in IPO or merger and acquisitions settings to problems related to the identification of fraudulent earnings management
Master Thesis Seminar Accounting: Empirical Methods	1	6; Attendance (15 h) Literature study and preparation (30 h)	Students have to develop and conduct a small empirical project (data collection, data analysis, presentation of results). For those students who are not familiar with statistical software, we provide a short introduction into the statistical software package STATA.
+			
Master Thesis Seminar Accounting: Research Proposal	1	Attendance (15 h) Literature study and preparation (30 h) Research exposé and preparation (90 h)	Students have to identify their own research question and develop a research proposal which provides the motivation for the research question and also explains the methodology the student will be using to address the research question.
Vorlesung Umwandlung von Unternehmen	2	3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)	Die Besteuerung von Restrukturierungen im deutschen Umwandlungssteuerrecht; Steueroptimale Gestaltung von Umwandlungsvorgängen; Auswirkungen der Besteuerung auf den Unternehmenskauf
Übung Umwandlung von Unternehmen	2	3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)	Übungsaufgaben zu den Themen der Vorlesung Umwandlung von Unternehmen
Vorlesung Steuerwirkungslehre	2	3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)	Integration der deutschen Ertrags-steuern (Einkommens-, Körperschafts- und Gewerbesteuer) in gebräuchliche betriebswirtschaftliche Entscheidungsmodelle, um die Wirkungen auf die unternehmerische Entscheidung zu analysieren. Der Schwerpunkt liegt dabei auf Auswirkungen der Besteuerung auf die unternehmerische Investitions- und Finanzierungsentscheidung im nationalen und internationalen Kontext.
Übung Steuerwirkungslehre	2	3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)	Übungsaufgaben zu den Themen der Vorlesung Steuerwirkungslehre
Vorlesung International	2	3; Präsenzzeit (25 h) Vor- und Nachbereitung der	Besteuerung von In- und Out-Bound-Investitionen, Doppelbesteuerungsabkommen,

<p>e Unternehme ns- besteuerung</p> <p>+</p> <p>Übung International e Unternehme ns- besteuerung</p>	<p>2</p>	<p>Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)</p> <p>3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)</p>	<p>Hinzurechnungsbesteuerung, Steueroptimale Investitions- und Finanzierungspolitik</p> <p>Die Studenten vertiefen anhand praxisnaher Beispiele und Fallstudien den Vorlesungsstoff</p>
<p>Vorlesung Steuerliche Gewinnermit tlung</p> <p>+</p> <p>Vorlesung Umsatzsteue r und Verfahrensre cht</p>	<p>2</p> <p>2</p>	<p>3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)</p> <p>3; Präsenzzeit (25 h) Vor- und Nachbereitung der Lehrveranstaltungen (35 h) Klausurvorbereitung (30 h)</p>	<p>Steuerbilanzerstellung, Steuerbilanzpolitik, Gesellschafterwechsel, Behandlung von Sacheinlage</p> <p>Die Studenten erlernen vor allem anhand von praktischen Beispielen aus der Rechtsprechung sowie aus dem Tagesgeschäft von Unternehmen die Systematik des Umsatzsteuergesetzes unter Vertiefung der Schwerpunkte wie Lieferung, Leistung, Organschaft, Vorsteuerabzug und Vorsteuerberichtigung. Im steuerlichen Verfahrensrecht lernen die Studenten die Grundzüge der Abgabenordnung und ihre Verschränkung mit dem materiellen Steuerrecht kennen. Dabei liegt die Gewichtung auf dem Steuerbescheid und den Rechtsmitteln, der Festsetzungsfrist und den Änderungsvorschriften. Auch das Steuerstrafrecht und seine Bedeutung für die reguläre Veranlagung werden vermittelt. Das Erlernete wird anhand von Fällen und Fallstudien angewendet und vertieft.</p>
<p>Research Seminar Financial Accounting Research Group</p>	<p>2</p>	<p>6; Seminar attendance (30 h), study of the relevant literature (30 h), preparation and discussion of the assignments (120 h).</p>	<p>This seminar is targeted at interested students which have an active interest in current financial accounting topics and in cutting-edge financial accounting research. The main objective of this seminar is to introduce eligible students to current research in the area of financial accounting and auditing.</p> <p>In this context, we will provide participants with the necessary skills to comprehend common research design choices and to identify shortcomings of these choices. To achieve this, participants of the seminar will be invited to several lectures, tutorials and talks of international guests, which will take place at the institute. Since it is common to discuss the content of these talks beforehand, participants will also be invited to the corresponding discussion meetings at the institute. In addition, we will invite leading industry experts to discuss current financial accounting topics with us in a small colloquial atmosphere. Each seminar period will last for one academic year and we expect participating students to commit to</p>

		the full year.
Module examinations	Each Lecture/Exercise or Lecture + Lecture: Written exam (90 min) Lecture "Advanced Topics in Accounting" + Applied Seminar Advanced Cases in Accounting and Auditing: Case study (30,000 ZoL) Master Thesis Seminar Accounting: Research exposé (30,000 ZoL) Research Seminar Financial Accounting Research Group: Written Reviews	
Duration of the module	<input type="checkbox"/> 1 Semester <input checked="" type="checkbox"/> 2 Semesters	
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Administration: Master Thesis Seminar Accounting (ehem. Accounting Research Seminar)</b>		<b>Study Points: 6</b>	
Goals:  This seminar aims at developing the research skills which Master students need to develop and write a master thesis in the area of accounting. Students, who wish to write a master thesis at the Institute of Accounting and Auditing, have to enroll in and successfully complete this seminar.			
Prerequisites to participate in the module: Students need a thorough understanding of the underpinnings of accounting.			
Course	Periods/ Week	SP; work load	Topics
Master Thesis Seminar Accounting	2	6; Attendance (30 h) Literature study and preparation (30 h) Research exposé and preparation (30 h)	Students have to develop and conduct a small empirical project (data collection, data analysis, presentation of results). For those students who are not familiar with statistical software, we provide a short introduction into the statistical software package STATA. Students have to identify their own research question and develop a research proposal which provides the motivation for the research question and also explains the methodology the student will be using to address the research question.
Module examinations		Research exposé (30,000 ZoL)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Administration: Master Tax Seminar (Master thesis seminar Tax)</b>			<b>Study Points: 6-12</b>
Goals:			
The seminar aims at developing the research skills which Master students need to write a master thesis in the area of business taxation. Students, who intend to write their master thesis at the Institute of Business Taxation, are required to complete this seminar successfully.			
Requirements for participation: Students need a profound knowledge of institutional details and economic effects of business taxation, and have to complete the Master module Accounting as a field of specialization.			
Course	Periods/Week	SP; work load	Topics
Master Tax Seminar (German)	2	6; Seminar attendance (30h), preparation of the seminar paper (90h), presentation of the seminar paper, preparation and discussion of other seminar papers (60h)	During the seminar students deal with current tax issues and tax reforms respectively tax reform proposals in a national and international context.  The classes are held in German.
Current Issues in Tax Accounting (German)	2	6; Seminar attendance (30h), Preparation of the seminar paper (90h), Presentation of the seminar paper, preparation and discussion of other seminar papers (60h)	In this seminar we discuss varying issues in taxation.  The classes are held in German.
Module examinations		Seminar paper (50 %), presentation of the seminar paper and discussion of other seminar papers (50 %)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

Mandatory Elective Module Business Administration: Financial Economics			Study Points: 6-24
<p>Goals:</p> <p>Integrated Lecture "Corporate Finance": Financial Markets, Corporate Securities, Financial-Statement Analysis, Working-Capital Management, Capital Structure, Payout Policy, Company and Project Valuation.</p> <p>Lecture and exercise "Introduction to financial economics" (preconditions: none): The students are introduced to the foundations of financial economics: the term structure of interest rates and risk premia. The course is a prerequisite for all other courses in finance.</p> <p>Lecture and exercise "Advanced corporate finance" (preconditions: Knowledge of the principals of finance theory: Capital asset pricing model (CAPM), efficient market hypothesis, Markowitz portfolio selection, Modigliani-Miller theorem, DCF valuation. These concepts are covered in the lectures "Investition &amp; Portfoliomanagement" and "Corporate Finance"): The students are familiar with advanced models of corporate financial policy, such as capital structure, payout policy, fund raising, corporate governance and risk management. They are able to analyze these corporate financial policies in the context of agency problems and information asymmetries.</p> <p>Lecture and exercise "Financial engineering" (preconditions: Knowledge of the contents of the course "Introduction to Financial Economics"): The students are introduced to techniques for constructing and pricing financial derivatives based on "no-arbitrage" arguments.</p> <p>Lecture and exercise "Private Equity" (preconditions: Advanced Corporate Finance): The successful students will be fluent in the technical terms of the private-equity industry and be knowledgeable about all stages from start-up, fund-raising, investment, operation, portfolio management, up until exit. They will be able to apply state-of-the-art valuation techniques to start-ups, spin-offs, buy-outs, and IPOs. Typical contract designs will be familiar and related to models of agency theory and monitoring. They will have dealt with LBOs and quantified connections between capital structure, firm performance and investment returns. Finally, they will realize how trade-offs covered in other courses re-appear in more pronounced ways in the context of private equity. Based on case studies they will have proven their analytical skills in real-world problems and via implementation exercises have sharpened their quantitative abilities.</p> <p>Case Seminar "Advanced Corporate Finance" (preconditions: Knowledge of the principals of finance theory: Capital asset pricing model (CAPM), efficient market hypothesis, Markowitz portfolio selection, Modigliani-Miller theorem, DCF valuation. These concepts are covered in the lectures "Investition &amp; Portfoliomanagement" and "Corporate Finance". The course "Advanced Corporate Finance" must be taken parallel or prior to the case seminar.): The students are able to analyze corporate financial decisions in complex, real-world situations, and can use theoretical models to justify their own policy recommendations.</p> <p>Seminar "Advanced Financial Economics – Corporate Finance" (Preconditions: Advanced Corporate Finance, Private Equity): Successful students have acquired in-depth knowledge of the academic corporate-finance literature, which constitutes the focus of this seminar. They have achieved deep understanding of the prevalent models, are capable of relating to the models in the broader context of the field, and to critically reflect on assumptions and implications. Moreover, students possess the skills to implement the models in computer programmes, to obtain numerical results, and to interpret those results meaningfully. After completing the seminar, students are proficient in the academic literature in the field of corporate finance and its models, as well as with scientific methods, such that they can contribute to state-of-the-art research in the context of their dissertations.</p>			
<p>Prerequisites: Knowledge of the principals of finance theory: capital asset pricing model (CAPM), efficient market hypothesis, Markowitz portfolio selection, Modigliani-Miller theorem, DCF valuation. The last two concepts are covered in the IL Corporate Finance.</p>			
Course	Periods/ Week	SP; work load	Topics
Integrated Lecture  Corporate Finance	4	6; Class attendance (45 h) Literature study and preparation (75 h) Exam preparation (60 h)	<ul style="list-style-type: none"> <li>- Financial Markets</li> <li>- Corporate Securities</li> <li>- Financial-Statement Analysis</li> <li>- Working-Capital Management</li> <li>- Capital Structure</li> <li>- Payout Policy</li> </ul>

			- Company and Project Valuation
Lecture Introduction to Financial Economics	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	Discount factors, the term structure of interest rates, mean-variance theory, portfolio selection, factor pricing models.
Exercise Introduction to Financial Economics	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	Exercises that prepare students for the final exam.
Lecture Advanced Corporate Finance	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	Impact of agency costs and information asymmetries on corporate financial policy, such as capital structure, project finance, payout policy, corporate governance, executive compensation, and risk management
Exercise Advanced Corporate Finance	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	Exercises in topics of Advanced Corporate Finance
Lecture Financial Engineering	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	Forwards and futures, option pricing in the binomial model and the Black Scholes model, estimation of risk-neutral densities, and applications
Exercise Financial Engineering	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	Exercises that prepare students for the final exam.
Lecture Private Equity	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	- Fund raising, deal sourcing - Deal structuring, deal management - Valuation - Exits - Performance measurement - Growth, cycles, welfare
Exercise Private Equity	2	3; Attendance (25 h) Literature study and preparation (35 h) Exam preparation (30)	- Case Studies - Implementation exercises regarding the topics of the lecture
Case Seminar Advanced Corporate Finance I  +	1	6; Presence in class (15 h) Preparation and learning (15 h)	This seminar discusses business case studies that relate to the topics covered in "Corporate Finance"
Case Seminar Advanced Corporate Finance II	2	Attendance (25 h) Literature study and preparation (35 h) Homework (40,000 – 60,000 ZoL) and preparation (90 h)	This seminar discusses business case studies that relate to the topics covered in "Advanced Corporate Finance"

Seminar and Proseminar  Advanced Financial Economics – Corporate Finance	4	6; Class attendance (50 h) Literature study (35 h) Programming (35 h) Preparation of the seminar paper (+ presentation of research paper, referee report) (60 h)	Capital-Structure Theory Financial Constraints Internal Capital Markets Delegated Investment Management Empirical Methods  Corporate Governance Behavioral Finance Corporate Risk Management  Financial Contracting: Decision and Control Rights, Strategic Default Investor Monitoring: Takeovers  Implementation of models and calculations of select papers from the seminar using GNU/R.
Module examinations	Integrated Lecture Corporate Finance: Written exam (90 min) Lecture and Exercise Introduction to Financial Economics: Written exam (60 min) Lecture and Exercise Advanced Corporate Finance: Written exam (60 or 90 min) Lecture and Exercise Financial Engineering: Written exam (60 min) Lecture and Exercise Private Equity: Written exam (60 min) Case Seminar Advanced Corporate Finance I + II: Homework (80%) and Presentation (20%) SE Advanced Financial Economics – Corporate Finance: Seminarpaper (30,000 ZoL)		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester		
Module can be started in	<input checked="" type="checkbox"/> WS <u>or</u> <input checked="" type="checkbox"/> SS		

<b>Mandatory Elective Module Business Administration: Thesis Seminar Corporate Finance</b>			<b>Study Points: 6</b>
Goals:  This seminar is designed for students who wish to write a master thesis at the institute of corporate finance. Most theses will be of an empirical nature. Therefore, sound econometrical and programming skills are essential. Before selecting this modul , students should have successfully completed the mandatory courses of the Mandatory Elective Modul: Financial Economics			
Course	Periods/ Week	SP; work load	Topics
Seminar  Hauptseminar/Thesis Seminar Corporate Finance	4	6; Seminar attendance (60 h) Literature study (30 h) Preparation, presentation and discussion of the seminar paper (90 h)	This course covers advanced topics in corporate finance, as well as major econometric techniques used in empirical corporate finance research. The goal is to prepare students for writing a master thesis at the Institute of Corporate Finance.
Module examinations		Seminar paper (50 %), presentations (50 %)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Administration: Thesis Seminar Financial Economics</b>			<b>Study Points: 6</b>
Goals:  This seminar is designed for students who wish to write a master thesis in financial economics at the institute of financial economics. Most theses will be of an empirical nature. Therefore, sound econometrical and programming skills are essential. Before selecting this modul , students should have successfully completed the mandatory courses of the Mandatory Elective Modul: Financial Economics			
Course	Periods/ Week	SP; work load	Topics
Seminar  Hauptseminar/Thesis Seminar Financial Economics	4	6; Seminar attendance (60 h) Literature study (30 h) Preparation, presentation and discussion of the seminar paper (90 h)	Preparation for writing a master thesis. The seminar will discuss papers on financial economics.
Module examinations		Seminar paper (50 %), presentations (50 %)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Administration: Strategic Management</b>		<b>Study Points: 6</b>	
<p>Goals:</p> <p>The course gives an introduction into the analytical tools of strategic analysis and applies these to decisions like boundaries of the firm, strategic interaction with competitors, market entry etc.</p> <p>In the tutorials students solve exercises and discuss examples.</p>			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture + Tutorial  Strategic Management	4	6; Attendance (60 h) Reading (30 h) Assignments (45 h) Preparation for tutorial sessions (15 h) Exam preparation (30 h)	Basic notions of game theory, boundaries of the firm, strategic interaction with competitors and complementors, market entry, tools for analyzing strategic situations.
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester	
Module can be started in		<input checked="" type="checkbox"/> WS <input type="checkbox"/> SS	

<b>Mandatory Elective Module Business Administration: Financial Contracting</b>			<b>Study Points: 6-12</b>
Goals:			
Derive fundamental relations between incentives, cash-flow rights and control rights from first assumptions (security design). Apply the insights from optimal contracts to more complex situations. The lecture provides an introduction into the main theoretical tools and some basic models of financial contracting. In class students solve exercises and discuss examples. In the seminar students apply the tools to selected problems and deepen their understanding by analyzing more complex situations.			
Prerequisites to participate in the module: A good background in microeconomics and game theory			
Course	Periods/Week	SP; work load	Topics
Lecture Financial Contracting	2	3; Attendance (30 h) Reading paper (30 h) Exam preparation (30 h)	Effort and risk incentives, security design, screening, optimality of debt and equity, moral hazard, signaling through capital structure, recontracting, control rights, number of creditors, voting rights.
Tutorial Financial Contracting	2	3; Attendance (30 h) Preparation for Tutorial Sessions (15 h) Assignments (45 h)	
Seminar	2	6; Attendance (30h), Preparation and presentation of Seminar paper (150 h)	
Module examinations		Lecture and Tutorials: Written exam (60 min) Seminar: Seminar Paper (60%), presentation (30%), active participation (10% of final mark)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Administration: Topics in Theory of Markets and Organizations I/II (Ph.D. – Level)</b>			<b>Study Points: 9-18</b>
Goals:  The courses cover recent developments in the theory of coordination within organizations and markets. The focus is on research methodology.			
Prerequisites to participate in the module: Solid background in microeconomics			
Course	Periods/Week	SP; work load	Topics
Lecture 1	4	9; Attendance (60 h) Reading paper(120 h) Preparation of presentations and examination (90 h)	Agency problems, incentive contracts, performance measurement, multitask agency relationship, asset ownership and job design, executive compensation, contests, bargaining theory and coalition formation, merger analysis
Lecture 2	4	9; Attendance (60 h) Reading paper(120 h) Preparation of presentations and examination (90 h)	Vertical structures, hierarchy und decision making in committees, bounded rationality, economic psychology and experiments.
Module examinations		Lecture 1: Written exam (90 min, 50 %), presentation (50 % of final mark) Lecture 2: Written exam (90 min, 50 %), presentation (50 % of final mark)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

Mandatory Elective Module Business Administration: Topics in Energy and Network Economics			Study Points: 6 - 15
<p>Goals:</p> <p>In many countries network based supply systems (electric power and gas) have seen a major structural change from heavily regulated, vertically integrated monopolies towards systems in which coordination over markets and competition play a larger role. We take these industries as an example to analyze market design and strategic behavior.</p> <p>Students should first take the lecture "network based energy systems". As an option they may complement the lecture with the seminar "energy systems" (presentations only) which is offered in parallel. In the following term, they can choose between one of the main seminars.</p>			
<p>Prerequisites to participate in the module: The module is for students who have a (MA-level) background in microeconomics, industrial organization, and game theory. The courses "analysis of competition" in combination with "microeconomics" provide the necessary background.</p>			
Course	Periods/Week	SP; work load	Topics
Lecture Network based energy systems	2	3; Attendance (25h) Literature study and preparation (50h) Exam preparation (15h)	Energy an overview, network based energy systems: gas & power, reform of the industry, restructuring and access rights, market design, gaming power markets, nodal pricing, zonal pricing, market coupling, strategic investment in international energy transport systems, energy security, investment and third party access, contracts and competition
Tutorial Network based energy systems	2	3; Attendance (25h) Literature study and preparation (50h) Exam preparation (15h)	Repetition, deepening and completion of topics from lecture.
Seminar A Energy Systems	2	3; Attendance (30h), Preparation (60h)	Each student makes several presentations on on different aspects of energy systems. The focus is on presentation skills.
Seminar B 'Gaming' and designing energy markets	2	6; Attendance (30h), Preparation (150 h)	Students make presentations and write a thesis paper either on a theoretical topic or on an empirical assessment related to strategic behaviour in energy markets, usually starting from one academic paper.
Seminar B Energy Policy	2	6; Attendance (30h), Preparation (150 h)	Students make presentations and write a thesis paper on a broader topic in energy policy.
Module examinations	Lecture + Tutorial: Written examination, 90 minutes Seminar A: Presentations (100%) Seminar B: Seminar Paper (60%), Presentation (30%), Discussion (10%)		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester		

<b>Mandatory Elective Module Business Administration: Real Estate Economics</b>		<b>Study Points: 6</b>	
<p>Goals: For most people buying or not buying a house is the single most important investment decision in their life. It is taken in an environment which is quite different from the "perfect market set up" which is often investigated in finance. Students shall learn how to address the particularities of real estate investments working with selected contributions from the theoretical and/or empirical literature.</p> <p>Students are expected to write a seminar paper, make a presentation, and participate in the discussion.</p>			
<p>Prerequisites to participate in the module: This seminar is for students who have a solid background in finance and econometrics and some basic knowledge in real estate economics. It covers a wide range of theoretical and empirical issues in real estate valuation, dynamics of real estate markets and institutional features.</p>			
Course	Periods/Week	SP; work load	Topics
Seminar "Real Estate Economics"	2	6; Attendance (30h), Preparation and Presentation of Seminar paper (150 h)	Selected topics e.g.: Real estate prices and price risk, transaction behaviour, real estate in portfolio, renting versus owning, mobility, real estate and the aggregate economy
Module examinations		Seminar: Seminar Paper (70%), Presentation (30% of final mark)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Business Administration: Analysis of Competition</b>		<b>Study Points: 6</b>	
<p>Goals:</p> <p>The course covers models and tools for the analysis of strategic interaction with competitors and 'complementors'. It is similar to a course in industrial economics, but topics are selected according to their relevance for the study of network based energy-systems (electric power and gas-industry).</p> <p>The course is designed for students in their first semester master studies. It prepares students for the modul: "Topics in Energy and Network Economics".</p>			
<p>Prerequisites to participate in the module: Previous exposure microeconomics and game theory is useful but not indispensable, as the basic notions of non-cooperative and cooperative game theory will be explained when needed.</p> <p>You should not take the course if you already have taken (master level) courses in microeconomics, game theory and industrial organization.</p>			
Course	Periods/Week	SP; work load	Topics
Lecture and Tutorial Analysis of Competition	4	6 Attendance (60 h), Preparation (120 h)	'Co-opetition' & PARTS, using market power, strategic interaction with competitors & complementors, market entry, commitment, vertical chains & networks, boundaries of the firm.
Module examinations		Lecture: Written examination, 60 minutes	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Information Economics</b>		<b>Study Points: 6</b>	
<u>Learning objectives:</u> The students know the effect of asymmetric information in economic markets. They know the crucial role of the information structure that underlies an economic market and apply these ideas and concepts to concrete economic problems.			
Preconditions: "Introduction to Advanced Microeconomic Analysis"			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Information Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Incomplete quality information (Lemons problem), Labour markets with asymmetric information (signaling, efficiency wages, equilibrium unemployment), Insurance markets with asymmetric information (screening), Credit markets with asymmetric information (rationing), Principal-Agent Problems
Exercise Information Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Exercises
Final exam	<u>60 hours</u> Written exams (90 min) and preparation	2 credits, pass Exam	
Duration	<input checked="" type="checkbox"/> 1 semester		<input type="checkbox"/> 2 semester
Start of module	<input type="checkbox"/> winter term		<input checked="" type="checkbox"/> summer term

<b>Mandatory Elective Module Economics: Decision-Making under Uncertainty</b>			<b>Study Points: 6</b>
<u>Learning objectives:</u>  The students are familiar with the most important models of economic decision-making under uncertainty. They analyze behavior under expected utility with known and unknown probabilities, under probability-weighting models and ambiguity preference.			
Preconditions: none			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Decision-Making under Uncertainty	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	- The general model of choice under uncertainty - Expected utility - Probability weighting - Prospect Theory, - Ambiguity preferences
Exercise Decision-Making under Uncertainty	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Exercises and applications
Final exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass Exam	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of module	<input type="checkbox"/> winter term <input checked="" type="checkbox"/> summer term		

<b>Mandatory Elective Module Economics: Empirical Labor Economics</b>		<b>Study Points: 6</b>	
<u>Learning objectives:</u>  This is an advanced course in the economic analysis of the labor market. It will deepen the students' understanding of what are the determinants of the observed structure of wages and employment. The introduction of topics will be on textbook level, but the focus will be on the discussion of empirical implementation strategies used in recent publications.			
Preconditions: Acquaintance of intermediate microeconomics, labor economics, and econometrics is highly recommended.			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Empirical Labor Economics I	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	This course provides an overview on the economic analysis of labor markets. The emphasis is on applied microeconomics and empirical analyses. Topics to be covered include: labor supply and demand, human capital, education and training, changes in the wages structure and inequality, biased technological change and returns to skills, organizational change and skill demand, the closing gender pay gap.
Lecture Empirical Labor Economics II	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation homework assignments	
Final exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass Exam	
Duration	<input checked="" type="checkbox"/> 1 semester		<input type="checkbox"/> 2 semester
Start of module	<input checked="" type="checkbox"/> winter term		<input type="checkbox"/> summer term

<b>Mandatory Elective Module Economics: Advanced Monetary Economics</b>			<b>Study Points: 6</b>
<u>Learning objectives:</u> The students are able to use dynamic stochastic general equilibrium models for positive and normative analysis.			
Preconditions: none			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Advanced Monetary Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	The lecture develops a stochastic dynamic general equilibrium model featuring monopolistic competition and sticky prices. Compared with the exposition in the course "Monetary Economics" more emphasis will be put on the technical aspects that one needs to understand in order to use this framework. We will also analyze some recent extensions of the baseline model that is at center stage in the course "Monetary Economics".
Exercise Advanced Monetary Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	The Exercise helps understand the material of the lecture in different ways. First, some additional derivations of theoretical and empirical results are provided. Second, applications of the theory are illustrated. Third, some aspects of the practical implementation of monetary policy are discussed.
Final exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass exam	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of module	<input checked="" type="checkbox"/> winter term <input checked="" type="checkbox"/> summer term		

<b>Mandatory Elective Module Economics: Advanced International Trade: Theory and Empirics</b>		<b>Study Points: 6</b>	
<u>Learning objectives:</u> The students are able to analyze the patterns of international trade, both in theory and empirics. Starting with the classic Ricardian and Heckscher-Ohlin trade models, students know the frontier of research including models such as Eaton and Kortum (2002), Melitz (2003) and Melitz & Ottaviano (2008).			
Preconditions: Basics in both micro and macro economics			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Advanced International Trade: Theory and Empirics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Ricardian trade model, Heckscher-Ohlin trade model, Eaton-Kortum trade model, Melitz-Ottaviano trade model, economic policy, economic history, economic geography
Exercise Advanced International Trade: Theory and Empirics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Discussion and empirical application of theoretical concepts from the lecture
Final exam	<u>60 hours</u> Written exam (90 min) or Paper summary (10 %), Presentation (20 %) and written exam (90 min, 70 %)	2 credits, pass	
Duration	<input checked="" type="checkbox"/> 1 semester		<input type="checkbox"/> 2 semester
Start of module	<input type="checkbox"/> winter term		<input checked="" type="checkbox"/> summer term

Mandatory Elective Module Economics: Competition Policy			Study Points: 6
<u>Learning objectives:</u> The students understand the structure of elementary models in industrial organization. They are able to discuss issues in competition policy with the help of such models and to develop simple models to address selected questions of competition policy.			
Preconditions: none			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Competition Policy	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Neoclassical welfare theory; normative results of static (SCP, dynamic price competition, vertical restraints) and dynamic (patent races, endogenous growth theory) industrial organization theory.
Exercise Competition Policy	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Practice of the theoretic analysis of policy question with the help of simple examples.
Final exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass Exam	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of module	<input type="checkbox"/> winter term <input checked="" type="checkbox"/> summer term		

Mandatory Elective Module Economics: Public Economics		Study Points: 6	
<p><u>Learning objectives:</u></p> <p>The students</p> <ul style="list-style-type: none"> <li>- know key theoretical concepts of public economics</li> <li>- can explain the key reasons for government intervention regarding the provision of public goods, externalities, social policy and the aims of these policies</li> <li>- can discuss important limitations of government intervention</li> <li>- know key results on taxation</li> <li>- can assess the implications of recent research regarding extensions and empirical relevance of key theoretical concepts of public economics</li> </ul>			
<p>Preconditions:</p> <ul style="list-style-type: none"> <li>- Introduction to Advanced Microeconomic Analysis or equivalent</li> <li>- Knowledge of elementary game theory</li> </ul>			
Teaching formats	Hours per week, workload in hours	Credits and preconditions for granting	Topics, contents
Lecture Public Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours presence in class, 35 hours preparation and learning	2 credits, participation	<ul style="list-style-type: none"> <li>- Foundations of government intervention</li> <li>- Public goods</li> <li>- Externalities</li> <li>- Social policy</li> <li>- Taxation</li> <li>- Recent research results</li> </ul>
Exercise Public Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours presence in class, 35 hours preparation and learning	2 credits, participation	<ul style="list-style-type: none"> <li>- Applied problems based on the lecture</li> <li>- Discussion of further literature</li> </ul>
Final exam	<u>60 hours</u> Exam Public Economics (90 min) and preparation	2 credits, pass Exam	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of Module	<input type="checkbox"/> winter term <input checked="" type="checkbox"/> summer term		

<b>Mandatory Elective Module Economics: Advanced Microeconomics</b>		<b>Study Points: 6</b>	
Goals:			
The lecture plus tutorial listed below are a mandatory course on advanced microeconomics. The course emphasizes a sample of topics ranging from the theory of competitive markets, to industrial organization, welfare economics, information, and incentives. The lectures are supplemented by problem solving exercises and in class presentations by participants.			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture Introduction to Advanced Micro-economic Analysis	2	3; Attendance (30 h) Reading the relevant literature (60 h)	General Equilibrium; Partial Equilibrium; Externalities; Imperfect Competition; Asymmetric Information; Behavioral Aspects
Tutorial Introduction to Advanced Micro-economic Analysis	2	3; Attendance (30 h) Solve exercises and preparations for presentations in class (30 h) Exam preparation (30 h)	Exercises and model application
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Theory of Incentives</b>		<b>Study Points: 6</b>	
Goals:			
<p>The course reviews the main topics and models of the incentive theory. It focuses on the principal-agent paradigm where the principal delegates an action to a single agent through the take-it-or-leave-it offer of a contract. Major topics are represented by the problem of adverse selection, which occurs when the agent learns some piece of information relevant to the contractual relationship, and the problem of moral hazard, which appears as soon as the agent's actions are not observable. First, the trade-offs that emerge in these contexts are characterized: the rent extraction-efficiency trade-off under adverse selection and the trade-offs between the extraction of limited liability rent and efficiency and also between insurance and efficiency under moral hazard. Then, extensions of the basic framework to more complex environments are discussed. Mixed models with adverse selection, moral hazard and nonverifiability of the state of the world are also treated. Principal-agent models with adverse selection and moral hazard are finally considered in a dynamic context.</p>			
Prerequisites to participate in the module: Basics in microeconomics "Introduction to Advanced Microeconomic Analysis" and "Game Theory"			
Course	Periods/ Week	SP; work load	Topics
Lecture + Tutorial Theory of Incentives	4	3; Attendance (60 h) Preparation (90 h) Exam preparation (30 h)	The Problem of Adverse Selection, Revelation Principle, Solution Techniques, Ex-Post vs. Ex-Ante Contracting, Limited Liability, The Problem of Moral Hazard, First-Order-Approach
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Game Theory</b>		<b>Study Points: 6</b>	
Goals:  The purpose of this course is to familiarize students with game-theoretic methods that are used in various fields of economics.			
Prerequisites to participate in the module: Module „Advanced Microeconomics“.			
Course	Periods/ Week	SP; work load	Topics
Lecture	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Normal-form games, extensive-form games, games with incomplete information, standard solution concepts and refinements
Tutorial	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Exercises
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

Mandatory Elective Module Economics: Topics in Microeconomics			Study Points: 6-18
Goals:			
This module gathers several seminars/lectures on selected topics in microeconomics. Lectures and seminars may be in English or German. Based on the basic knowledge acquired in "Advanced Microeconomics", this module shall enable students to study applications of microeconomic techniques and to analyze microeconomic problems in different fields of economics.			
Prerequisites to participate in the module: Module „Advanced Microeconomics“			
Course	Periods/Week	SP; work load	Topics
Lecture Advanced Microeconomic Analysis I (PhD)	4	6; Attendance (60 h) reading (60 h) homework assignments and exam preparation (60 h)	Preferences, decision under certainty, theory of household and firm, general equilibrium.
Lecture Advanced Microeconomic Analysis II (PhD)	4	6; Attendance (60 h) reading (60 h) homework assignments and exam preparation (60 h)	Decision under uncertainty, market power, strategic interaction, game theory, asymmetric information, incentives, mechanism design, contract theory.
Lecture Regulation in Product Markets	2	3; Attendance (30 h) reading (30 h) homework assignments and exam preparation (30 h)	Antitrust and Merger Regulation; Price and Monopoly Regulation; Environmental Regulation; Regulation in Vertical Markets
Seminar Behavioral Economics	2	6; Attendance (60 h) reading literature (60 h) writing and presenting a seminar paper (60 h)	Decision-making under risk and uncertainty, anticipatory utility and other variants of utility, biased expectations, experimental methods, empirical evidence
Seminar Microfinance	2	6; Attendance (30 h) Group assignment (120 h) Presentation (30 h)	Microcredit, Microfinance, Microinsurance, Financial Repression, Credit Rationing, Transaction Costs
Seminar The Theory of Regulation under Asymmetric Information	2	6; Attendance (30 h) reading literature, giving a presentation (75 h) writing a seminar paper (75 h)	Regulation, asymmetric information, monopoly, principal-agent problem.

Seminar Empirical Methods in Applied Micro-economics	2	6; Discussions (30 h) Presentation preparation (30 h) Seminar paper preparation (120 h)	Microeconometrics; Applied Microeconomics; Public Policy
Seminar Theory of Market Structure	2	6; Attendance (30 h) Reading literature (60 h) Writing and presenting a seminar paper (90 h)	Institutions; Rational Expectations; Equilibrium; Financial Market
Seminar Market Design	2	6; Attendance (30 h) Reading literature (25 h) Writing a seminar paper (90 h) Preparing a presentation (35 h)	Theory: Introduction to market design and mechanism design, auctions, two-sided matching; Applications: cap-and-trade, electricity markets, school choice, position auctions, kidney exchange
Seminar Advanced Experimental Economics	3	6; Attendance (45 h) Reading literature (60 h) Writing a seminar paper and preparing a presentation (75 h)	Economic experiments, social preferences, non-equilibrium beliefs, quantal response equilibrium, econometric estimation
Seminar The Economics of Identity and Ethnic Conflict	2	6; Attendance (30 h) Reading literature (60 h) Writing a seminar paper and preparing a presentation (90 h)	Theory: club goods, economics of identity, economics of fractionalization Empirics: measuring conflict and fractionalization, experimental evidence
Module examinations	Advanced Microeconomic Analysis I and Advanced Microeconomic Analysis II: Written exam (90 min) after each course Regulation in Product Markets: written exam (90 min) Decision-Making under Uncertainty: written exam (90 min) Seminar Microfinance: Group assignment paper (70 %), presentation (30 %) Seminar Behavioral Economics: Seminar paper (70 %), presentation (30 %) Seminar The Theory of Regulation under Asymmetric Information: Seminar paper, presentation Seminar Empirical Methods in Applied Microeconomics: Seminar paper (80 %), presentation (20 %) Seminar Theory of Market Structure: Seminar paper (80 %), presentation (20 %) Seminar Market Design: Seminar paper (70 %), presentation (30 %) Seminar Advanced Experimental Economics: Seminar paper (80 %), presentation (20 %) Seminar The Economics of Identity and Ethnic Conflict: Seminar paper (70 %), presentation (30 %)		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester		

<b>Advanced Microeconomic Theory I (PhD-level)</b>			<b>Credits: 6</b>
<u>Learning objectives:</u> The students understand fundamental microeconomic concepts and tools on a very advanced level.			
Preconditions: none			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Advanced Microeconomics Theory I (PhD- level)	<u>4 SWS</u> <u>60 hours</u> 50 hours Attendance 15 hours preparation	2 credits, participation	Theory of consumption and production, optimal decision under uncertainty, general equilibrium, matching, introduction to game theory
Exercise Advanced Microeconomics Theory I (PhD- level)	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours preparation of exercises	2 credits, participation	Exercises
Final exam	<u>60 hours</u> Written exam (180 min) and preparation	2 credits, pass Exam	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of module	<input checked="" type="checkbox"/> winter term <input type="checkbox"/> summer term		

<b>Mandatory Elective Module Economics: Advanced Microeconomic Theory II (PhD-level)</b>			<b>Credits: 6</b>
<u>Learning objectives:</u> The students understand fundamental microeconomic concepts and tools on a very advanced level.			
Preconditions: none			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Advanced Microeconomic Analysis II (PhD-level) I	<u>4 SWS</u> <u>60 hours</u> 45 hours Attendance 15 hours Literature study and preparation	2 credits, participation	Decision under uncertainty, market power, strategic interaction, game theory, asymmetric information, incentives, mechanism design, contract theory.
Lecture Advanced Microeconomic Analysis II (PhD-level) II	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Exercises
Final exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass

<b>Mandatory Elective Module Economics: Introduction to Advanced Macroeconomic Analysis</b>			<b>Study Points: 6</b>
<p>Goals:</p> <p>Introduction to Advanced Macroeconomic Analysis (IAMA)  In this class, the students will learn the key tools for analyzing a variety of economic models and their policy implications. In particular, the students will learn</p> <ul style="list-style-type: none"> <li>- tools of intertemporal optimization: Euler equations, dynamic programming</li> <li>- econometric tools for analyzing economic data and their practical application, using software such as EViews.</li> </ul> <p>These tools will be applied to a variety of specific models and data sets in order to introduce the students into advanced macroeconomic analysis.</p>			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Key tools for macro- economic analysis and basic applications.
Tutorial	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Exercises and literature review
Module examinations		Written exam (60 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Labour Markets and Social Policy</b>		<b>Study Points: 6-12</b>	
<p>Goals:</p> <p>Lecture/Tutorial I The theoretical functioning of labour markets and labour market interventions are of key concern to practical policymaking. A number of relevant issues will be examined in this class. Examples include: What determines the demand for and supply of different types of labour in modern economies? How is labour compensated, and which factors determine the level of wages? How does search and matching in the labour market work, and how can this matching process be influenced by policy e.g. regarding unemployment benefits or certain labour market regulation?</p> <p>Lecture/Tutorial II This lecture examines social policies as well as their economic foundations. Examples of topics covered are: What are the effects of various intergenerational schemes for financing pension systems? Which ones work best and why? What are the consequences of welfare reform? How can one analyze the macroeconomic consequences of reforms of the health sector, the education sector or other sectors which are largely dominated by public policy? How can a society provide insurance against labour market risk? Is there an optimal unemployment insurance scheme?</p> <p>Lecture/Tutorial III The empirical analysis of labour markets is applied to labour supply and demand, human capital, education and training, changes in the wages structure and inequality, biased technological change and returns to skills, organizational change and skill demand, the closing gender gap. The introduction of topics will be on textbook level, but the main focus will be on the discussion of empirical implementation strategies used in recent publications. Exercises will be held in the computer lab and students will learn to work with Stata.</p> <p>Lecture IV Economics is an empirical science. The validity of the competing economic theories and therefore the legitimacy of the application of economic theories to economic policy is an empirical question. This course has two goals. First, it covers basic methods and techniques of the empirical analysis in economics. Second, the students become familiar with the typical line of argumentation in the empirical analysis of current problems in economics. As an integral part of the course applications are implemented in the PC-Pool based on the software package Stata.</p> <p>Seminar The seminar aims at preparing students to present and discuss critically empirical research in all areas of labour economics. It may likewise be viewed as a preparation for an empirical diploma, master or doctoral thesis. Students are free to choose a topic themselves or to work on a topic proposed by the instructor. The topic is expected to be in the field labour economics. Participants are expected to discuss the relevant literature, data sources, methodology, to acquaint themselves with the necessary institutional details and to present and discuss their work.</p>			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture I	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Lectures on Labour Markets and Social Policy
Tutorial I	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Exercises, Discussions, Literature Review
Lecture II	2	3;	Lectures on Labour Markets and Social

		Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Policy
Tutorial II	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Exercises, Discussions, Literature Review
Lecture III	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Lectures on Labour Markets and Social Policy
Tutorial III	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Exercises, Discussions, Literature Review
Lecture IV	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Lectures and integrated tutorial using Stata
Seminar	2	6; Discussions (45h) Presentation (45h) Seminar paper (90 h)	Discussions, Presentation, Writing of seminar paper
Module examinations		Lecture/Tutorial: Written exam (90 min) for each course Seminar: Seminar paper	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester <u>or</u>	

Mandatory Elective Module Economics: Advanced Labor Economics		Study Points: 6	
<p><u>Learning Objectives:</u></p> <p>Students gain a command of central theoretical frameworks for thinking about how labor markets function and how they deviate from the standard competitive paradigm. They are able to apply labor economics to practical labor market contexts and understand the possibilities and limitations which can arise in the empirical verification of labor market theory using data.</p>			
<p>Preconditions: module "Introduction to Advanced Microeconomic Analysis" or "Advanced Microeconomics Theory I (PhD-level)" and module "Introduction to Advanced Macroeconomics Analysis" or "Advanced Macroeconomic Analysis I (PhD-level)"</p>			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Advanced Labor Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Theoretical model of labor markets, their applications and empirical implementation; survey of literature
Exercise Advanced Labor Economics	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	Review of models and exercises
Final exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of module	<input type="checkbox"/> winter term <input checked="" type="checkbox"/> summer term		

<b>Mandatory Elective Module Economics: Current Issues in Macroeconomics</b>		<b>Study Points: 6</b>	
Goals: This class provides an in-depth examination of current issues in macroeconomics.			
Prerequisites to participate in the module: Module "Introduction to Advanced Macroeconomics" and Module "Advanced Monetary Economics" or "Labour Markets and Social Policy"			
Course	Periods/ Week	SP; work load	Topics
Lecture	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Lectures on current issues in macroeconomics
Tutorial	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Exercises, Literature Review, Discussions
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Topics in Macroeconomics</b>		<b>Study Points: 6</b>	
Goals:			
This seminar aims to carry out projects on selected topics in macroeconomics.			
Prerequisites to participate in the module: Module "Introduction to Advanced Macroeconomics" or "Monetary and Fiscal Policy" or "Labour Markets and Social Policy"			
Course	Periods/ Week	SP; work load	Topics
Seminar	2	6; Attendance (30 h) Preparation for seminar and presentation (60 h) Seminar Project (90 h)	Topics in macroeconomics
Module examinations		Seminar Paper	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Advanced Macroeconomic Analysis I (PhD-level)</b>			<b>Study Points: 6</b>
<p>Goals:</p> <p>In this current research on dynamic economic models will be examined in detail to prepare students for doing research in macroeconomics and related fields. Depending on the approach examined, particular emphasis may be given to the theoretical or to the empirical aspects of the analysis. Examples are</p> <ul style="list-style-type: none"> <li>• Modern variants of the neoclassical growth model</li> <li>• Modern dynamic business cycle theories.</li> <li>• dynamic models of matching on labor markets</li> <li>• models of intergenerational trade (overlapping generations models)</li> <li>• models of intertemporal choice</li> <li>• facts and models of long run growth</li> <li>• dynamic models of international trade</li> <li>• econometric dynamic multivariate models regarding the interaction of major economic time series. The empirics of shocks driving the economy.</li> <li>• econometric panel approaches regarding the functioning and the dynamics of labor markets</li> <li>• numerical solution methods for linearized and non-linearized models.</li> <li>• Models pertaining to asset markets and to the role of money.</li> <li>• models of asset markets resulting from the intertemporal portfolio allocation problem</li> <li>• models of money.</li> <li>• The econometric evidence regarding the role of money and the role of monetary policy shocks.</li> <li>• Models of the interplay between monetary and fiscal policy.</li> <li>• Models of international exchange on goods and asset markets.</li> </ul>			
Prerequisites to participate in the module: none			
Course	Periods/ Week	SP; work load	Topics
Lecture	2	3; Attendance (30 h), Preparation (30 h), Exam preparation (30 h)	Lectures on Advanced Economic Dynamics
Tutorial	2	3; Attendance (30 h), Preparation of exercises (30 h), Exam preparation (30 h)	Exercises
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Advanced Macroeconomic Analysis II (PhD-level)</b>		<b>Study Points: 6</b>	
<p>Goals:</p> <p>This is the second term of a two-term "first-year" sequence in macroeconomics, intended for master and doctoral students with a strong interest in academic research. It requires a solid background in mathematics. Strong emphasis will be placed on acquiring the key tools for advanced macroeconomic analysis suitable for pursuing PhD-level research. The following topics will be taught:</p> <p>A2: Asset pricing; advanced preference theory such as Epstein-Zin; dynamic contracts and applications; growth models, OLG models;</p> <p>B2: Money and models of price and wage rigidities; economic policy and time consistency, applied VAR analysis.</p> <p>This will be complemented by deepening the knowledge regarding mathematical and econometric tools, such as MATLAB and/or EViews.</p>			
<p>Prerequisites to participate in the module: Advanced Macroeconomic Analysis (Ph.D.). If approved by lecturer Introduction to Advanced Macroeconomic Analysis may also be accepted.</p>			
Course	Periods/ Week	SP; work load	Topics
Lecture	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Key tools for macroeconomic analysis, advanced study of topics A2 and B2.
Tutorial	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	In-depth review, literature review and exercises
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Current Research in Macroeconomics</b>		<b>Study Points: 6</b>	
Goals: This seminar aims to teach students to carry out projects at the current research frontier in macroeconomics.			
Prerequisites to participate in the module: Module „Foundations of Advanced Macroeconomics“			
Course	Periods/ Week	SP; work load	Topics
Seminar	2	6; Attendance (60 h) Preparation (60 h) Seminar Research Project (60 h)	Carrying out research projects in macroeconomics
Module examinations		Research Paper	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

Mandatory Elective Module Economics: Economic History			Study Points: 6-18
Goals:			
Economic history stresses the long-term perspective and the role of historical case studies for economic decision making. It offers new insights and allows the students to apply their knowledge of economic theory and empirical methods. The aim of the lectures is to give an overview over the economic history of the world, in particular of Europe and Germany. The seminars introduce the students to modern research in economic history. The discussion of recent publications enables students to devise own research questions and research designs for their master's thesis.			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture/ Tutorial  European Economic History I	4	6; Attendance (60 h) Preparation (60 h) Exam preparation (60 h)	European Economic History 1800 - 1914
Lecture/ Tutorial  European Economic History II	4	6; Attendance (60 h) Preparation (60 h) Exam preparation (60 h)	European Economic History 1914 – up to now
Seminar	2	6; Attendance (30 h) Preparation (60 h) Presentation (30 h) Seminar paper (60 h)	The seminars cover key topics in European economic history, ranging from methods of modern research in economic history, over economic crises to long-run economic developments, and specific historical case-studies.
Seminar Data Management and Empirical Economics	2	6; Attendance (30 h) Preparation (60 h) Presentation (30 h) Seminar Paper (60 h)	This research seminar deals with information systems used in Economic history, such as statistical software, database management systems and geographical information systems.
Module examinations	Lectures: Written exam (90 min) Seminars: Seminar paper (70%), presentation (30%) of final mark		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester		

<b>Mandatory Elective Module Economics: Spatial Economics</b>		<b>Study Points: 6</b>	
<p>Goals:  The students will be introduced to the vast literature on Spatial Economics. The course starts with ideas developed by Von Thünen and Krugman leading to modern theories on the interaction between economics and geography. We will introduce models and empirics for topics such as international specialization, the clustering of industries, the spatial pattern of economic growth, and the relationship between core and periphery within economic regions.</p>			
Prerequisites to participate in the module: Basics in both micro and macro economics			
Course	Periods/ Week	SP; work load	Topics
Seminar Spatial Economics	2	6; Attendance (60 h) Presentation (30 h) Seminar paper (90 h)	Core and Periphery, Increasing returns to scale, Transport costs, Law of one price, Clustering, Specialization
Module examinations		Seminar: Seminar paper (70%), Presentation (30%)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester	<input type="checkbox"/> 2 Semesters
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u>	<input type="checkbox"/> Spring Semester

Mandatory Elective Module Economics: Advanced Topics in Public Economics			Study Points: 6-15
Goals:			
To learn about advanced topics of Public Economics in the cutting point of government and markets			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture/ Seminar  Elemente der Finanz- wissenschaft I (German)	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) <b>or</b> Attendance (30 h) Exam paper (30 h) Preparation of presentation (60h)	Various aspects of Public Economics
Lecture/ Seminar  Elemente der Finanz- wissenschaft II (German)	4	6; Attendance (60 h) Preparation (60 h) Exam preparation (60 h) <b>or</b> Attendance (60 h) Exam paper (60 h) Preparation of presentation (60h)	Various aspects of Public Economics
Lecture  Theory of Taxation	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Tax incidence Tax shift Optimal taxation Public Enterprise Pricing
Lecture  Theory of Social Choice	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Collective decisions, Impossibility theorems, Distributive justice, Bargaining
Lecture  Welfare Theory	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Welfare Theory, Foundations of Cost Benefit Analysis
Lecture  Theory of Social Policy	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Public expenditures, justice and efficiency, public insurance (e.g. health and unemployment insurance) and redistribution.
Lecture  Environment al and Resource Economics	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Pollution, Renewable Resources, Exhaustible Resources, Environmental Policy
Lecture  Environment al Economic Policy	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	Environmental Economic Policy

Lecture The theory of optimal extraction of natural resources	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	The course is an introduction to the theory of the optimal extraction of natural resources.
Lecture Development Economics	2	3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h)	The course is an introduction to the principles of Development Economics
Seminar Ökonomie und Sprache (German)	2	6; Attendance (30 h) Exam paper and presentation (90 h) Exam preparation (60 h)	Schnittstelle zwischen Ökonomie und Sprache, Soziolinguistik, Ökonomie der Sprache
Seminar Environmental and Resource Economics	2	3; Attendance(30 h) Seminar paper (30 h) Preparation of presentation (30h)	Pollution, Renewable Resources, Exhaustible Resources, Environmental Policy
Seminar Empirical Distribution Analysis	4	6; Attendance (60 h) Seminar paper (60 h) Preparation of presentation (60h)	This course aims at introducing empirical methods of distributional analysis.
Seminar Development Economics	4	6; Attendance(60 h) Preparation of presentation (30h) Case Study (90 h)	Development Economics; influence of trade, distribution, institutions, factor mobility on development; policy analysis
Seminar Selected Topics in Development Economics	2	3; Attendance (30 h) Preparation of presentation I (10 h) Seminar paper (30 h) Preparation of presentation II (20 h)	Individual research papers based on background knowledge in development economics
Module examinations		Lecture: Written exam (90 min, 67%) homework (if requested 33%) Seminar: Seminar paper (33-67%), presentation (33%), written exam/case study (if requested 33%) Seminar Development Economics: Presentation (if requested, 25%), case study (75-100%)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input checked="" type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

Mandatory Elective Module Economics: Social Preferences		Study Points: 6	
<u>Lern- und Qualifikationsziele:</u> The students - know key experimental evidence on social preferences - can apply the most important models of social preferences to explain key experimental results and know their limitations - can contribute to the debate about the relevance of laboratory experiments on social preference - are able to explain the relevance of social preferences for economic theory and have an understanding how economic models can be extended to incorporate social preferences			
Preconditions: - Introduction to Advanced Microeconomic Analysis or equivalent - Knowledge of elementary game theory - Knowledge of statistical analysis will make it easier to follow the data analysis in the experimental papers and thus enable a more critical view, but is not strictly necessary			
Teaching formats	Hours per week, workload in hours	Credits and preconditions for granting	Topics, contents
Lecture Social Preferences – Theories and Evidence	<u>2 SWS</u> <u>60 hours</u> 25 hours presence in class, 35 hours preparation and learning	3 credits, participation	- Experimental evidence of social preference - Models of social preferences and their applications - Testing models of social preferences - Multiplicity of fairness norms and heterogeneity of social preferences - Relevance and generalizability of laboratory experiments on social preferences - Applications to economic theory
Tutorial Social Preferences – Theories and Evidence	<u>2 SWS</u> <u>60 hours</u> 25 hours presence in class, 35 hours preparation and learning	2 credits, participation	- Discussions of further literature, examples, and applications of the topics from the lecture
Final exam	<u>60 hours</u> Exam Social Preferences – Theories and Evidence (90 min) and preparation	1 credits, Exam Social Preferences – Theories and Evidence, pass	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of Module	<input checked="" type="checkbox"/> winter term <input type="checkbox"/> summer term		

<b>Mandatory Elective Module Economics: Selected Topics in Competition Policy</b>		<b>Study Points: 6</b>	
Goals:			
<p>The participants get to know selected parts of the theory of industrial organization with a special emphasis on their implications for the European competition law. They learn to use formal results in a discussion of controversial political issues. To prepare for this the lecture introduces fundamental theoretical concepts and their application as well as the relevant parts of the competition law. This lecture is concentrated on the first part of the term. In the second part of the term the students demonstrate in their seminar presentations that they understand this method of economic analysis.</p>			
Prerequisites to participate in the module: Module „Applied Microeconomics“			
Course	Periods/Week	SP; work load	Topics
Lecture	1	1,5; Attendance (15 h) Preparation (10 h) exam preparation (20 h)	One of the topics: cartel prohibition, abuse control, and merger control in the European or German Competition law
Seminar	2	4,5; Attendance (30 h) Seminar paper and presentation (105 h)	Discussion of selected problems of competition policy, case studies, modelling issues and/or changes of the law
Module examinations		Lecture: Written exam (60 min); Seminar: Paper (80 %), presentation (20 %)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

Mandatory Elective Module Economics: Topics in Industrial Organization		Study Points: 6-12	
Goals:			
<p>In each lecture or seminar the participants study one aspect of industrial organization. In empirical industrial organization they are introduced to theory-based empirical model building in core areas of industrial economics and learn how to implement empirical studies using micro-econometric methods and real-market data. In "Cartel law" they are introduced to the European and German antitrust legislation from an economic point of view. In the seminar "actual problems of economic policy" the participants analyze selected topics discussed in the popular press which are related to the insights from one of these lectures, while the seminar "Applied Industrial Organization" discusses various issues in the field of industrial organization. In this module it is also possible to get credit for courses from the module "topics in microeconomics" or from further courses in the field of industrial organisation which the candidate passed in other universities.</p>			
Prerequisites to participate in the module: Module „Applied Microeconomics“			
Course	Periods/ Week	SP; work load	Topics
Lecture Empirical Industrial Organization	2	3; Attendance (30 h) Preparation (20 h) Exam preparation (40 h)	Structural approach in industrial economics; analyses of firm behaviour in dynamic markets.
Tutorial Empirical Industrial Organization	2	3; Attendance (30 h) Preparation (20 h) Exam preparation (40 h)	Empirical model building and micro-econometric methods; computer implementation using real-market data.
Lecture Cartel Law for Economists	2	3; Attendance (30 h) Preparation (20 h) Exam preparation (40 h)	European and German cartel law from an economic perspective. (So far this lecture has always been taught in German.)
Seminar „Aktuelle Probleme der Wirtschaftspolitik – Thema Umwelt“ (German)	2 + field trip	6; Seminarteilnahme (30 h), Anfertigung und Präsentation von Seminararbeit (60 h) Exkursion (60 h + 30 h Vor- und Nachbereitung)	Diskussion von ausgewählten Themen aus dem Bereich Umweltökonomik und -politik.
Seminar Applied Industrial Organization	2	3; Attendance of seminar (30 h) Seminar paper and presentation (60 h)	Discussion of selected problems of industrial organisation, case studies, experimental evidence, modelling issues and/or changes of the institutional environment.
Module examinations		Lectures: Examination (60 min, 90 min if exercises and lecture are examined); Seminar: Seminar paper and presentation	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module Economics: Datengrundlagen der Wirtschaftspolitik (DGWP)</b>		<b>Study Points: 6</b>	
<p>Goals:</p> <p>The seminar will be held in German.</p> <p>Im Vordergrund des Gesamtkonzeptes stehen</p> <ul style="list-style-type: none"> <li>- das Wecken des Interesses der Studierenden für statistische Fragestellungen und Probleme in Politik und Wirtschaft,</li> <li>- die Vermittlung der Arbeitsweise der amtlichen und nichtamtlichen Datenproduzenten auf nationaler, europäischer und internationaler Ebene,</li> <li>- die Qualität und Aussagefähigkeit ökonomischer Daten,</li> <li>- der kompetente und verantwortungsvolle Umgang mit verfügbarem Datenmaterial aus amtlichen, nichtamtlichen und medialen Datenquellen</li> <li>- eigenständige Datenrecherchen,</li> <li>- selbständige wissenschaftliche Arbeit mit amtlichen und nichtamtlichen Originaldaten unter Einbeziehung statistischer Methoden zur Bereitstellung von Informations- und Entscheidungsgrundlagen,</li> <li>- Hinweise zum Einsatz moderner Computerprogramme.</li> </ul>			
Prerequisites to participate in the module: Module „Statistics“			
Course	Periods/ Week	SP; work load	Topics
Seminar DGWP	3	6; Attendance (45h) Preparation and presentation (65h) Seminar paper (70h)	Bevölkerungsstatistik, Arbeitsmarktstatistik, Produktionsstatistik, Konjunkturtests, Verbraucherpreisstatistik (Messung der Teuerung), Expertenvorträge und Ko-Referate zu Themen des Seminars, Problemdiskussionen
Module examinations		Seminar paper (70 %), presentation (30 %)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

Mandatory Elective Module Economics: Trust and Reputation		Study Points: 6	
<u>Learning objectives:</u> The students are familiar with the most important microeconomic analyses of trust and reputation, including recent developments in the literature.			
Preconditions: Module "Introduction to Advanced Microeconomic Analysis" or "Game Theory" [or equivalent].			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Seminar Trust and Reputation I	<u>1 SWS</u> <u>45 hours</u> 15 hours Attendance 30 hours Literature study and preparation	1,5 credits, participation	Theories of economic behavior under asymmetric information with a focus on the roles of and mechanisms behind trust and reputation. Empirical applications thereof.
Seminar Trust and Reputation II	<u>1 SWS</u> <u>45 hours</u> 15 hours Attendance 30 hours Literature study and preparation	1,5 credits, participation presentation ( 25 min)	Exercise
Final exam	<u>90 hours</u> Seminar paper (30,000 ZoL) and preparation	3 credits, pass	
Duration	<input checked="" type="checkbox"/> 1 semester		<input type="checkbox"/> 2 semester
Start of module	<input type="checkbox"/> winter term		<input checked="" type="checkbox"/> summer term

Mandatory Elective Module Economics: Voting Behavior		Study Points: 6	
<u>Learning objectives:</u>  The students: <ul style="list-style-type: none"> <li>- know key theoretical results on voting behavior</li> <li>- can argue how voting outcomes depend on modeling assumptions, voting procedures and voters' preferences</li> <li>- are able to explain how well theoretical predictions on voting are confirmed in experimental studies and what this implies for applications of different voting procedures</li> </ul>			
Preconditions: Module "Introduction to Advanced Microeconomic Analysis" [or equivalent].			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Seminar Voting Behavior I	<u>1 SWS</u> <u>45 hours</u> 15 hours Attendance 30 hours Literature study and preparation	1,5 credits, participation,	Theories of voting behavior.
Seminar Voting Behavior II	<u>1 SWS</u> <u>45 hours</u> 15 hours Attendance 30 hours Literature study and preparation	1,5 credits, participation, assignment: presentation (45 min)	Experimental studies on voting behavior.
Final exam	<u>90 hours</u> Seminar paper (50,000 ZoL) and preparation	3 credits, pass	
Duration	<input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester		
Start of module	<input checked="" type="checkbox"/> winter term <input type="checkbox"/> summer term		

<b>Mandatory Elective Module Economics: Emerging Markets</b>		<b>Study Points: 6</b>	
<u>Learning objectives:</u> The students are able to characterize the specific role of emerging economies in the world economy. They know about stylized processes of (financial) development, about mechanisms of financial crises, the foundation and policy issues of microfinance, and the impact of individual characteristics on behavior.			
Preconditions: basic knowledge in monetary, financial and international economics			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation  assignment (about 20,000 characters)	Principles of emerging economies Financial sector development Financial crisis Microfinance Risk attitude and financial literacy
Seminar	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation  term paper (30,000 ZoL) and preparation	Selected topics of emerging markets
Final exam	<u>60 hours</u> Multimedia exam (30 min) and preparation	2 credits, pass	
Duration	<input checked="" type="checkbox"/> 1 semester		<input type="checkbox"/> 2 semester
Start of module	<input checked="" type="checkbox"/> winter term		<input type="checkbox"/> summer term

<b>Mandatory Elective Module Economics: Network based energy systems</b>		<b>Study points: 6</b>	
<u>Learning objectives:</u>			
The students can use insights from optimization theory and game theory to understand issues in network based energy systems.			
Preconditions: a good background in microeconomics, industrial organization and game theory			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture	<u>2 SWS</u> <u>75 hours</u> 25 hours Attendance 50 hours Literature study and preparation		Energy an overview, network based energy systems: gas & power, reform of the industry, restructuring and access rights, market design, gaming power markets, nodal pricing, zonal pricing, market coupling, strategic investment in international energy transport systems, energy security, investment and third party access, contracts and competition
Tutorial	<u>2 SWS</u> <u>75 hours</u> 25 hours Attendance 50 hours Literature study and preparation		Repetition, deepening and completion of topics from lecture.
Final exam	<u>30 hours</u> Written exam (90 minutes) and preparation	6 credits, pass Exam	
Duration	1 semester		
Start of module	<input type="checkbox"/> winter term		<input checked="" type="checkbox"/> summer term

<b>Mandatory Elective Module Economics: Economic Growth</b>		<b>Study Points: 6</b>	
<u>Learning Objectives:</u> The students are able to understand and apply exogenous and endogenous economic growth models for further research analysis.			
Preconditions: none			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Economic Growth	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	The lecture covers the first attempts of growth models, advanced exogenous models and introduces different types of endogenous models.
Exercise Economic Growth	<u>2 SWS</u> <u>60 hours</u> 25 hours Attendance 35 hours Literature study and preparation	2 credits, participation	The problem sets are additional mathematical examples to give students a better understanding of the lecture.
Final Exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass exam	
Duration	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester		
Start of module	<input type="checkbox"/> winter term <input checked="" type="checkbox"/> summer term		

Mandatory Elective Module QM: Multivariate Statistical Analysis			Study Points: 6-9
Goals:			
Data records which are to be analysed by means of statistics often consist of many variables. While the connections between two variables are easily accessible, a group of several variables is not easily examinable in its structure. "Multivariate statistics" imparts procedures which allow an analysis of high-dimensional data records. The course aims to introduce the basic concepts of statistical programming languages as R or Matlab and its application.			
Prerequisites to participate in the module: Knowledge of basis statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis.			
Course	Periods/Week	SP; work load	Topics
Lecture Multivariate Statistical Analysis I (MVA1)	4	6; Attendance (60 h) Self-study (60 h) Exam preparation (60 h)	MVA1: Graphical display of multidimensional data, Repetition: matrix algebra, linear model, correlation, Multivariate random variables, Multinormal distribution, Maximum likelihood theory, Principal components, Discriminant Analysis, Cluster Analysis.
Lecture Statistical programming languages (XIC)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Data Analysis and programming statistical algorithms in the programming languages R or Matlab
Module examinations	MVA1: written exam (120 min) or working paper and eventually presentation or homework XIC: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester		

Mandatory Elective Module QM: Advanced Statistics			Study Points: 6-15
<p>Goals:</p> <p>The courses and lectures will give the students a thorough insight into theoretical aspects as well as practical aspects of advanced statistical methods (R, Matlab and/or SPSS). The lectures cover different aspects in statistics:</p> <ul style="list-style-type: none"> <li>- The course Statistical Programming Languages aims to introduce the basic concepts of statistical programming languages as R or Matlab and its application.</li> <li>- The course Non- and Semiparametric Modelling gives an overview over the flexible regression methods.</li> <li>- The lecture Multivariate Statistical Analysis 2 further develops methods presented in the first part of the lecture and deals with problems which arise in the analysis of real world data as well as some advanced methods. In the tutorial the students apply the methods to multivariate data with statistical software.</li> <li>- The lecture Selected Topics in Banking and Insurance deals with specific topics connected either with Banking (e.g. the issues of assessment of the quality of a credit to its risk of defaults) or Insurance (e.g. with claim size distributions, ruin problems, heavy tailed risks, premium, principles and risk measures and loss reserving in insurance).</li> <li>- The seminar Numerical Introductory Course treats problems which arise in the implementation of statistical methods, e.g. Optimization.</li> <li>- In the seminar What is statistics? – From the historical perspective historical aspects of the development of statistics will be treated.</li> <li>- The lectures Data analysis I and II focus on practical steps in data analysis with SPSS and R. We cover various topics in uni-, bi- and multivariate descriptive statistics, tests and regression methods.</li> <li>- The lecture Statistics of High-Dimensional Time Series provides an overview of statistical methods used for the analysis of high-dimensional time series.</li> </ul>			
Prerequisites to participate in the module: Knowledge of basis statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis and the module „Multivariate Statistical Analysis“			
Course	Periods/ Week	SP; work load	Topics
Lecture Statistical programming languages (XIC)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Data Analysis and programming statistical algorithms in the programming languages R or Matlab
Lecture Non- and Semiparametric Modelling (NPM)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	NPM: Histogram, Nonparametric Density Estimation, Nonparametric Regression, Additive Models, Linear Models, Generalized Linear Models, Additive Models, Single-Index Models, Generalized Partial Linear Models, Generalized Additive Models
Lecture Multivariate Statistical Analysis II (MVA2)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	MVA2: decomposition of data matrices by factors, Factor analysis, Multidimensional scaling, Canonical correlations, Correspondence analysis, Projection pursuit, Conjoint measurement analysis, SIR
Lecture Selected Topics in Banking and Insurance (SCR)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	SCR: Selected Topics either in Banking, e.g. Credit rating, or Insurance. For details see the commented schedule of lectures.
Seminar Numerical	2	3; Attendance (30 h) Self-study (30 h)	NIC: Numerical Linear Algebra, Curve Fitting, Optimization, Random Number Generation, Numerical Solutions of

Introductory Course (NIC)		Exam preparation (30 h)	Stochastic Differential Equations
Seminar What is statistics? – From the historical perspective (HIST)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	HIST: In the seminar we will investigate elements of the history of statistics, mathematical statistics as well as economical statistics, from the 17th/18th century until the present time.
Seminar Privatissimum Statistik (PRI)	2	3; Attendance (30 h) Preparation of presentation (10 h) Seminar paper (50 h)	PRI: The seminar is a preparation for master thesis.
Vorlesung Datenanalyse I	2	3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h)	DAT1: Wdh. Statistik I&II, Fragebogenkonstruktion, Datenbereinigung, Ausreißer, Fehlende Werte, Univariate und Bivariate Statistik (Grafiken, Kennzahlen und Tests)
Übung Datenanalyse I (UE DAT1)	2	3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h)	UE DAT1: In der Übung werden praktische Aufgaben zum Vorlesungsstoff mit SPSS und/oder R gelöst.
Vorlesung Datenanalyse II	2	3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h)	DAT2: Multivariate Statistik, Lineare Regression, Nicht- und semiparametrische Regression, Item-Response-Modelle, Strukturgleichungsmodelle.
Übung Datenanalyse II (UE DAT2)	2	3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h)	UE DAT2: In der Übung werden praktische Aufgaben zum Vorlesungsstoff mit SPSS und/oder R gelöst.
Seminar Datenanalyse (DAT) (German)	2	3; Attendance (30 h) Preparation of presentation (10 h) Seminar paper (50 h)	DAT: Das Seminar richtet sich an Studierende, die einen konkreten Datensatz mittels statistischer Methoden (z.B. im Rahmen von Projekt- oder Abschlussarbeiten) analysieren wollen.
Lecture Statistics of High-Dimensional Time Series (STS)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Topics include: the dynamic semiparametric factor model, statistics of multivariate time series models, non-parametric and flexible time series estimation, variable selection and empirical pricing kernel estimation.
Module examinations		XIC, NPM, MVA2/UE MVA2, SCR, DAT1, DAT2, STS: Oral exam (30 min) or written exam (90 min) working paper and eventually presentation or homework NIC, HIST, PRI, DAT: Working paper (80%) and presentation (20%)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u>	

Mandatory Elective Module QM: Statistics and Finance			Study Points: 6-15
<p>Goals:</p> <p>The course "Statistics of Financial Markets 1" starts with an introduction into the basic concepts of option pricing and its probabilistic foundations. Next, stochastic processes in discrete time are presented and the Wiener process is introduced. Ito's Lemma is derived and the Black-Scholes (BS) Option model is presented leading to the analytic solution for the BS Option price. Numerical solutions via binomial or trinomial tree constructions are discussed in detail. As a part of the course, an obligatory trip to an European financial institution will be organized.</p> <p>The course "Statistics of Financial Markets 2" starts with an introduction into the basic concepts of time series and its application. The course gives an overview over risk management models and reviews the current value at Risk (VaR) methodology.</p> <p>The course "Selected topics of mathematical statistics" covers a part of mathematical statistics which deals with the limiting behavior of different sample statistics, <math>U</math>-statistics, <math>M</math>-, <math>L</math>- and <math>R</math>-Estimates. It is laying a bridge between the probability theory and the mathematical statistics by manipulating with "probability" theorems to obtain "statistical" theorems.</p> <p>The Seminar "Mathematical Statistics" allows for the presentation of research results from the discipline of mathematical statistics. The Seminar "Economic Risk" allows for the presentation of research results from the discipline of Quantitative Finance.</p> <p>The lecture "Statistical Tools for Finance and Insurance" introduces modern statistical tools as applied to finance and insurance. Each part of the lecture contains content with a high focus on practical applications. The course entitled "Advanced Methods in Quantitative Finance" covers material that is beyond the scope of the course "Statistics of Financial Markets".</p>			
Prerequisites to participate in the module: Knowledge of basis statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis.			
Course	Periods/ Week	SP; work load	Topics
Lecture Statistics of Financial Markets I (SFM1)	4	6; Attendance (60 h) Self-study (60 h) Exam preparation (60 h)	SFM1: Financial derivative, Option management, Basic concepts of probability theory, Stochastic processes in discrete time, Stochastic Integrals and differential equations, Black-Scholes option pricing model, Binomial model for European options and American options, Exotic options and interest rate derivatives
Lecture Statistics of Financial Markets II (SFM2)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	SFM2: Basic concepts of statistical models, ARIMA model, Time series of stochastic Volatility, Nonparametric model on financial time series, Value at risk and back testing, Copulas, Extreme value, Neuronal network
Lecture Selected topics of mathematical statistics (SMS)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Limiting behavior of different sample statistics $U$ -statistics, $M$ -, $L$ - and $R$ -Estimates. This course gives better understanding for the basic tools learned in the elementary Statistics I and II, like Law of Large Numbers, Central Limit Theorem, Kolmogorov-Smirnov and Cramer-von-Mises tests, sample mean and sample variance behavior, etc.
Lecture Advanced Methods in Quantitative Finance (AMF)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Energy options and knowledge of econometric tools and stochastic finance, robust techniques for financial time series

Lecture Statistical Tools for Finance and Insurande (STF)	2	3 Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Modern statistical tools applied in finance and insurance
Seminar  Mathematica I Statistics (MSS)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Presentation of research results in topics in mathematical statistics
Seminar  Economic Risk (QFS)	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Selected Topics of Economic Risk
Module examinations		SFM1: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework SFM2: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework SMS: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework STF: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework AMF: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework MSS: presentation (30 min) or working paper QFS: presentation (30 min) or working paper	
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester		

<b>Mandatory Elective Module QM: Privatissimum Statistik</b>		<b>Study Points: 30</b>	
Goals:			
The seminar "Privatissimum" is designed to help students in the preparation and completion of their Masters thesis. The thesis must be dedicated to a chosen statistical subject. At the seminar any technical problems or drawbacks are presented and the relevant statistical procedures and results collectively discussed.			
Prerequisites to participate in the module: Knowledge of basis statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis.			
Course	Periods/ Week	SP; work load	Topics
Seminar Privatissimum Statistik (PRI)	2	30; Attendance (30 h) Preparation of presentation (60 h) Master thesis (450 h)	PRI: Master Thesis
Module examinations		Master thesis (75%) and presentation (25% of final mark)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

Elective Module QM: Applied Econometrics		Study Points: 6	
<u>Learning objectives:</u> <p>The students have a basic knowledge of econometric models and methods for analyzing cross-sectional data, panel data and time series data as well as of their applicability in practice. They are able to carry out own empirical studies to investigate particular economic problems, whereby they apply appropriately chosen econometric methods and interpret the results in a meaningful way.</p>			
Preconditions: basic knowledge equivalent to module Introduction to Econometrics			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Applied Econometrics	<u>3 SWS</u> <u>90 hours</u> 35 hours Attendance 55 hours Literature study and preparation	3 credits, participation	<ul style="list-style-type: none"> <li>-Extensions and applications of the linear regression model</li> <li>- Model selection and model diagnostics</li> <li>- Stochastic regressors and instrumental variable estimation</li> <li>- Introduction to panel data analysis</li> <li>- Models for qualitative and limited dependent variables (logit and probit models, truncated and censored data, tobit model)</li> <li>- Time series analysis (specification, estimation and forecasting in (V)AR-models)</li> </ul>
Exercise Applied Econometrics	<u>1 SWS</u> <u>30 hours</u> 15 hours Attendance 15 hours Literature study and preparation	1 credit, participation	<ul style="list-style-type: none"> <li>- Theoretical exercise questions</li> <li>- application of methods to empirical data</li> <li>- Use of econometric software</li> </ul>
Final exam	<u>60 hours</u> Written exam (90 min) and preparation	2 credits, pass exam	
Duration	<input checked="" type="checkbox"/> 1 semester		<input type="checkbox"/> 2 semesters
Start of module	<input checked="" type="checkbox"/> winter term		<input type="checkbox"/> summer term

Mandatory Elective Module QM: Econometric Methods		Study Points: 12	
<u>Learning objectives:</u> <p>The students have a solid knowledge of the econometric methodology including the fundamental role of economic and statistical assumptions. In particular, they have a deep understanding of the ingredients of estimation and inference in the linear regression model and its extensions with matrix algebra. They are familiar with the basic concepts of asymptotic theory, and are able to apply them within the context of least squares, maximum likelihood and instrumental variable estimation. The students are equipped with the necessary knowledge to understand and evaluate current research as well as to successfully address own research questions.</p>			
Preconditions: basic knowledge equivalent to module "Introduction to Econometrics"			
Teaching format	Hours per week, workload in hours	Credits preconditions for granting	Topics, contents
Lecture Econometric Methods	<u>4 SWS</u> <u>180 hours</u> 45 hours Attendance 135 hours Literature study and preparation	6 credits, participation	<ul style="list-style-type: none"> <li>- Linear regression model: least squares estimation, optimality, hypothesis testing, confidence regions</li> <li>- Generalizations and applications of the linear model: selecting regressors, GLS estimation, heteroscedasticity and autocorrelation</li> <li>- Concepts of asymptotic theory and their application to OLS estimation, tests and covariance estimation</li> <li>- Maximum likelihood estimation: basic concepts and examples, asymptotic properties, likelihood-based testing, numerical procedures</li> <li>- Instrumental variable estimation: motivation, asymptotic properties, IV based testing</li> <li>- Generalized Method of Moments: basic concepts and applications</li> </ul>
Exercise Econometric Methods	<u>2 SWS</u> <u>120 hours</u> 25 hours Attendance 95 hours Literature study and preparation	4 credits, participation solving of 4 homework-exercises per term	<ul style="list-style-type: none"> <li>- Theoretical exercise questions</li> <li>- Empirical examples</li> </ul>
Final exam	<u>60 hours</u> Written exam (150 min) and preparation	2 credits, pass exam	
Duration	<input checked="" type="checkbox"/> 1 semester		<input type="checkbox"/> 2 semester
Start of module	<input checked="" type="checkbox"/> winter term		<input type="checkbox"/> summer term

Mandatory Elective Module QM: Time Series Analysis		Study Points: 6-9	
Goals:			
<p>To gain an understanding of econometric time-series methodology  The lecture gives an introduction to time series analysis. The focus is on univariate modelling tools. We cover different types of stochastic processes like ARIMA and GARCH models, deal with the unit- root methodology and forecasting procedures. Multivariate extensions are demonstrated, with emphasis on vector autoregressive (VAR) processes and its application in causality and impulse response analyses. Non-stationary systems with integrated and co-integrated variables will also be treated.  In the tutorials the time series methods are applied to empirical data. We will intensively make use of econometric software packages.  Seminar Economic Risk: Presentation of research results in the field of Quantitative Finance</p>			
Prerequisites to participate in the module: Module „Introduction to Econometrics“ (or equivalent)			
Course	Periods/Week	SP; work load	Topics
Lecture	3	4,5; Attendance (45 h) Preparation for courses (45 h) Exam preparation (30 h)	Stochastic processes, ARIMA and GARCH models, unit-root methodology, forecasting, VAR processes, Cointegration, Causality and impulse-response analysis
Tutorial	1	1,5; Attendance (15 h) Preparation (15 h) Assignments (30 h)	Use of econometrics software and application of time series methods
Seminar Economic Risk	2	3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h)	Selected Topics of Economic Risk
Module examinations		Lecture + Tutorial: Written exam (90 min) Seminar Economic Risk: presentation (30 min) or working paper	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module QM: Selected Topics in Econometrics</b>		<b>Study Points: 6</b>	
<p>Goals:</p> <p>To understand and to learn how to apply advanced methods in certain special fields of econometrics. The lecture(s) and/or seminar deal with specific topics in Econometrics. Topics may cover nonlinear and nonparametric time series analysis, econometric forecasting, resampling methods or Bayesian econometrics. The students will learn, for example also in tutorials, how to apply the advanced methods to empirical data. To this end we will rely on the use of econometric software.</p> <p>To complete the module students may choose courses of 6 SP.</p>			
Prerequisites to participate in the module: Module „Econometric Methods“			
Course	Periods/ Week	SP; work load	Topics
Seminar/ Lecture/ Tutorial	4	6; Attendance (60 h) Preparation for courses (60 h) Exam preparation (60 h)	Presentation of advanced methods in special fields of econometrics; Use of econometric software and application of econometric methods
Module examinations	Seminar: Seminar paper and/or oral presentation Lecture: Written exam (90 min if 4 periods/week or 60 min if 2 periods/week) or oral exam		
Duration of the module	<input checked="" type="checkbox"/> 1 Semester <u>or</u> <input checked="" type="checkbox"/> 2 Semesters		
Module can be started in	<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester		

<b>Mandatory Elective Module QM: Econometric Projects</b>		<b>Study Points: 6</b>	
Goals:			
To learn how to apply econometric methods for empirical analysis. During the seminar the students will conduct an own empirical study. The students learn how to apply different econometric methods to real data. This includes empirical data-handling and the ability to translate an economic model framework into an econometric model that can be estimated. Furthermore, the students learn how to present their study in written and oral form.			
Prerequisites to participate in the module: Module "Econometric Methods" and one other complementary or compulsory course in econometrics			
Course	Periods/ Week	SP; work load	Topics
Seminar	2	6; Attendance (30 h) Seminar paper (90 h) Presentation (45 h) Assignments (15 h)	Conduct own empirical analysis
Module examinations		Seminar paper and oral presentation	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module QM: Analysis of Panel Data</b>		<b>Study Points: 6</b>	
<p>Goals:</p> <p>The course aims at providing the basic concepts and methods for analyzing panel data. The lecture introduces different error component regression models with fixed and random effects. It covers tests of hypotheses with panel data as well as techniques for serial correlation, heteroscedasticity, simultaneous equations, dynamic models and models for qualitative dependent variables. In the tutorials the methods are revisited and applied to empirical data.</p>			
Prerequisites to participate in the module: Module „Econometric Methods“			
Course	Periods/ Week	SP; work load	Topics
Lecture	3	4,5; Attendance (45 h) Preparation (45 h) Exam preparation (45 h)	Basic concepts, error component regression models with fixed and random effects, tests of hypotheses with panel data, serial correlation and heteroscedasticity, simultaneous equations, dynamic models, models for qualitative dependent variables.
Tutorial	1	1,5; Attendance (15 h) Preparation (15 h) Exam preparation (15 h)	Theoretical exercise questions, application of methods to empirical data.
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module QM: Multiple Time Series Analysis</b>		<b>Study Points: 6</b>	
Goals:			
To gain a deep understanding of advanced multiple time series methods and their applications. The lecture gives an introduction to multiple time series techniques and will cover vector autoregressive (VAR) processes, VAR estimation, VAR order selection and model checking. Non-stationary systems with integrated and co-integrated variables will also be treated. The use of VAR models in forecasting, causality and impulse response analysis will be explained and illustrated using empirical examples.			
Prerequisites to participate in the module: Module „Econometric Methods“			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	6; Attendance (60 h) Preparation (30 h) Exam preparation (45 h) Assignments (45 h)	Vector autoregressive (VAR) processes, co integrated VAR models, forecasting, causality and impulse-response analysis
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module QM: Microeconometrics</b>		<b>Study Points: 6</b>	
Goals:			
<p>To gain a deep understanding of models and methods for qualitative and limited dependent variables and their applications.</p> <p>The lecture gives an introduction to models for qualitative and limited dependent variables and will cover logit and probit models for binary dependent variables, multinomial logit and probit models for unordered and ordered categories. In addition, models for censored and truncated data and models with sample selection problems as well as models for duration and count data will be discussed. The use of these models will be explained and illustrated using empirical examples.</p>			
Prerequisites to participate in the module: : Module „Introduction to Econometrics“ (or equivalent)			
Course	Periods/ Week	SP; work load	Topics
Lecture	3	4,5; Attendance (45 h) Preparation (45 h) Exam preparation (45 h)	Models for limited dependent variables including logit and probit models, models for censored and truncated data, sample selection problems and models for duration and count data
Tutorial	1	1,5; Attendance (15 h) Preparation (30 h)	Solving problems and computer tutorials
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module QM: Financial Econometrics</b>		<b>Study Points: 6-9</b>	
<p>Goals:</p> <p>To gain an understanding of econometrics methods for the analysis of financial market data  The lecture deals with the statistical properties of financial market data and econometric methods that can be used to analyze these data. We will study procedures to test for the efficient market hypothesis and become familiar with methods to model the mean and the volatility of financial data series. Besides the application of nonparametric and classical test procedures, the focus will be on time series methods and models. In particular, ARMA and GARCH models will be covered.  Empirical illustrations and exercises are incorporated into the lecture.  Seminar Economic Risk: Presentation of research results in the field of Quantitative Finance</p>			
Prerequisites to participate in the module: Module „Econometric Methods“			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	6; Visiting the lecture (60 h), Preparation for courses (45 h), Exam preparations (45 h) Assignments (30 h)	Basic concepts and properties of financial returns, Foundations in time series analysis, Modelling time - varying volatility, Estimating and testing asset pricing models, Modelling high-frequency financial data
Seminar Economic Risk (QFS) (German)	2	3; Attendance(30 h) Preparation (30 h) Exam preparation (30 h)	Presentation of research results in Economic Risk
Module examinations		Written exam (90 minutes) Seminar Economic Risk: Presentation (30 min) or working paper	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Mandatory Elective Module QM: Advanced Econometrics</b>		<b>Study Points: 6</b>	
Goals:			
<p>This course deals with advanced estimation techniques in modern econometrics. Main topics include generalized methods of moments (GMM) estimation for single-equation models and multiple-equation models, information theoretic approaches, pseudo-maximum likelihood methods as well as empirical likelihood techniques. Furthermore, an introduction to Bayesian econometric methods will be given. Here the focus is on fundamental principles of Bayesian inference, Markov chain Monte-Carlo (MCMC) methods as well as different applications of Bayesian inference. Finally, non- and semiparametric methods in econometrics are covered. We will study basic Kernel density estimation, nonparametric regression techniques and estimation of partially linear and additive models. A deep knowledge of the techniques conveyed in this course is extremely useful since they are applied in various areas in modern econometrics, including time series econometrics, micro econometrics, panel econometrics as well as financial econometrics.</p>			
Prerequisites to participate in the module: Module „Econometric Methods“			
Course	Periods/ Week	SP; work load	Topics
Lecture	4	6 ; Attendance (60 h) Preparation (60 h) Exam preparation (60 h)	GMM estimation, multiple-equation models, pseudo-maximum likelihood and empirical likelihood methods, Bayesian inference, MCMC techniques, nonparametric regression, partially linear and additive models
Module examinations		Written exam (90 min)	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

### **Competency Targets of the Elective Modules in the Master's Programm Business Information Technology**

- Students acquire supplementary and additional basic information and special knowledge from related academic disciplines, which can be used within the field of economics (contextual knowledge).
- Students develop a good command of interdisciplinary problem-solving methods. They will be taught and trained (on the basis of well-chosen examples) to develop research questions and to work independently at the intersection between computer science and economics.
- Students learn to develop and use internal and external resources.
- Students will be able to expand and to deepen their individual profiles.
- Students learn to be flexible, to be able to respond to quick or sudden changes and differing and varied situations, and indeed, to help shape such developments
- Students learn to perceive their own expectations, values and norms as well as the expectations, values and norms of others, to differentiate among them, and to treat others with respect and tolerance. They will be able to reflect on their own experiences and to create a link between such experiences and their current work as well as to question their own actions.
- Students learn strategies to manage their time, to acquire knowledge, to reach decisions, to find solutions to problems and to manage projects.
- Students are able to work in teams and to contribute independently and competently to solving problems.

### **Kompetenzziele des Wahlbereiches im Masterstudiengang Wirtschaftsinformatik**

- Die Studierenden erwerben ergänzendes und weiterführendes Grundwissen und Spezialwissen aus verwandten Wissenschaftsdisziplinen, das in Beziehung zum Fachgebiet gesetzt werden kann („Kontextwissen“).
- Die Studierenden lernen, weitere fächerübergreifende Problem-lösungsmethoden zu beherrschen. An den Schnittpunkten zwischen Informatik und Wirtschaftswissenschaften werden anhand ausgewählter interdisziplinärer Schwerpunkte die Entwicklung von Fragestellungen und selbständiges wissenschaftliches Arbeiten verstärkt vermittelt und trainiert.
- Die Studierenden sind der Lage, interne und externe Ressourcen zu erschließen.
- Die Studierenden sind in der Lage, erworbene individuelle Profile zu erweitern und zu vertiefen.
- Die Studierenden sind so flexibel, sich auf schnelle oder plötzliche Veränderungen und unterschiedliche Situationen einstellen zu können und somit in der Lage, diese aktiv mitzugestalten.
- Die Studierenden lernen, eigene und fremde Erwartungen, Normen und Werte wahrzunehmen, zu differenzieren und damit umzugehen (Toleranz). Sie können die eigenen Lebenserfahrungen reflektieren und Verbindungen zur aktuellen Arbeit herstellen sowie das eigene Handeln hinterfragen.
- Die Studierenden verfügen über effiziente Arbeitstechniken wie Zeitmanagement, Wissenserwerb, Entscheidungsfindung, Problemlösungs-techniken und Projektmanagement.
- Die Studierenden besitzen die Fähigkeit, in einem Team zu arbeiten und einen eigenständigen und kompetenten Beitrag zur Problemlösung zu leisten.

<b>Elective Module: Variable Module for completing courses inside the economic department</b>		<b>Study Points: 3-11</b>	
<p>Goals:</p> <p>Acquirement of knowledge in the fields of business administration and/or economics and/or quantitative methods.</p> <p>Students may fill the difference between the points acquired in the mandatory, mandatory elective and elective modules and the total amount of 120 SP with this module. The maximum admissible amount is 12 SP.</p> <p>The approvable courses for this module are courses within the Economics Department which are not part of a mandatory module and are rewarded with less than 6 SP.</p>			
Prerequisites to participate in the module: none			
Course	Periods/Week	SP; work load	Topics
Lecture or Tutorial or Seminar	2-8	1 Period/Week generally relates to 1,5 SP or 1,5 ECTS. The work load is partitioned, 1 SP matches 30h.	Various (Courses at large, from other courses of studies as well)
Module examinations		Written exam, seminar paper and presentation, oral exam The required examinations will be announced at the beginning of the semester.	
Duration of the module		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters	
Module can be started in		<input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester	

<b>Wahlmodul: Variables Modul zur Ergänzung des Wahlbereiches</b>			<b>Studienpunkte: 3-11</b>
<p>Goals:</p> <p>Erwerb von Kenntnissen in Betriebs- und/oder Volkswirtschaftslehre und/oder in quantitativen Methoden.</p> <p>Durch dieses Modul können Studienpunkte im Umfang der Differenz der in Pflicht-, Wahlpflicht-, bzw. Wahlmodulen erworbenen Studienpunkte zu dem Gesamtumfang von 120 Studienpunkten erworben werden. In diesem Modul sind maximal 12 SP zulässig.</p> <p>In diesem Modul sind ausschließlich Lehrveranstaltungen der Wirtschaftswissenschaftlichen Fakultät enthalten, für die weniger als 6 SP vergeben werden und die nicht Bestandteil eines Pflichtmoduls sind.</p>			
Voraussetzungen für die Teilnahme am Modul: keine			
Lehr- und Lernformen	Präsenz-SWS	Anzahl der SP/ Arbeitsleistungen	Lernziele, Themen, Inhalte
Vorlesung oder Übung oder Seminar	2-8	1 SWS entspricht in der Regel 1,5 SP sowie 1,5 ECTS. Die Arbeitsleistung ist differenziert und wird mit 30 h je SP angesetzt.	Differenziert (Lehrveranstaltungen, auch fachfremder Studiengänge)
Modulprüfungen		Klausur, Seminararbeit und Präsentation, mündliche Prüfung Die relevanten Prüfungsleistungen werden spätestens zu Semesterbeginn bekannt gegeben.	
Dauer des Moduls		<input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester	
Beginn des Moduls		<input checked="" type="checkbox"/> WS <u>und/oder</u> <input type="checkbox"/> SS	

<b>Elective Module for courses outside of the economic department which students may select on their own initiative</b>	<b>Study Points: 3 - 11</b>
<p>Goals:</p> <p>According to § 6 Abs. 5 of the study regulations students may take courses, up to a total of 11 SP, outside of the Economic Department. The goal of this is to enable students to acquire further qualifications which are either subject-specific, or are foreign to the field of economics, or are interdisciplinary, so that they may further their professional orientation.</p>	
<p>The prerequisites for attendance and participation are to be found in the regulations of the respective departments</p>	
<p>When considering the examinations, tests and study points, the examinations commission for the Master Program in Business Information Technology will decide on the basis of the following criteria:</p> <ol style="list-style-type: none"> <li>1. Only examinations, tests and study points can be taken into consideration which were acquired in the course of academic studies. Both completed modules or individual courses from modules may be taken, in as much as the regulations of the respective course of studies allow this. In particular, academic achievements, examinations and study points for language courses, sports courses and courses taken at the Career Centre, as well as study points for courses which were not acquired within a degree programme cannot be taken into account.</li> <li>2. Only those study points from courses which were successfully completed with coursework or an examination can be taken into consideration. Those courses for which the student received study points only on the basis of attendance cannot be taken into consideration.</li> <li>3. Only examinations, tests and study points, can be taken into consideration, which are documented by a Transcript of Records or by a certificate of achievement. The certificate verifying this must contain the following information: <ul style="list-style-type: none"> <li>• Title and form of the course or courses</li> <li>• Level of these courses (Master, diploma - main studies, Ph.D. program)</li> <li>• Form of the coursework done in the course and/or of the examinations</li> <li>• Grade</li> <li>• SP or ECTS-points (if in the regulations or stipulations of the respective course of studies nothing is said regarding SP or ECTS-points, then alternately proof of the semester week hours will suffice).</li> </ul> </li> <li>4. Those study points which were acquired in one and the same course, cannot be divided among different modules.</li> <li>5. Examinations, tests and study points which were acquired outside of the Humboldt University, will be accredited according to the stipulations of the ASSP. In addition, numbers 1 – 4 (see above) still apply. Those examinations, tests and study points which were acquired in courses, the basic and essential content of which were already successfully completed in courses taken at the Economics Department cannot be taken into consideration.</li> </ol>	
Module Examinations	The examination regulations of the other departments apply in regard to the examinations.

<b>Außerhalb der Wirtschaftswissenschaftlichen Fakultät frei wählbare Lehrveranstaltungen</b>	<b>Studienpunkte: 3 - 11</b>
<p>Lern- und Qualifikationsziele:</p> <p>Gemäß § 6 Abs. 5 Studienordnung können im Umfang bis zu 11 SP auch außerhalb der Wirtschaftswissenschaftlichen Fakultät Lehrveranstaltungen frei gewählt werden. Ziel ist es, fachspezifische, fachfremde oder fächerübergreifende Qualifikationen im Hinblick auf die weitere berufliche Orientierung zu erwerben.</p>	
<p>Voraussetzungen für die Teilnahme: gemäß Bestimmungen der jeweiligen Fächer</p>	
<p>Über die Berücksichtigung der Studienleistungen, Prüfungen und SP entscheidet der Prüfungsausschuss Wirtschaftsinformatik nach folgenden Maßgaben:</p> <ol style="list-style-type: none"> <li>1. Berücksichtigt werden Studienleistungen, Prüfungen und SP, die in Studiengängen erworben wurden. Es können ganze Module oder einzelne Lehrveranstaltungen aus Modulen belegt werden, sofern die Bestimmungen des jeweiligen Studienganges dies zulassen. Nicht berücksichtigungsfähig sind insbesondere Studienleistungen, Prüfungen und SP aus Sprachkursen, Sportkursen und Kursen des Career Centers sowie aus Kursen, die nicht in Studiengängen erworben wurden.</li> <li>2. Berücksichtigt werden nur SP aus Lehrveranstaltungen, die mit einer Arbeitsleistung oder Prüfung abgeschlossen wurden. Nicht berücksichtigt werden SP, die ausschließlich für die Anwesenheit in Lehrveranstaltungen erworben wurden.</li> <li>3. Berücksichtigt werden nur Studienleistungen, Prüfungen und SP, die in einem Transcript of Records bzw. Leistungsnachweis dokumentiert wurden. Der Nachweis muss folgende Angaben enthalten: <ul style="list-style-type: none"> <li>• Titel und Art der Lehrveranstaltung(en)</li> <li>• Studienniveau (Master, Diplom Hauptstudium, Doktorandenprogramme)</li> <li>• Form der Arbeits- und/oder Prüfungsleistung(en)</li> <li>• Note</li> <li>• SP bzw. ECTS-Punkte (falls in den Bestimmungen des jeweiligen Studienganges keine SP oder ECTS-Punkte ausgewiesen sind, alternativ Nachweis der Semesterwochenstunden).</li> </ul> </li> <li>4. Bei der Berücksichtigung sind SP, die in ein und derselben Lehrveranstaltung erworben wurden, nicht auf mehrere Module aufteilbar.</li> <li>5. Studienleistungen, Prüfungen und SP, die außerhalb der Humboldt-Universität zu Berlin erworben wurden, werden nach Maßgabe der ASSP anerkannt. Ergänzend gelten die Ziffern 1 bis 4. Nicht berücksichtigt werden Studienleistungen, Prüfungsleistungen und SP aus Lehrveranstaltungen, deren Inhalte im Wesentlichen bereits erfolgreich an der Wirtschaftswissenschaftlichen Fakultät absolviert wurden.</li> </ol>	
<p>Modulprüfungen</p>	<p>Für die Prüfungen gelten die Prüfungsbestimmungen der anderen Fächer.</p>
