

Synopsis of the Modules in the Master's Degree Program in Business Information Technology (M.Sc.)

| Mandatory Modules | Study Points |
|---|--------------|
| Einführung in Datenbanksysteme (DBS I) | 8-11 |
| Methoden und Modelle des Systementwurfs | 8-10 |
| Advanced Information Systems I | 9 |

| Mandatory Elective Modules in Business Information Technology and Computer Science (fields of specialization) | Study Points |
|---|--------------|
| Implementierung von Datenbanksystemen (DBS II) | 10 |
| Zuverlässige Systeme | 8 |
| Werkzeuge der empirischen Forschung | 8 |
| IT Security and Privacy | 6 |
| Applied Predictive Analytics | 6 |
| Informationsintegration | 10 |
| Data Warehousing and Data Mining | 10 |
| Text Analytics (TAN) | 10 |
| Entrepreneurship – Unternehmensgründung im Informationszeitalter | 8 |
| Lineare Optimierung | 8 |
| Informationspolitik/-ethik/-recht | 10 |
| Business Process Management | 6 |
| E-Business and Online Marketing | 6 |
| Informatik und Informationsgesellschaft I: Digitale Medien | 10 |
| Informatik und Informationsgesellschaft II: Technik, Geschichte, Kontext | 10 |
| Architektur paralleler und verteilter Systeme | 8 |
| Neue Konzepte und Techniken für Datenbanksysteme (NDB) | 8 |
| Betriebssystem UNIX – Systemadministration und Sicherheit | 8 |
| Bildverarbeitung | 8 |
| Verteilte Algorithmen | 10 |
| Grundlagen der Signalverarbeitung | 8 |
| Signalverarbeitung | 10 |
| Kommunikationssysteme 1 | 8 |
| Einführung in die Komplexitätstheorie | 8 |
| Einführung in die Kryptologie | 8 |
| Software Engineering | 8 |
| Computergraphik | 8 |
| Automatisierung industrieller Workflows | 8 |
| Techniken und Konzepte zum Schutz der Privatsphäre | 6 |

| Mandatory Elective Modules in Business Administration | Study Points |
|--|--------------|
| General Management | 6-30 |
| Entrepreneurship and Innovation | 6-18 |
| Research-Seminar on Entrepreneurship and Innovation | 6 |
| Finance | 6-27 |
| Management | 6-21 |
| Marketing | 6-21 |
| Accounting Courses | 6-18 |
| Accounting Research Seminar | 6 |
| Master Tax Seminar | 6-12 |
| Financial Economics | 6-18 |
| Thesis Seminar Corporate Finance | 6 |
| Thesis Seminar Financial Economics | 6 |
| Strategic Management | 6 |
| Financial Contracting | 6-12 |
| Topics in the Theory of Markets and Organizations I/II | 9-18 |
| Topics in Energy and Network Economics | 6-15 |
| Real Estate Economics | 6 |
| Analysis of Competition | 6 |

| Mandatory Elective Modules in Economics | Study Points |
|---|---------------------|
| Advanced Microeconomics | 6 |
| Advanced International Trade | 6 |
| Theory of Incentives | 6 |
| European Integration | 6 |
| Empirical Labor Economics | 6 |
| Decision-Making under Uncertainty | 6 |
| Game Theory | 6 |
| Topics in Microeconomics | 6-18 |
| Information Economics | 6 |
| Advanced Microeconomics 1 (PhD-level) | 9 |
| Introduction to Advanced Macroeconomic Analysis | 6 |
| Advanced Monetary Economics | 6 |
| Labor Markets and Social Policy | 6-12 |
| Advanced Labor Economics | 9 |
| Current Issues in Macroeconomics | 6 |
| Topics in Macroeconomics | 6 |
| Advanced Macroeconomic Analysis I (PhD-level) | 6 |
| Advanced Macroeconomic Analysis II (PhD-level) | 6 |
| Current Research in Macroeconomics | 6 |
| Quantitative Macroeconomics and Numerical Methods | 6 |
| Economic History | 6-18 |
| Advanced International Trade: Theory and Empirics | 6 |
| Spatial Economics | 6 |
| Advanced Topics in Public Economics | 6-15 |
| Social Preferences | 6 |
| Theory of the State in Economics and in Law | 6-18 |
| Applied Microeconomics: Competition Policy | 6 |
| Selected Topics in Competition Policy | 6 |
| Topics in Industrial Organization | 6-12 |
| Datengrundlagen der Wirtschaftspolitik (German) | 6 |

| Mandatory Elective Modules in Quantitive Methodology | Study Points |
|---|---------------------|
| Operations Research | 6-18 |
| Business Information Technology – see field of specialization | |
| Multivariate Statistical Analysis | 6-9 |
| Advanced Statistics | 6-15 |
| Statistics and Finance | 6-15 |
| Privatissimum Statistics | 30 |
| Econometric Methods | 9 |
| Time Series Analysis | 6-9 |
| Selected Topics in Econometrics | 6 |
| Econometric Projects | 6 |
| Analysis of Panel Data | 6 |
| Multiple Time Series Analysis | 6 |
| Microeometrics | 6 |
| Financial Econometrics | 6-9 |
| Advanced Econometrics | 6 |

| Elective Modules | Study Points |
|--|---------------------|
| Variable Module for completing courses inside the economic department | 3-11 |
| Elective Module for courses outside of the economic department which students may select on their own initiative | 3-11 |

Master Thesis

The students are awarded 30 study points for the Master thesis.

Competency Targets of the Mandatory and of the Mandatory Elective Modules in the Master Degree Program in Business Information Technology

- Students will acquire specific knowledge in the disciplines of computer science and in economics which they will be able to apply in concrete situations, as well as a broad knowledge of the most recent developments in these economic disciplines.
- Students will be able to synthesize their specialized knowledge from computer science and from economics such that they will be able to apply their methodologies as well as to develop skills to combine and to apply the technologies so that the students can meet both the demands of the academic disciplines (interdisciplinarity) and of industry (which aims to bring together knowledge from the fields of computer science and economics).
- Students will be able to communicate their knowledge of the border region between technology and business; they will learn to structure it, to classify it, to visualize it, as well as to judge this information with a critical eye, to weigh it and to assess it.
- Students will be motivated (encouraged) to make the effort necessary for a successful course of studies, as well as to create the preconditions, through their dedication and commitment, for a productive intellectual climate through all the various phases and stages of their course of study.
- Students will learn to select and apply the appropriate scientific and academic methodologies as well as the specific tools and resources needed to solve a specific problem.
- Students will improve their ability to accept criticism and to engage with this criticism in a fruitful manner. They will also improve their ability to contribute intelligently to discussions and to defend their arguments. Students will also learn to assume various roles, such as participants in discussions, or experts or moderators.
- Students will improve their abilities to work in teams and to sustain their own life-long learning
- At the end of their course of studies, students will be able to work independently and to assume responsibility when they undertake demanding and challenging tasks in business and in public administration.
- Students will acquire the ability to undertake analytical analysis, within the framework of which technical and economic methodologies are used, to analyze complex economic problems in order to describe these problems clearly and lucidly, and in so doing to assist and prepare the management of firms and corporation in regard to important decisions.
- Students will be introduced to the most recent research and will be able and qualified to apply the most recent methodological developments in information technology and economics; indeed, students will have reached a level such that they would be qualified to independent academic work or to do a doctorate in these fields.

**Kompetenzziele des Pflicht- und Wahlpflichtbereiches im
Masterstudiengang Wirtschaftsinformatik**

- Die Studierenden erwerben vertiefendes und anwendungsorientiertes Wissen auf den Fachgebieten der Informatik und der Wirtschaftswissenschaften sowie weiterführendes Wissen über die aktuellsten Entwicklungen in diesen Wissenschaftsdisziplinen.
- Die Studierenden sind befähigt, die Fachkenntnisse aus der Informatik und aus den Wirtschaftswissenschaften sowie die Fähigkeiten zur Anwendung von Methoden und Arbeitstechniken so zu kombinieren, dass sie den Anforderungen der Wissenschaft (Interdisziplinarität) und der Industrie (Kombinationen aus IT- und Wirtschaftskenntnissen) gerecht werden.
- Die Studierenden sind in der Lage, dieses Wissen im Grenzfeld von Technik und Wirtschaft wiederzugeben, zu strukturieren, konstruktiv und kritisch einzuordnen, zu gewichten und darzustellen.
- Die Studierenden sind motiviert, den für einen positiven Studienerfolg notwendigen persönlichen Einsatz zu leisten und schaffen durch ihr Engagement die Voraussetzungen für ein konstruktives Studienklima in den verschiedenen Formen des Studiums.
- Die Studierenden lernen, die für ein erfolgreiches Studium erforderlichen und geeigneten wissenschaftlichen Arbeitsmethoden und Hilfsmittel zu wählen und gezielt zur Lösungsfundung/Problemlösung einzusetzen.
- Die Studierenden können fundierte Kritik akzeptieren und sich damit auseinander setzen. Gleichzeitig sind sie in der Lage, kritische Argumente in Diskussionen einzubringen und zu verteidigen. Sie lernen dabei verschiedene Rollen als Diskutant/in, Expert/in oder Moderator/in einzunehmen.
- Die Studierenden erwerben die Fähigkeit zu Teamarbeit und lebenslangem Lernen.
- Die Studierenden sind in der Lage, in der freien Wirtschaft und in der Verwaltung anspruchsvolle und verantwortliche Aufgaben selbstständig zu übernehmen.
- Die Studierenden erwerben die Fähigkeit zum Einstieg in analytische Tätigkeiten, im Rahmen derer technische und wirtschaftswissenschaftliche Methoden genutzt werden, um komplexe wirtschaftliche Probleme übersichtlich darzustellen und so wichtige Entscheidungen des Managements von Unternehmen vorzubereiten.
- Die Studierenden werden an den aktuellen Stand der Forschung herangeführt und dabei befähigt, informationstechnische und wirtschaftswissenschaftliche Methoden auf einem Niveau anzuwenden, das sie für eine selbständige akademische Tätigkeit oder eine Promotion in diesen Gebieten qualifiziert.

| Mandatory Module: Einführung in Datenbanksysteme (DBS I) Responsible: Freytag | Study Points: 8-11 | | |
|--|---|--|---|
| <p>Goals: Die Vorlesung gibt einen Überblick über die Konzepte und die Architektur moderner Datenbankmanagementsysteme (DBMS). Die Vorlesung umfasst u.a. Zugriffstrukturen, Anfragesprachen, Views, Mehrbenutzerkontrolle und Fehlerherholung. Das Praktikum dient der Erweiterung und der Vertiefung des Vorlesungsstoffes. Hier liegt ein Schwerpunkt auf dem Umgang mit einem existierenden DBMS. Das optionale Seminar dient der Vertiefung von Datenbankkenntnissen anhand aktueller Forschungsliteratur. Ausgewählte Forschungsartikel sind inhaltlich vom Studenten/Studentin selbstständig zu erarbeiten und deren Ergebnisse zu präsentieren.</p> <p>Qualifikationsziele: Grundkenntnisse von Datenbanksystemen, ihrer Funktion und ihrer grundsätzlichen Realisierung. Die Studierenden erlangen die Fähigkeit, Datenbanksysteme zu bewerten und mit existierenden relationalen Datenbanksystemen umgehen zu können, insbesondere Anfragen formulieren zu können.</p> | | | |
| Prerequisites to participate in the module: Grundkenntnisse des Compilerbaus, Algorithmen und Datenstrukturen | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture DBS I | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Konzepte und Architektur moderner Datenbankmanagementsysteme |
| Praktikum | 2 | 2; Teilnahme am Praktikum (30h), Vor- und Nachbereitung des Praktikums (30h) | Bewertung von Datenbank-systemen, Umgang mit existierenden relationalen Datenbanksystemen |
| Seminar DBS (optional) | 2 | 3 ; Teilnahme am Seminar (30 h), Lesen von Artikeln (30 h), Vorbereitung Vortrag (30h) | Seminar Datenbanksysteme |
| Module examinations | mündliche oder schriftliche Prüfung; benotetes optionales Seminar: Präsentation | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Module: Methoden und Modelle des Systementwurfs Responsible: Reisig | | | Study Points: 8-10 |
|--|---|--|---|
| Goals: Inhalt: Software wird zuverlässiger, änderbarer und preiswerter, wenn vor der Codierung ein Modell erstellt wird, das die Wirkung der Software auf ihre (technische oder organisatorische) Umgebung beschreibt. Die Vorlesung behandelt Methoden, um solche Modelle zu entwerfen und zu analysieren, unterstützt von Softwarewerkzeugen. Alle vorgestellten Methoden (ASM, CCS, CSP, LARCH, MSC, Petrinetze, Pi-Kalkül, Prozessalgebren, SDL, Statecharts, TLA, UML, Z) und Analysetechniken (Invarianten, Model Checking, Refinement Calculus) werden in der industriellen Praxis verwendet. | | | |
| Qualifikationsziele: Überblick über derzeit gängige Modellierungsmethoden, Grundlagen und Prinzipien für zukünftige Methoden. | | | |
| Prerequisites to participate in the module: Mathematische Grundkenntnisse, insbesondere zur Logik | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture MMS | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Überblick über derzeit gängige Modellierungsmethoden, Grundlagen und Prinzipien für zukünftige Methoden |
| Tutorial | 2 | 2; Teilnahme an den Übungen (30h), Vor- und Nachbereitung der Übungen (30h) | betreute Übung; Selbststudium mit Unterstützung durch Übungen und die Verfügbarkeit aller Folien und der verwendeten Literatur |
| Seminar MMS (optional) | 2 | 2; Teilnahme an den Vorträgen (30h), Vorbereitung und Ausarbeitung des eigenen Themas als Vortrag und Hausarbeit/Programm/Modell (30h) | Vorstellung einer Software zur Systemmodellierung |
| Module examinations | mündliche Prüfung (30 Min) oder schriftliche Prüfung (180 Minuten). Voraussetzung zur Prüfung ist das Bestehen der Übung. SE: Präsentation eines Seminarthemas und Seminararbeit (benotet) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Modul: Advanced Information Systems I | | | Leistungspunkte: 9 |
|--|--|--|---|
| <u>Learning Objectives:</u> | | | |
| <p>The module is concerned with the theories, concepts, and practices of Information Systems, emphasizing the support of support managerial decision making by means of formal, data oriented methods. Students have the opportunity to develop a variety of skills, including:</p> <ul style="list-style-type: none"> ▪ Students understand the peculiarities of analytical as opposed to operational information systems. ▪ Students are aware of the specific requirements of analytical data management and how these are addressed in the context of data warehousing. ▪ Students possess a basic understanding of the three branches of descriptive, predictive and prescriptive analytics and appreciate the relationships between these streams. ▪ Given some data, students are able to select appropriate techniques to summarize and visualize the data so as to maximize managerial insight. ▪ Students understand the potential and also the limitations of predictive analytics to aid decision making. They comprehend when and how business applications can benefit from predictive analytics. Given some decision task, they are able to recommend suitable prediction methods. ▪ Students are familiar with the fundamentals of predictive modelling. Using standard software packages, they can develop basic and advanced prediction models and assess their accuracy in a statistically sound manner. ▪ Students are able to critically appraise recent IS trends and developments using established IS theories and practices. ▪ Students further develop their ability to conduct scholarly research, concentrating on academic writing, information retrieval and literature analysis. | | | |
| Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: none | | | |
| Lehrveranstaltungsart | Präsenzzeit Workload in Stunden | Leistungspunkte, Voraussetzung für deren Erteilung | Themen, Inhalte |
| Lecture Business Analytics & Predictive Modeling | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course preparation: 35 h | 2 LP, Attendance | <ul style="list-style-type: none"> ▪ Fundamentals of Business Analytics ▪ Making data accessible: Tools for summarization, grouping, and visualization ▪ The business case for predictive modeling ▪ Prediction methods for regression and classification ▪ Advanced data types: time series, text, survival, and network data ▪ Fundamentals of intelligent search |
| Tutorial Business Analytics & Predictive Modeling | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course preparation: 35 h | 2 LP, Attendance | <ul style="list-style-type: none"> ▪ Further elaboration of lecturing material. ▪ Practical PC exercises using various software packages (e.g., Excel, Matlab, Python) |
| Seminar Information Systems | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course preparation: 35 h | 2 LP Attendance | <ul style="list-style-type: none"> ▪ Students work in groups of two to three members and prepare a seminar thesis. The thesis relates to a current topic in the scope of IS. Seminar topics vary each year and will be announced in due course before the start of the seminar. All papers will be presented and discussed in the seminar sessions. |
| Modulabschluss- | <u>60 Hours</u> | 2 LP, | |

| | | |
|-------------------|---|--|
| prüfung | Preparation for written exam (90 min) 30 h Assignments 30 h 30 hours Preparation of seminar thesis: 20 h Literature retrieval and analysis: 5 h Preparation of oral presentation: 5 h | Pass written exam Business Analytics & Predictive Modeling (50%), in-course assignments (50%) 1 LP Seminar thesis (50%), Systematic retrieval and analysis of relevant literature (25%), oral presentation (25%) |
| Dauer des Moduls | <input checked="" type="checkbox"/> 1 Semester | <input type="checkbox"/> 2 Semester |
| Beginn des Moduls | <input checked="" type="checkbox"/> WS | <input type="checkbox"/> SS |

| Mandatory Elective Module Business Information Technology and Computer Science: Implementierung von Datenbanksystemen (DBS II) | | | Study Points: 10 |
|--|------------------|---|--|
| Responsible: Freytag | | | |
| Goals: Studierende erlangen vertiefende Kenntnisse von Datenbanksystemen bezüglich ihrer Implementierung/ Realisierung und ihrer Funktion. Sie erhalten die Fähigkeit, die Internas (objekt-) relationaler Datenbankmanagementsysteme zu verstehen und Realisierungsalternativen abzuwägen. | | | |
| Prerequisites to participate in the module: Grundkenntnisse in Datenbanksystemen | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 60 Stunden Anwesenheit, 90 Stunden Vor- und Nachbereitung inkl. Prüfungsvorbereitung | Die Vorlesung gibt einen Überblick über die Architektur und Implementierung moderner Datenbankmanagementsysteme (DBMS). Die Vorlesung umfasst u.a. Zugriffstrukturen, Anfragesprachen, Anfragebearbeitung und - optimierung, Mehrbenutzerkontrolle und Fehlererholung. |
| Internship | 2 | 30 Stunden Anwesenheit, 120 Stunden Bearbeitung der Aufgaben | Das Praktikum dient der Erweiterung und der Vertiefung des Vorlesungsstoffes durch eine prototypische (Teil-) Realisierung eines relationalen DBMS. Erfolgreiche Teilnahme am Praktikum ist Voraussetzung zur Prüfungszulassung. |
| Module examination | | Oral exam (30 minutes) or written exam (120 minutes) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester | <input type="checkbox"/> 2 Semesters |
| Module can be started in | | <input type="checkbox"/> Fall Semester | <input checked="" type="checkbox"/> Spring Semester |

| Mandatory Elective Module Business Information Technology and Computer Science: Zuverlässige Systeme (ZS) Responsible: Malek | Study Points: 8 | | |
|---|--|--|---|
| Goals: | | | |
| <p>ZS ist ein in die Tiefe gehender Halbkurs auf dem Gebiet der fehlertoleranten, verteilten, parallelen und web-basierten Systeme. Teilnehmer des Kurses lernen sowohl die Grundlagen zuverlässiger Systeme als auch tiefergehende Techniken und Methoden für Modellierung, Design und Entwurf solcher Systeme. Spezielle Themen sind u.a.: Fehlertoleranz, Zuverlässigkeit, Responsivität, Messungen, Anwendungen, Systemmodelle und Techniken, Ausfallverhalten, Fehlermodelle, Software/Hardware – responsives Systemdesign, Analyse und Synthese, Bewertung, Fallstudien in Forschung und Industrie.</p> | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Grundlagen zuverlässiger Systeme als auch tiefergehende Techniken und Methoden für Modellierung, Design und Entwurf solcher Systeme |
| Project work | 2 | 2; Projektbearbeitung (60h) | |
| Module examinations | Oral exam | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Information Technology and Computer Science: Werkzeuge der empirischen Forschung | Study Points: 8 | | |
|--|--|--|--|
| Responsible: Kössler | | | |
| Goals: | | | |
| <p>Inhalt: Es werden Basisverfahren der Beschreibenden Statistik (Statistische Maßzahlen, Boxplots, Häufigkeitstabellen und -diagramme, Zusammenhangsmaße) und der Schließenden Statistik (Ein- und Zweistichprobenproblem, Varianzanalyse, Anpassungstests, Nichtparametrische Tests, Korrelation, Regression, Clusteranalyse, Hauptkomponentenanalyse, Diskriminanzanalyse) behandelt. Die Methoden werden anhand des Statistik-Programmpakets SAS und mit Hilfe von vielen Beispielen demonstriert.</p> <p>Qualifikationsziele: Grundkenntnisse statistischer Methoden und ihrer praktischen Anwendung. Der Schwerpunkt liegt auf den Methoden. Ihre praktische Umsetzung wird in der Vorlesung demonstriert und im Praktikum vertieft. Die Studierenden erlangen die Fähigkeit, statistische Probleme zu erkennen, zu lösen und die Ergebnisse zu interpretieren.</p> | | | |
| Prerequisites to participate in the module: Mathematik 1-2, Grundkenntnisse in Wahrscheinlichkeitsrechnung sind von Vorteil | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Basisverfahren der beschreibenden und der schließenden Statistik, |
| Internship | 2 | 2; Teilnahme am Praktikum (30h), Vor- und Nachbereitung des Praktikums (30h) | Praktische Umsetzung der in der Vorlesung demonstrierten Anwendung |
| Module examinations | Oral exam | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Information Technology and Computer Science: IT Security & Privacy | | | Leistungspunkte: 6 |
|---|---|--|--|
| <u>Learning Objectives:</u> | | | |
| The module presents an introduction to engineering and management of IT security and privacy in networked organizations. Students have the opportunity to gain knowledge and develop skills in the following areas: | | | |
| <ul style="list-style-type: none"> ▪ Security and Privacy Requirements ▪ Cryptography ▪ Network Protocols ▪ System, Network and Web Security ▪ Privacy-Enhancing Technologies ▪ Security Management | | | |
| Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: None | | | |
| Lehrveranstaltungsart | Präsenzzeit Workload in Stunden | Leistungspunkte , Voraussetzung für deren Erteilung | Themen, Inhalte |
| Lecture IT Security & Privacy | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course pre- paration: 35 h | 2 LP, Attendance | <p>There will be a lecture-style introduction to IT Security & Privacy.</p> <p>In parallel, students work together in groups and prepare a seminar thesis.</p> <p>The thesis relates to a current topic or project in the scope of IT Security and Privacy.</p> <p>Seminar topics vary each year and will be announced in due course before the start of the seminar.</p> <p>All papers will be presented and discussed in the seminar sessions.</p> |
| Seminar IT Security & Privacy | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course pre- paration: 35 h | 2 LP, Attendance | |
| Modulabschluss- prüfung | <u>60 Hours</u> Preparation of seminar thesis: 30 h Literature retrieval and analysis: 15 h Preparation of seminar presentation: 15 h | 2 LP; | Seminar thesis (50%), Systematic retrieval and analysis of relevant literature (25%), oral presentation (25%) |
| Dauer des Moduls | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester | | |

| Mandatory Elective Module Business Information Technology and Computer Science: Applied Predictive Analytics | | Leistungspunkte: 6 | |
|---|--|--|--|
| <u>Learning Objectives:</u> | | | |
| <p>The model give students an opportunity to participate in a real-world forecasting challenge related to planning problems in business areas such as marketing, finance, or others. In this scope, students have the opportunity to develop a variety of skills, including:</p> <ul style="list-style-type: none"> ▪ Working in a real-world project setting allows students to further develop their team work and project management abilities. ▪ Students get acquainted with contemporary software packages for predict analytics. ▪ Students are able to develop advanced forecasting models using a variety of techniques from statistics, machine learning, and other domains. ▪ Students advance their knowledge in data integration, preparation, and transformation which allows them to create predictive variables from noisy real-world data sets. | | | |
| Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: Module Business Analytics & Predictive Modeling | | | |
| Lehrveranstaltungsart | Präsenzzeit Workload in Stunden | Leistungspunkte, Voraussetzung für deren Erteilung | Themen, Inhalte |
| Seminar Applied Predictive Analytics | <u>4 SWS</u> <u>120 Hours</u> Contact hours: 45 h Preparation and post-processing: 15 h Model development and evaluation: 60 h | 4 LP, Teilnahme | The module involves participating in a real-world forecasting competition such as the annual data mining cup, the ACM KDD cup, or a kaggle challenge. In this scope, students will experience several typical challenges that arise in real-world modeling projects, and develop the necessary skills to overcome these obstacles. |
| Modulabschlussprüfung | <u>60 Hours</u> Study of relevant literature: 15 h Preparation of competition entry: 30 h Preparation of seminar presentation: 15 h | 2 LP; | <ul style="list-style-type: none"> ▪ Development of a competition entry (typically a prediction model) for a specified forecasting challenge (50%), studying relevant literature (25%), preparation of a seminar presentations (25%) |
| Dauer des Moduls | <input checked="" type="checkbox"/> 1 Semester | | <input type="checkbox"/> 2 Semester |
| Beginn des Moduls | <input type="checkbox"/> WS | | <input checked="" type="checkbox"/> SS |

| Mandatory Elective Module Business Information Technology and Computer Science: Informationsintegration | Study Points: 10 | | |
|---|--|--|---|
| Responsible: Leser | | | |
| Goals: | | | |
| <p>Inhalt: Die Vorlesung vermittelt Grundlagen der anfragebasierten Integration von heterogenen, verteilten und autonomen Quellen. Dies reicht von klassischen Themen föderierter relationaler Datenbanken (Architekturen, Anfrageoptimierung, Anfrageplanung) über Techniken zur Integration von Webquellen (Screen Scraping, Wrapper, Web Services und Semantic Web) zu neusten Entwicklungen im Bereich der Informationsintegration (Schema Mapping und Schema Matching, Integration semi-strukturierter und unstrukturierter Daten, Datenintegration und Datenqualität). Ein Schwerpunkt liegt auf der Behandlung semantischer Konflikte, zum Beispiel durch Ontologien. Die Vorlesung wird durch ein Praktikum begleitet.</p> <p>Qualifikationsziele: Probleme der Verteilung und Heterogenität bei der Informationsintegration; Architekturen für integrierter Informationssysteme; Techniken zur anfragebasierten Datenintegration. Die Studierenden erlangen die Fähigkeit, integrierte Informationssysteme zu entwerfen und zu bewerten.</p> | | | |
| Prerequisites to participate in the module: Kenntnisse in Datenbanken (z.B. DBS-I), Kenntnisse in Algorithmen und Datenstrukturen | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Informations -integration | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Methoden der Informationsintegration |
| Internship | 2 | 4; Teilnahme am Praktikum (60h), Vor- und Nachbereitung des Praktikums (60h) | Durchführung eines Integrationsprojekts zur Anwendung des Vermittelten |
| Module examinations | Written or oral exam | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Information Technology and Computer Science: Data Warehousing und Data Mining (DWH) Responsible: Leser | | | Study Points: 10 |
|---|--|---|---|
| Goals: Die Studenten lernen Probleme und Lösungen bei Aufbau und Analyse sehr großer Datenbestände kennen. Die Studierenden erlangen die Fähigkeit, derartige Systeme zu entwerfen und mit aktuellen Werkzeugen zu implementieren. | | | |
| Recommended Prerequisites to participate in the module: Gute Kenntnisse in relationalen Datenbanken | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture DWH | 4 | 60 Stunden Anwesenheit, 90 Stunden Vor- und Nachbereitung inkl. Prüfungsvorbereitung | Mit Data Warehouses (DWH) werden sehr große, integrierte und auf die Datenanalyse ausgerichtete Datenbanken bezeichnet. Die Vorlesung behandelt diese Thematik in zwei Blöcken. Im ersten Block werden Methoden zum Aufbau und Management von DWH in relationalen Datenbanken vorgestellt (Architekturen, ETL-Prozess, das multidimensionale Datenmodell, OLAP Operationen, Bitmap-Indexe, materialisierte Sichten. etc.). Im zweiten Block besprechen wir Algorithmen, die auf den gesammelten Daten Analysen vornehmen (Data Mining), wie zum Beispiel Klassifikationsverfahren, Clustering und Lernen von Assoziationsregeln. Der Schwerpunkt liegt auf der performanten Implementierung solcher Algorithmen in Datenbanken. |
| Internship | 2 | 30 Stunden Anwesenheit, 120 Stunden Bearbeitung der Aufgaben | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen anhand eines kommerziellen Datenbanksystems. Erfolgreiche Teilnahme am Praktikum ist Voraussetzung zur Prüfungszulassung. |
| Module examinations | Oral exam (30 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Information Technology and Computer Science: Text Analytics (TAN) | Study Points: 10 | | |
|--|-------------------------|---|--|
| Responsible: Leser | | | |
| Goals: | | | |
| <p>Studierende erlangen die Fähigkeit, Informationssysteme, die textuelle Daten verarbeiten, zu entwerfen und zu bewerten. Sie lernen die grundlegenden Verfahren zur Suche in Texten, zur computerlinguistischen Aufbereitung von Dokumenten und zum Management und zur Analyse großer Dokumentsammlungen kennen.</p> | | | |
| Inhalt: | | | |
| <p>Die Themen umfassen Information Retrieval (Suchmaschinen, Anfragesprachen, Indexierung, Vektorraummodell, probabilistisches Retrieval, Relevance Feedback), Verfahren der Computerlinguistik (Kollokationsanalyse, Sprachmodelle, Wortart-Tagging, Disambiguierung) bis zu fortgeschrittenen Methoden im Text Mining (Dokumentklassifikation und -clustering, Informationsextraktion, Plagiaterkennung). Es werden sowohl algorithmische Grundlagen als auch Anwendungen behandelt.</p> | | | |
| Prerequisites to participate in the module: | | | |
| Kenntnisse in Algorithmen und Datenstrukturen, gute Kenntnisse in der Programmierung mit Java | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture TAN | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Information Retrieval, Verfahren der Computerlinguistik, Text Mining |
| Internship | 2 | 4; Teilnahme am Praktikum (60h), Vor- und Nachbereitung des Praktikums (60h) | Vertiefung der gelernten Methoden durch praktische Umsetzung: In Gruppen wird ein komplexes Problem des Text Mining, aufbauend auf existierenden Frameworks, gelöst. |
| Module examinations | | Oral exam (30 min); provided that the Internship was successful | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |

| Mandatory Elective Module Business Information Technology and Computer Science: Entrepreneurship – Unternehmensgründung im Informationszeitalter (ENT) | Study Points: 8 | | |
|---|--|--|--|
| Responsible: Malek | | | |
| Goals: | | | |
| Die Studenten erarbeiten Grundkenntnisse von Innovation und Umwandlung der Geschäftsideen im High-Tech-Bereich in durchführbare Businesspläne und Unternehmen. | | | |
| <i>Inhalt:</i> Innovationen werden am häufigsten von den kleinen Firmen eingeleitet und vorangetrieben. In der Vorlesung werden Kenntnisse zur Unternehmensgründung (Geschäftsmodelle, Businessplan, Kapitalbeschaffung, Rechtsform, Finanzplanung, Marketing und Unternehmensbewertung) vermittelt, sowie verschiedene Fallstudien und Erfahrungsberichte von Existenzgründern vorgestellt. Im Projekt werden Geschäftsideen für Zukunftsmärkte erarbeitet, diskutiert und verfeinert. 2er- bis 5er Teams arbeiten jeweils eine innovative Geschäftsidee im High-Tech-Bereich zu einem Businessplan aus. Die Teams bekommen an drei Präsentationsterminen Gelegenheit, ihre Geschäftsidee vorzustellen und schrittweise auszureifen. Nach einem Businessvorschlag und einem Zwischenstatus wird schließlich der Businessplan in einer Abschlusspräsentation einer Expertenjury und den anderen Kursteilnehmern zur Evaluierung und Prämierung vorgestellt. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture ENT | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Kenntnisse zur Unternehmensgründung (Geschäftsmodelle, Businessplan u.a.) |
| Internship | 2 | 2; Teilnahme am Praktikum (30h), Vor- und Nachbereitung des Praktikums (30h) | Vertiefung der gelernten Methoden durch praktische Umsetzung: In Gruppen wird ein komplexes Problem des Text Mining, aufbauend auf existierenden Frameworks, gelöst. |
| Module examinations | Oral exam (30 min); presentation of a business plan | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Information Technology and Computer Science: Lineare Optimierung Responsible: Popova-Zeugmann | Study Points: 8 | | |
|---|--|--|--|
| Goals: | | | |
| <p>Die Optimierung beschäftigt sich mit der Findung der besten Lösung(en) eines Problems. Die LO untersucht Probleme, bei denen die Gesamtheit aller Lösungen durch lineare (Un-)Gleichungen und das Ziel als eine bzw. mehrere lineare Funktionen gegeben sind. Angewandt in technischen, betriebs- und volkswirtschaftlichen Zusammenhängen, dient die bereits in der Planung eingesetzte Optimierung dazu, knappe Ressourcen so effektiv wie möglich zu verwenden bzw. ein gewünschtes Ergebnis mit möglichst geringem Ressourcenverbrauch zu erreichen.</p> <p>In diesem Modul werden wir die klassischen Lösungsverfahren kennenlernen: Simplex-methode, duale Simplexmethode, Methode der Potentiale zur Lösung der klassischen Transportaufgabe, sowie die Grundidee des polynomialen Algorithmus von Chatchijan der eingeschriebenen Ellipsoide. Die entwickelten Verfahren werden wir auch zur Lösung von 1-parametrischen LO-Aufgaben, verschiedenen Transportaufgaben und zur Lösung von Aufgaben aus der Spieltheorie anwenden.</p> | | | |
| <p><i>Qualifikationsziele:</i> Die Studierenden bekommen die Möglichkeit, grundlegende Kenntnisse auf dem Gebiet der Optimierung zu erlangen und mathematische Fähigkeiten und Fertigkeiten zu entwickeln und zu üben.</p> | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 6; Besuch der Vorlesung (60h), Nachbereitung der Vorlesung (60h), Prüfungsvorbereitung (60h) | Simplex-Verfahren, lexikographisches Simplex –Verfahren, Dualität, Ellipsoidenverfahren, 1-para- metrische Optimierung, Transportaufgabe, Spieltheorie (antagonistische Spiele) |
| Tutorial | 2 | 2; Teilnahme an der Übung (30h), Vor- und Nachbereitung (30h) | |
| Module examinations | Oral exam (30 min) | | |

| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Information Technology and Computer Science: Informationspolitik/-ethik/-recht Responsible: Seadle | | | Study Points: 10 |
|---|------------------|---|--|
| Goals: | | | |
| Die Studierenden haben einen Überblick über Aufgaben und internationale Trends der Informationspolitik und des Informationsrechts und können die jeweiligen Auswirkungen im gesellschaftlichen Rahmen bewerten. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 6 | 6; Besuch der Vorlesung (60h), Nachbereitung Vorlesung (60h), Prüfungsvorbereitung (60h) | Nationale und internationale (Fach-)Informationspolitik - Auswirkungen der Informatisierung von Wissen- und Informationsarbeit - Digital Divide; Information Literacy - Ethische Aspekte der Informationspolitik und des Informationsrechts - Informationsethik - Urheberrecht/Copyright; - Medienrecht - Aspekte des Verwaltungsrechts - Rechtsformen von BI-Einrichtungen - Verwertungsrechte und -organisationen; Patentrecht - Digital Rights Management - Vertrauensmanagement |
| Seminar | 2 | 4; Teilnahme Übung (60h), Vor- u. Nachbereitung (60h) | Referat und Diskussionsbeiträge in einer elektronischen Forum |
| Module examinations | | Oral exam (30 min); seminar paper | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester | <input type="checkbox"/> 2 Semesters |
| Module can be started in | | <input type="checkbox"/> Fall Semester | <input checked="" type="checkbox"/> Spring Semester |

| Mandatory Elective Module Business Information Technology and Computer Science: Business Process Management | | Leistungspunkte: 6 | |
|---|--|--|---|
| <u>Learning Objectives:</u> | | | |
| <p>The module is concerned with theories, concepts, methods, and practices to analyze and continuously improve business processes. Students have the opportunity to develop a variety of skills, including:</p> <ul style="list-style-type: none"> ▪ Students understand the origins, motivations and objectives of business process management and are familiar with the process management lifecycle. ▪ Students appreciate the role and potential of information and communication technology to improve business process performance. ▪ Students are familiar with the basic principles of qualitative and quantitative process analysis. ▪ Students have a sound knowledge of BPMN and are able to create process models for basic and advanced business processes. ▪ Students acquaint themselves with methods for assessing the relative merits and demerits of business process outsourcing. ▪ Students have a basic understanding of process mining and recognize the potential and limitations of automatic process detection. | | | |
| Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: none | | | |
| Lehrveranstaltungsart | Präsenzzeit Workload in Stunden | Leistungspunkte, Voraussetzung für deren Erteilung | Themen, Inhalte |
| Lecture Business Process Management | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course preparation: 35 h | 2 LP, Attendance | <ul style="list-style-type: none"> ▪ Process management lifecycle ▪ Principles of business process modeling using BPMN ▪ Process analysis ▪ Technologies for business process automation (e.g., BPEL) ▪ Business process outsourcing ▪ Process mining |
| Tutorial Business Process Management | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course preparation: 35 h | 2 LP, Attendance | <ul style="list-style-type: none"> ▪ Further elaboration of lecturing material ▪ Exercises from the field of BPM ▪ Solving process modeling tasks using BPMN |

| Mandatory Elective Module Business Information Technology and Computer Science: E-Business and Online Marketing | | | Leistungspunkte: 6 |
|--|--|--|---|
| <u>Learning Objectives:</u> | | | |
| The module is concerned with theories, practices and technologies in the field of E-Business and Online Marketing. Students have the opportunity to develop a variety of skills, including: | | | |
| <ul style="list-style-type: none"> ▪ Students appreciate the state-of-the-art in E-Business and Online Marketing from a theoretical and practical standpoint. ▪ Students familiarize themselves with core E-Business applications (e.g., SCM, CRM, etc.), understand their origins, and how they depend on information and communication technology. Through generalizing these links, students are able to fully appreciate the relationship between internet technologies and E-Business strategy. ▪ Students are aware of key E-Business models, understand their relative merits and demerits, and are able to judge the appropriateness of these models for specific business applications. ▪ Students gain an overview of established and emerging internet technologies and understand the anatomy of web-based information systems. They also become acquainted with key technologies for system integration. ▪ Students appreciate the internet marketing mix, know about the different digital channels for marketing communication, and understand the concept of multi-channel management. ▪ Students are familiar with the fundamentals of web analytics to measure the effectiveness of online marketing initiatives. | | | |
| Fachliche Voraussetzungen für die Teilnahme am Modul bzw. bestimmten Lehrveranstaltungen des Moduls: none | | | |
| Lehrveranstaltungsart | Präsenzzeit Workload in Stunden | Leistungspunkte, Voraussetzung für deren Erteilung | Themen, Inhalte |
| Lecture E-Business & Online Marketing | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course preparation: 35 h | 2 LP, Attendance | <ul style="list-style-type: none"> ▪ E-Business strategy ▪ E-Business infrastructure ▪ E-Business applications ▪ Internet marketing mix ▪ Marketing communication using digital channels ▪ Web analytics fundamentals |
| Seminar E-Business & Online Marketing | <u>2 SWS</u> <u>60 Hours</u> Contact hours: 25 h Course preparation: 35 h | 2 LP, Attendance | Based on the content of the lecture, students prepare a seminar thesis on current and emerging trends in E-business and online marketing and give an oral presentation |
| Modulabschluss-prüfung | <u>60 Hours</u> Preparation for written exam (60 min) Preparation of seminar thesis 30 h | 2 LP, 30 h | Pass written exam E-Business & Online Marketing (50%), seminar thesis (30%), oral presentation (20%) |

| Mandatory Elective Module in Information Systems and Computer Science: Informatik und Informationsgesellschaft I: Digitale Medien | | | Study Points: 10 |
|---|------------------|--|---|
| Responsible: Prof. Coy | | | |
| Goals: Kenntnis von Methoden und Techniken der Digitalisierung, der Kompression, der Speicherung und Präsentation mit offline- und online-Medien. Befähigung mit digitalen Medien in den Bereichen Text, Grafik, Ton, Bild und Bewegtbild umzugehen. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (60 h); Preparation (60 h); Exam preparation (60 h) | Computer lassen ihre eigentliche Bestimmung durch Multimedia und Vernetzung erkennen: Es sind digitale Medien, die alle bisherigen Massen- und Kommunikationsmedien simulieren, kopieren oder ersetzen können und neue Medien ermöglichen. Der Prozess der Mediatisierung der Rechner und Rechnernetze wird in der Technik, seiner Geschichte, in Theorie und in Praxis untersucht. |
| Internship | 2 | Attendance (30h); Completing the tasks (90h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. |
| Module examination | | Oral exam (30 min) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | |

| Mandatory Elective Module in Information Systems and Computer Science: Informatik und Informationsgesellschaft II: Technik, Geschichte, Kontext Responsible: Prof. Coy | | | Study Points: 10 |
|---|------------------|--|---|
| Goals: Kenntnis der relevanten technischen Grundlagen der Informationsgesellschaft und ihrer Geschichte. Kenntnis ihrer wichtigsten ökonomischen, politischen und juristischen Rahmenbedingungen. Befähigung zur Beurteilung ihrer wichtigsten kulturellen und sozialen Auswirkungen und einflussreicher Wechselwirkungen. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (60 h); Preparation (60 h); Exam preparation (60 h) | Informatik als Technik wird in ihrer Entwicklung unter gesellschaftlichen Randbedingungen betrachtet, die mit wachsender Verbreitung ihrerseits die Gesellschaft transformiert: von einer industriell geprägten Arbeitsgesellschaft mit nationalstaatlicher Organisation zu einer globalen „Informationsgesellschaft“. Dieser (durchaus problematische) Begriff beschreibt eine Vielzahl unterschiedlicher und widersprüchlicher Entwicklungen: von den globalen Finanznetzen und ihren politischen und juristischen Fixierungen über das Internet als hochaktiver Kommunikations- und Medienraum bis hin zu militärischen Planspielen des Information Warfare. |
| Tutorial | 2 | Attendance (30h); Completing the tasks (90h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. |
| Module examination | | Oral exam (30 min) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module in Information Systems and Computer Science: Architektur paralleler und verteilter Systeme | | | Study Points: 8 |
|--|---|---|--|
| Responsible: Prof. Reinefeld | | | |
| Goals: Die Entwicklung effizienter Algorithmen für parallele und verteilte Systeme erfordert ein gutes Verständnis der zugrundeliegenden Architekturen. In dieser Lehrveranstaltung werden Konzepte und Basisalgorithmen für massiv-parallele Systeme, Client/Server-Systeme und Peer-to-Peer-Systeme vorgestellt, analysiert und in den Übungen bzw. im Praktikum implementiert und erprobt. | | | |
| Prerequisites to participate in the module: BA including Computer Science, good programming skills, knowledge of Computer architecture | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | Attendance (30h); Preparation (60 h); Exam preparation (30 h) | Es werden die folgenden Themen behandelt: Kommunikationsprotokolle, Serialisierungsklassen, Skalierbarkeit, Fehlertoleranz, Nebenläufigkeitskontrolle, Konsens- und Transaktionsverfahren, datenorientierte Programmierparadigmen. |
| Tutorial | 2 | Attendance (30h); Completing the tasks (60h) | Die Themen der Vorlesung werden durch die praktische Erarbeitung von Lösungen zu ausgewählten Problemen vertieft. Die erfolgreiche Teilnahme an den Übungen ist Voraussetzung zur Prüfungszulassung. |
| Internship | 2 | Attendance (30h); Completing the tasks (60h) | Im Praktikum (Programmierarbeit in Gruppen) werden ausgewählte Algorithmen mit MPI, OpenMP sowie der funktionalen Programmiersprache Erlang implementiert. |
| Module examination | Oral exam (30 min) | | |
| Duration of the Module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in: | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (every 1 to 2 years) | | |

| Mandatory Elective Module in Information Systems and Computer Science: Neue Konzepte und Techniken für Datenbanksysteme (NDB) Responsible: Prof. Freytag | | | Study Points: 8 |
|---|------------------|---|--|
| Goals: Kenntnisse neuester Entwicklungen im Bereich Datenbanksystemen, ihrer Funktionen und ihrer grundsätzlichen Realisierung. Die Studierenden erlangen die Fähigkeit, fortgeschrittene und neuartige Funktionalitäten in Datenbanksystemen zu bewerten und zu nutzen. | | | |
| Prerequisites to participate in the module: Module „DBS1 (Einführung in Datenbanksysteme)“ or equivalent; „DBS2 (Implementierung von Datenbanksystemen“ beneficial; advanced skills of C/C++ required | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 6; Attendance (60h); Preparation (90 h); | Datenbanksysteme haben sich in den vergangenen Jahren kontinuierlich weiterentwickelt. Diese Vorlesung führt in folgende Entwicklungen der letzten Jahre ein: parallele DBMS, XML-DBMS, erweiterte Optimierungsansätze; weitere Transaktionsansätze, neuartige Speicherstrukturen, Column-Store-Ansatz, Hauptspeicher-DBMS. Es werden unterschiedliche Ansätze auch nach verschiedenen Kriterien bewertet. |
| Tutorial | 2 | 2; Attendance (30h); Completing the tasks (60h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen, auch in Form von Vorträgen anhand der Originalliteratur. Erfolgreiche Teilnahme an der Übung und die erfolgreiche Teilnahme an allen Interviews ist Voraussetzung für die Prüfungszulassung. |
| Module examinations | | Oral exam (30 min) or written exam (max. 3 hours) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module in Information Systems and Computer Science: Betriebssystem UNIX – Systemadministration und Sicherheit Responsible: Dr. Bell | | | Study Points: 8 |
|--|---------------|---|---|
| Goals: | | | |
| Grundlegende Kenntnisse über die Konfigurationsmöglichkeiten und Sicherheitsmechanismen in aktuellen UNIX-Systemen. Beherrschung der grundlegenden UNIX-Werkzeuge und Techniken zur Systemadministration. Einsatz aktueller Sicherheitstechniken in UNIX-Systemen. | | | |
| Prerequisites to participate in the module: BA including Computer Science, basic knowledge of OS UNIX, Shell-programming | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 3 | Attendance (50h); Preparation (130 h); Exam preparation (60 h) | <ul style="list-style-type: none"> - Grundlagen der Systemadministration UNIX - Grundwissen: Prozesse, Files, Geräte, Dokumentation - Booten von UNIX-Systemen – Konfigurationsmöglichkeiten für den Systemadministrator - Speichermedien, Filesysteme, Sicherheit von Daten - Backup und Restore - Netzwerkverwaltung und Firewall-Techniken - Spooling - Authentifizierungsdienste unter UNIX - Härten von UNIX-Systemen - Transportsicherung - Zertifizierungstechniken - Analyse und Tuning von UNIX-Systemen, Werkzeuge - Thinclients <p>Für die korrekte Bearbeitung der Praktikumsaufgaben werden Punkte vergeben. Eine Mindestpunktzahl ist die Voraussetzung für die Zulassung zur Prüfung am Ende des Semesters.</p> |
| Internship | 1 | | Komplexe Praktikumsaufgaben; Managementaufgaben für unterschiedliche Betriebssysteme |
| Module examination | | Oral exam | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (every 2 years) | |

| Mandatory Elective Module in Information Systems and Computer Science: Bildverarbeitung | | | Study Points: 8 |
|---|------------------|---|---|
| Responsible: Prof. Meffert | | | |
| Goals: Studierende erhalten einen Einblick in grundlegende Verfahren der Bildverarbeitung. Sie lernen Art und Funktionsweise verschiedener Algorithmen zur Manipulation von Bildern kennen. Ein Schwerpunkt liegt auf der Vermittlung der zugrunde liegenden mathematischen Verfahren. | | | |
| Prerequisites to participate in the module: Module „Grundlagen der Signalverarbeitung“ or equivalent | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | Attendance (30h); Preparation (60 h); Exam preparation (30 h) | Digitalisierung und Charakterisierung von Bildern, ihre Kodierung und die wichtigsten Operatoren zur Verarbeitung von zweidimensionalen Signalen. |
| Tutorial | 2 | Attendance (30h); Completing the tasks (60h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. |
| Internship | 1 | Attendance (15h); Completing the tasks (15h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. |
| Module examination | | Oral exam (30 min) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester | <input type="checkbox"/> 2 Semesters |
| Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <u>or</u> | <input checked="" type="checkbox"/> Spring Semester (every 3rd or 4th semester) |

| Mandatory Elective Module in Information Systems and Computer Science: Verteilte Algorithmen | Study Points: 10 | | |
|--|--|---|--|
| Responsible: Prof. Reisig | | | |
| <p>Goals: Zentraler Gegenstand der Vorlesung sind verteilte Basisalgorithmen, die in vielerlei Zusammenhängen vorkommen. Dazu gehören Algorithmen zur Verwendung knapper Ressourcen (wechselseitiger Ausschluss), zur Bildung von Konsens, zur verteilten Selbststabilisierung und zur Erkennung und Wiederbeschaffung verlorener Nachrichten (alternating bit, sliding window), für Paare von Agenten und für nachrichtenbasierte Netzwerke. Außerdem werden weitere wichtige Netzwerkalgorithmen (leader election, Echo, Phasensynchronisation) behandelt. Die Prinzipien verteilter constraint – und online – Algorithmen werden an Beispielen erläutert. Alle Algorithmen werden formal modelliert und verifiziert.</p> <p>Qualifikationsziele: Kenntnis der wichtigsten verteilten Basisalgorithmen und der Techniken zu ihrer Modellierung und Verifikation. Abstrakter formuliert, erkennen die Studierenden, dass Algorithmen insbesondere auch verteilte, mathematische Objekte sind und einen entsprechenden Umgang verdienen. Deshalb spielt die Implementierung der Algorithmen in derzeit aktuellen Programmiersprachen in dieser Vorlesung keine Rolle.</p> | | | |
| Prerequisites to participate in the module: Basic Knowledge of algorithms and data structure | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (30h); Preparation (60 h); Exam preparation (60 h) | Der erfolgreiche Besuch dieses Moduls befähigt die Teilnehmer, verteilte Algorithmen zu spezifizieren und zu entwerfen und die Korrektheit ihres Entwurfs nachzuweisen. Es werden klassische Algorithmen zum wechselseitigen Ausschluss, zum Crosstalk, zum bestätigen Nachrichtenaustausch und Algorithmen auf Netzwerken (Leader Election, Echo, Konsens, Phasensynchronisation, Selbststabilisierung) behandelt. Als Modellierungssprache werden Petrinetze verwendet. |
| Tutorial | 2 | Attendance (30h); Completing the tasks (90h) | Selbständige Konstruktion spezieller Varianten der Algorithmen aus der Vorlesung und Übung der Verwendung von Petrinetzen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungsanmeldung. |
| Module examinations | Oral exam (30 min) or written exam (90 min) | | |
| Duration of the Module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in: | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2 years) | | |

| Mandatory Elective Module in Information Systems and Computer Science: Grundlagen der Signalverarbeitung | Study Points: 8 | | |
|--|---|---|--|
| Responsible: Prof. Meffert | | | |
| Goals: | | | |
| <p>In der Lehrveranstaltung werden die (vor allem mathematischen) Werkzeuge für die Signalverarbeitung und Anwendungsbeispiele vorgestellt. Dazu gehören als wichtigste die Signalstatistik, Reihenentwicklungen und orthogonale Transformationen, Korrelation und Faltung. Im Praktikum wird die Handhabung des Algebraprogrammes MATLAB erlernt.</p> <p>Qualifikationsziele sind der sichere, kritische Umgang mit den Werkzeugen und die Vermittlung des Zusammenhangs zwischen den Werkzeugen und ihren Anwendungsmöglichkeiten in der Signalverarbeitung.</p> | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (30h); Preparation (60 h); Exam preparation (30 h) | In der Lehrveranstaltung werden die (vor allem mathematischen) Werkzeuge für die Signalverarbeitung und Anwendungsbeispiele vorgestellt. Dazu gehören als wichtigste die Signalstatistik, Reihenentwicklungen und orthogonale Transformationen, Korrelation und Faltung. |
| Tutorial | 2 | Attendance (30h); Completing the tasks (30h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. |
| Internship | 1 | Attendance (15h); Completing the tasks (15h) | Im Praktikum wird die Handhabung des Algebraprogramms MATLAB erlernt. |
| Module examinations | Oral exam (30 min) or written exam (180 min) | | |
| Duration of the Module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |

| Mandatory Elective Module in Information Systems and Computer Science: Signalverarbeitung | | | Study Points: 10 |
|--|------------------|--|--|
| Responsible: Prof. Meffert | | | |
| Goals: | | | |
| Vermittlung von Kenntnissen zur Verarbeitung eindimensionaler Signale und zu den Anwendungsmöglichkeiten | | | |
| Prerequisites to participate in the module: Module „Grundlagen der Signalverarbeitung“ or equivalent | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (30h); Preparation (90 h); Exam preparation (30 h) | Die Baugruppen einer typischen Signalverarbeitungskette werden erläutert und typische Verarbeitungsaufgaben (Filterung, Datenreduktion, Kenngrößenermittlung) vorgestellt. |
| Tutorial | 2 | Attendance (30h); Completing the tasks (60h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. |
| Internship | 1 | Attendance (15h); Completing the tasks (45h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. |
| Module examination | | Oral exam (30 min) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester (ca. every 2 years) | |

| Mandatory Elective Module in Information Systems and Computer Science: Kommunikationssysteme 1 | | | Study Points: 8 |
|--|------------------|--|---|
| Responsible: Dr. Sommer | | | |
| Goals: Studierende erlangen grundlegende Kenntnisse über Rechnernetzwerk- Hard- und –Software einschließlich nachrichtentechnischer Aspekte. Sie beherrschen den Entwurf und die Konfiguration von Rechnernetzwerken, speziell TCP/IP-Netzwerken und verstehen das Zusammenspiel der Komponenten auf der Basis von Netzwerkprotokollen. Sie können Netzwerkprotokolle im Ansatz selbst programmieren. | | | |
| Prerequisites to participate in the module: Module „Grundlagen der Programmierung“ and Module „Digitale Systeme“ or equivalent | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (60h); Preparation (90 h); | <ul style="list-style-type: none"> - Grundlagen von Rechnernetzwerken auf Hard- und Software-Ebene - Protokollgrundlagen, OSI-Modell - nachrichtentechnische Grundlagen - Hardware-Architekturen - Local Area Networks (LAN) - Protokolle der TCP/IP-Welt, Routing, Protokolle des Internet |
| Internship | 2 | Attendance (30h); Completing the tasks (90h) | Im Praktikum werden die erworbenen Kenntnisse durch die Programmierung von Netzwerkprotokollen und deren Erprobung in Laborumgebungen vertieft. Die erfolgreiche Abnahme des Praktikums ist Voraussetzung für die Prüfungszulassung. |
| Module examination | | Written exam (120 min) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | |

| Mandatory Elective Module in Information Systems and Computer Science: Einführung in die Komplexitätstheorie Responsible: Prof. Köbler | | | Study Points: 8 | | | | | | | | | | | | | | | | | | | | | | | | |
|---|------------------|--|---|--------|------------------|---------------|--------|---------|---|---|---|----------|---|---|---|---------------------|--|--|--|------------------------|--|---|--|---------------------------|--|--|--|
| Goals: In diesem Modul beschäftigen wir uns mit der Frage, welcher Aufwand nötig ist, um ein algorithmisches Problem zu lösen. Ist die Korrektheit eines Algorithmus' nachgewiesen, so stellt sich die Frage, ob die beanspruchten Ressourcen – in erster Linie Rechenzeit und Speicherplatz – auch tatsächlich nötig sind. Hierzu muss man nachweisen, dass es keinen wesentlich effizienteren Algorithmus für dieses Problem gibt. Um derartige Fragestellungen präzise formulieren zu können, werden reale Rechner mathematisch modelliert. Dabei ist man nicht nur an gegenwärtigen, sondern auch an zukünftigen Technologien (etwa Parallel- und Quantenrechnern) interessiert. Die Frage, ob es für praktisch relevante Problemstellungen effizientere Algorithmen als die bisher bekannten gibt, hängt sehr eng damit zusammen, ob bestimmte Komplexitätstklassen (wie etwa P und NP) gleich sind oder nicht ($P = NP$ -Problem). Welche Beziehungen zwischen den unterschiedlichen Komplexitätstklassen bestehen, ist daher ein zentrales Forschungsthema der Theoretischen Informatik. Qualifikationsziele: Studierende erlangen die Fähigkeit, die Komplexität verschiedener algorithmischer Probleme abzuschätzen und einzuzuordnen. Aneignung von Fähigkeiten, die Komplexität verschiedener algorithmischer Problemstellungen abzuschätzen und zu vergleichen. | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Prerequisites to participate in the module: BA including Computer Science | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <table border="1"> <thead> <tr> <th>Course</th><th>Periods/ Week</th><th>SP; work load</th><th>Topics</th></tr> </thead> <tbody> <tr> <td>Lecture</td><td>4</td><td>Attendance (60h); Preparation (60 h); Exam preparation (30 h)</td><td> Die Komplexitätstheorie beschäftigt sich mit der Frage, welcher Aufwand, etwa an Rechenzeit oder Speicherplatz, erforderlich ist, um bestimmte algorithmische Probleme zu lösen. Dieses Modul ist eine Einführung in die Themen und Methoden der Komplexitätstheorie. Im Mittelpunkt stehen dabei die grundlegenden Zeit- und Platzkomplexitätstklassen. Konkrete Inhalte des Moduls sind: Hierarchiesätze, NP-Vollständigkeit und die P vs NP-Frage, Orakelmodelle und die polynomiale Hierarchie, deskriptive Komplexität und der Satz von Fagin, Platzkomplexität und der Satz von Savitch, die Klassen L, NL und PSPACE. </td></tr> <tr> <td>Tutorial</td><td>2</td><td>Attendance (30h); Completing the tasks (60h)</td><td> Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. </td></tr> <tr> <td colspan="2">Module examinations</td><td colspan="2">Oral exam (30 min) or written exam (120 min)</td></tr> <tr> <td colspan="2">Duration of the Module</td><td colspan="2"> <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters </td></tr> <tr> <td colspan="2">Module can be started in:</td><td colspan="2"> <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2 years) </td></tr> </tbody> </table> | | | | Course | Periods/ Week | SP; work load | Topics | Lecture | 4 | Attendance (60h); Preparation (60 h); Exam preparation (30 h) | Die Komplexitätstheorie beschäftigt sich mit der Frage, welcher Aufwand, etwa an Rechenzeit oder Speicherplatz, erforderlich ist, um bestimmte algorithmische Probleme zu lösen. Dieses Modul ist eine Einführung in die Themen und Methoden der Komplexitätstheorie. Im Mittelpunkt stehen dabei die grundlegenden Zeit- und Platzkomplexitätstklassen. Konkrete Inhalte des Moduls sind: Hierarchiesätze, NP-Vollständigkeit und die P vs NP-Frage, Orakelmodelle und die polynomiale Hierarchie, deskriptive Komplexität und der Satz von Fagin, Platzkomplexität und der Satz von Savitch, die Klassen L, NL und PSPACE. | Tutorial | 2 | Attendance (30h); Completing the tasks (60h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. | Module examinations | | Oral exam (30 min) or written exam (120 min) | | Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2 years) | |

| Mandatory Elective Module in Information Systems and Computer Science: Einführung in die Kryptologie (KRY) | | | Study Points: 8 |
|---|------------------|--|---|
| Responsible: Prof. Köbler | | | |
| Goals: | | | |
| Studierende erlernen grundlegende Techniken beim Entwurf und der Analyse von Kryptosystemen und von kryptografischen Protokollen. | | | |
| Prerequisites to participate in the module: Basic knowledge of probability theory | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (60h); Preparation (60 h); Exam preparation (30 h) | Das Modul führt in grundlegende Verfahren der Kryptografie ein. Dabei werden sowohl klassische Verschlüsselungsverfahren (wie DES und AES) als auch Public-Key Systeme (wie RSA und ElGamal) behandelt. Die Verwendung von sicheren Verschlüsselungsverfahren bietet allerdings noch keine Garantie für einen sicheren Informationsaustausch. Hierzu bedarf es zusätzlich der Ausarbeitung so genannter kryptografischer Protokolle, die den Ablauf aller Aktionen der verschiedenen Teilnehmer von der Schlüsselgenerierung über den Schlüsseltransport bis hin zur Ver- und Entschlüsselung der Nachrichten regeln. |
| Tutorial | 2 | Attendance (30h); Completing the tasks (60h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. |
| Module examinations | | Oral exam (30 min) or written exam (120 min) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester (ca. every 2 years) | |

| Mandatory Elective Module in Information Systems and Computer Science: Software Engineering | | | Study Points: 8 |
|---|------------------|--|--|
| Responsible: Prof. Bothe | | | |
| Goals: Software Engineering beschäftigt sich mit Methoden der systematischen Entwicklung komplexer Software. Die Erstellung komplexer Softwaresysteme unterscheidet sich nicht nur quantitativ, sondern auch qualitativ von der kleineren Programme. So werden nur 5 % aller Softwareprojekte termingerecht fertig und etwa 50 % des Entwicklungsaufwandes wird für die Fehlersuche und Fehlerbeseitigung aufgewendet. Die Studierenden erlangen die Fähigkeit, Software systematisch zu entwerfen, Anforderungen an Softwaresysteme zu analysieren und zu modellieren sowie durch systematisches Vorgehen, korrekte Software zu realisieren. | | | |
| Prerequisites to participate in the module: BA including Computer Science or Module „Grundlagen der Programmierung“ or equivalent | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | Attendance (30h); Preparation (30 h); Exam preparation (30 h) | Methoden der systematischen Entwicklung komplexer Software; Vorgehensmodelle und Software-Entwicklungsstandards; Qualitätskriterien, Metriken und Aufwandsabschätzung; Anforderungsanalyse: Pflichtenheft und Produktmodell; Objektorientierte (UML) und strukturierte Analyse; Software-Architekturen, Entwurfsmuster und Modularisierung; Einsatz formaler Methoden; Validierung, Verifikation und Test; Produktzyklen, Weiterentwicklung und Reverse Engineering; Konfigurationsmanagement und Entwicklungswerzeuge; Einführung in die Software-Ergonomie |
| Tutorial | 2 | Attendance (30h); Completing the tasks (90h) | Praktische Erarbeitung von Lösungen zu ausgewählten Problemen. Erfolgreiche Teilnahme an der Übung ist Voraussetzung zur Prüfungszulassung. |
| Module examinations | | Oral exam (30 min) or written exam (120 min) | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | |

| Mandatory Elective Module in Information Systems and Computer Science: Computergraphik | | | Study Points: 8 |
|---|--|--|--|
| Responsible: Prof. Eisert | | | |
| Goals: | | | |
| <p>Die Vorlesung gibt einen Überblick über Themen der Computergraphik und des Visual Computings. Dazu gehören Methoden zur 3D Szenenmodellierung, Beleuchtungs- und Schattenberechnung und Rendering auf GPUs genauso wie Raytracing oder Radiosity. Darüber hinaus werden moderne Verfahren des Bild- und Video-basierten Renderings vorgestellt. Für naturgetreue Darstellungen gewinnen in der Computergraphik zunehmend Verfahren der 3D Videoanalyse sowie die Kombination von realen Szenen mit Graphikelementen an Bedeutung. Daher werden Konzepte der Modell-basierten Bewegungs- und Formschätzung sowie der Virtuellen und Erweiterten Realität vorgestellt.</p> | | | |
| Prerequisites to participate in the module: BA including Computer Science | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture / Tutorial | 4 + 1 | Attendance (60h); Preparation (120 h); Exam preparation (60 h) | <p>Die Vorlesung gibt einen Überblick über Themen der Computergraphik und des Visual Computings. | Mandatory Elective Module in Information Systems and Computer Science: Automatisierung industrieller Workflows Responsible: Prof. Fischer | Study Points: 8 | | | | | | | | | | | | | | | | | | | | | | | | |
|--|---|--|-------------------------------------|---------------|--------|---------|---|--|-------------------------------------|------------|---|--|-------------------------------------|--------------------|---|--|--|------------------------|---|--|--|---------------------------|---|--|--|
| <p>Goals:</p> <p>Die Vorlesung gibt einen Einblick in die mathematischen und systemtheoretischen Grundlagen der Computersimulation zeitdiskreter Systeme. Eine dominierende Rolle spielt dabei der Ansatz der objektorientierten Prozesssimulation. Die vermittelten Methoden werden an Hand ausgewählter Modellierungssprachen (u.a. GPSS, SLX und UML) exemplarisch für die Modellierung, Dokumentation, simulative Ausführung, Leistungsbewertung und Optimierung realer Workflows praktisch angewendet. Die betrachteten realen Workflows dienen der Steuerung automatisierter Fertigungen. Sie stammen beispielhaft aus einem Projekt im Stahlwerksbereich. Ziel des Projektes ist es, Modelluntersuchungen weitestgehend so zu automatisieren, dass daraus konkrete Arbeitsprofile für die konkrete Produktion generiert werden können. Die Vorlesung wird durch die am Institut entwickelten Walzwerkssimulatoren (C++) und Animatoren (Java) und durch Exkursionen vor Ort unterstützt.</p> <p>Die Studierenden lernen reale Probleme bei der modelltechnischen Erfassung und abstrakten Repräsentation komplexer domänenspezifischer Arbeitsgänge der Fertigungstechnik in Form einer arbeitsteiligen Herangehensweise kennen. In der begleitenden Vorlesung werden die Grundlagen zur Workflow-Modellierung, einschließlich ihres Zeit- und geteilten Ressourcenverbrauchs erarbeitet. Vermittelte Methoden der Next-Event-Simulation bilden im Praktikum nicht nur die Grundlage zur semantischen Präzisierung von UML, sondern auch die Basis für die Ausführung adaptierter UML-Zustands- und Aktivitätsdiagramme als Workflow-Modelle. Schließlich haben sich die Studierenden mit der Übertragbarkeit von gewonnenen Modellwahrheiten in die Produktionsrealität auseinander zu setzen.</p> | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>Prerequisites to participate in the module: BA including Computer Science, basic mathematical knowledge, skills in one object-orientated programming language (i.e. Java)</p> | | | | | | | | | | | | | | | | | | | | | | | | | |

| Wahlpflichtmodul der Wirtschaftsinformatik und Informatik (Vertiefungsgebiet): Techniken und Konzepte zum Schutz der Privatsphäre Responsible: Prof. Freytag | | | Study Points: 6 |
|---|------------------|--|--|
| Goals: | | | |
| Kenntnisse über Möglichkeiten zum Schutz der Privatsphäre; Kenntnisse zur Datenanalyse und Sensibilisieren bei Rückschlussmöglichkeiten auf Eigenschaften individueller Personen (De-Identification). | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 6; Attendance (60h); Preparation (90 h); Exam preparation (30 h) | Diese Vorlesung für Fortgeschrittene im Bereich Datenbanken und Informationssysteme gibt einen Überblick über Konzepte und Techniken zum Schutz der Privatsphäre bei der Bearbeitung großer Mengen personenbezogener Daten, aber auch beim Austausch von Daten in ubiquitären Systemen. Es werden unterschiedliche Schutzverfahren (Anonymisierung, differential Privacy) und Möglichkeiten der Anfragen auf geschützten Daten vorgestellt. Weiterhin werden auf Anwendungsszenarien eingegangen und die vorgestellten Lösungen auf Ihre Passfähigkeit hin bewertet. |
| Module examination | | Oral exam (30 min); as well as oral interviews during the semester and successfully completing the tasks | |
| Duration of the Module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in: | | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester (irregularly) | |

| Mandatory Elective Module Business Administration: General Management | | | Study Points: 6-30 |
|---|------------------|--|---|
| Goals: | | | |
| The mandatory module General Management aims at equipping students with necessary backgrounds in all relevant areas of management science, including finance and accounting. Students are suggested to select courses so that they obtain advanced background knowledge in the areas where they did not acquire sufficient skills in their undergraduate studies. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial Introduction to Financial Accounting | 2 | 3; Attendance (30 h), Literature study (30 h), Exam preparation (30 h). | The goal of the course is to present students the basics of financial accounting. The course comprises three main parts. The first part deals with the objectives of financial accounting and the question why and how financial accounting is regulated. The second part provides an introduction to group accounting including details on consolidation methods and cash flow statements. The third part focuses on specific accounting rules under International Financial Reporting Standards (IFRS). |
| Lecture/ Tutorial Financial Statement Analysis | 2 | 3; Attendance (30 h), Literature study (30 h), Exam preparation (30 h). | The goal of the course is to offer students the foundations of financial statement analysis. It covers theoretical foundations as well as practical aspects. The course introduces corporate reporting as one of the main information sources for financial statement analysis, and covers topics related to strategy analysis, financial analysis, forecasting methods and valuation models. The last part of the course presents equity security analysis and credit analysis. |
| Lecture Economics of Entrepreneur ship | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | The lecture aims at investigating entrepreneurship and innovation from an economic point of view. It covers venture financing, running and terminating a venture, and government policy. |
| Lecture International Financial Management (German) | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Institutionelle und theoretische Analyse internationaler Finanzmärkte und ihrer Bedeutung für Finanzierungsentscheidungen |
| Lecture Marketing Management | 2 | 3; Attendance (30 h) Required readings (30 h) Exam preparation (30 h) | Theories and strategies of marketing management and their corresponding instruments |
| Integrated Lecture Corporate Finance | 4 | 6; Class attendance (60 h) Literature study (30 h) Preparation of and participation in tutorial sessions (60 h) | Corporate financing, corporate cash management, capital structure, dividend policy, Company & project valuation |

| | | | |
|--|---|--|---|
| | | Exam preparation (30 h) | |
| Lecture Grundzüge der Besteuerung (German) | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Grundprinzipien der Besteuerung; Grundzüge des deutschen Unternehmensteuerrechts (Einkommen-, Körperschaft- und Gewerbesteuer) |
| Module examinations | Written exam (60 min) Corporate Finance: Written exam (90 min) | | |
| Duration of the module | <input type="checkbox"/> 1 Semester <input checked="" type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester | | |

| | |
|---|----------------------------------|
| <p>Mandatory Elective Module Business Administration: Entrepreneurship and Innovation</p> <p>Responsible: Schade</p> <p>Goals:</p> <p>Lecture and Tutorial 1: Students learn what the psychological characteristics of entrepreneurs are, and how entrepreneurial decisions are made. Theories span optimization, decision making under risk and uncertainty, and game theoretic approaches. Normative perspectives and descriptive findings are confronted. Decision anomalies in entrepreneurial behavior are covered. The lecture covers empirical findings on the entrepreneurial personality and basic models of (descriptive) game and decision theory.</p> <p>The tutorials re-examine theories, models and methods introduced during lectures and make intensive use of assignments (e.g. questionnaire experiments) to empirically analyse the issues covered by this course. The tutorials provide an introduction into analysis of data on entrepreneurial decisions with SPSS.</p> <p>Lecture 2: Entrepreneurs as well as established companies may want to forecast innovation spread and effectively manage the marketing of an innovation. The lecture aims at introducing students to basic theories of and statistical approaches to the marketing of innovations.</p> <p>Lecture and Tutorial 3: The lecture covers the scientific basics of experimentation and experimental design with a special emphasis on experimental economics. Examples analyzed are predominately from the area of entrepreneurship and innovation. The course will also cover an introduction into programming of experiments and statistic / econometric analysis of experimental data. A second focus will be on modeling scenarios relevant to entrepreneurship and innovation as predictions for experiments.</p> <p>The tutorials provide exercises on the basis of the underlying experimental designs and models as well as discuss statistical methods to evaluate experimental data. The tutorials introduce and practice the experimental data analysis techniques with SPSS software during computer sessions.</p> <p>Lecture 4 covers application of advanced economic and management research to entrepreneurship and innovation.</p> | <p>Study Points: 6-18</p> |
| <p>Prerequisites to participate in the module: none</p> <p>In order to successfully complete this module, you have to accomplish 6 SP (180h).</p> | |

| Course | Periods/ Week | SP; work load | Topics |
|---|------------------|---|--|
| Lecture + Tutorial 1 Entrepreneurial Decision Making | 4 | <p>6;</p> <p>Lecture: Visiting the lecture (30 h) Preparation for courses (30 h) Exam preparation (30 h)</p> <p>Tutorial: Attendance of sessions (30 h) Preparation for tutorial sessions (15 h) Assignments (45 h)</p> | <p>Lecture: Differential psychology of entrepreneurs, decision and game theoretic models of entrepreneurship</p> <p>Tutorial: Exercise questions, empirical studies, analysis of data on entrepreneurial decisions with SPSS</p> |
| Lecture 2 Marketing of Innovations | 2 | <p>3;</p> <p>Visiting the lecture (30 h) Preparation for courses (30 h) Exam preparation (30 h)</p> | Theories of innovation diffusion, innovation adoption and innovation marketing |
| Lecture + Tutorial 3 Design of Decision Experiments | 4 | <p>6;</p> <p>Lecture: Visiting the lecture (30 h) Preparation for the courses (30 h) Exam preparation (30 h)</p> | <p>Lecture: Theory and modern research on design of decision experiments, using models to derive predictions, statistical analysis of experimental data</p> |

| | | | |
|--|-------|--|---|
| | | Tutorial: Attendance of sessions (30 h), Preparation for tutorial sessions (60 h) | Tutorial: Exercises applying the knowledge of the lecture, analysis of experimental data with SPSS |
| Lecture 4 Advanced Research on Entrepreneurship and Innovation (irregular schedule, depending on the availability of guest professors; see the precise name of the lecture in schedule) | 2 - 4 | 3 - 6; Lecture: Visiting the lecture (30 h) Preparation for courses (30 h) Exam preparation (30 h) Depending on the instructor the lecture might be accompanied by a tutorial, in this case: Attendance of sessions (30 h) Preparation for tutorial sessions (15 h) Assignments (45 h) | Lecture: Application of economic and management research to entrepreneurship. Tutorial: Exercises and model application; small empirical studies |
| Module examinations | | Lecture and Tutorial 1: Written Examination (90 minutes, 70% of final mark); Assignments (30% of final mark) Lecture 2: Written Examination (60 minutes) Lecture and Tutorial 3: Written Examination (90 minutes) Lecture 4 (depending on the lecturer): Written exam (60 minutes if 3 SP, 90 minutes if 6 SP) or assignment and presentation of results or assignment and written exam (60 minutes if 3 SP, 90 minutes if 6 SP) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester or | |

| Mandatory Elective Module Business Administration: Research-Seminar on Entrepreneurship and Innovation | | | Study Points: 6 |
|--|------------------|---|-------------------------------------|
| Responsible: Schade | | | |
| Goals: In the seminar, students will either design and conduct an experiment or work extensively on an economic or econometric model. Results are presented at a joint retreat out of Berlin. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Research-Seminar | 2 | 6; Seminar attendance (30 h) Study of the relevant literature (30 h) Preparation, presentation and discussion of the seminar paper (120 h) | Conducting a small research project |
| Module examinations | | Seminar paper + presentation and discussion | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module Business Administration: Finance Responsible: Müller | | | Study Points: 6-27 | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|--|------------------|---|---|--------|------------------|---------------|--------|---|---|--|---|---|---|--|---|--|---|---|---------------------------------|--|---|---|-----------------------|--------------------|---|---|-------------------|---------|---|-------------------------|----------------------------|
| <p>Goals:</p> <p>To gain a deep understanding of advanced issues in financial decision making.</p> <p>The lecture <u>“International Financial Management”</u> will focus on how to model financial problems and solve them using both national and international financial markets.</p> <p>The lecture <u>“Finanzierungstheorie”</u> aims at broadening the understanding of financial decision making through the application of normative and descriptive decision and game theoretic models. The tutorials will revisit these models and apply them to problems and discuss them in the financial context.</p> <p>The seminar <u>“Market Microstructure”</u> covers recent developments in trading rules at organized exchanges and trading platforms, both theoretically und experimentally.</p> <p>During the <u>seminar “Finance”</u> students will do some research on their own by applying these methods of lectures and tutorials to complex cases.</p> <p>During the <u>seminar “Topics in Finance: Leasing”</u> students will do some research on their own by applying these methods of lectures and tutorials to problems of Leasing.</p> <p>In the lecture <u>“Börsen und ausserbörsliche Handelsplattformen”</u> students will learn about the latest and relevant developments in trading at exchanges and other trading platforms.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

|--|---------------------------|--|---|
| <p>Lecture International Management (Dr. Anna-Maria Schneider)</p> <p>Das Ziel der Lehrveranstaltung ist das Themenfeld des Internationalen Managements vertiefend zu betrachten. Neben der kritischen Reflexion von Theorien und empirischen Studienergebnisse wird durch Fallstudien der Praxisbezug hergestellt. Die Komplexität und Unterschiedlichkeit der Internationalisierungsprozesse soll aufgezeigt werden. Verschiedene alternative Internationalisierungsmodelle und Markteintrittsformen werden behandelt und kritisch hinterfragt. Ferner thematisiert die Lehrveranstaltung den internationalen Wettbewerb und mögliche Kooperationsformen zwischen den Unternehmen. Des Weiteren werden unternehmensinterne Handlungsfelder wie die das Wissens- & Innovationsmanagement und der Zuliefererauswahlprozess im Rahmen der Lehrveranstaltung näher beleuchtet. Sprache: deutsch</p> | | | |
| <p>Seminar Supply Chain Management (Dr. Anna-Maria Schneider)</p> <p>Das Ziel der Lehrveranstaltung ist sich spezifisch mit relevanten Themen des Supply Chain Managements zur beschäftigen. Anderseits sollen die Fähigkeiten der Studierenden in Bezug auf das wissenschaftliche Arbeiten, das Diskutieren theoretischer Ansätze und praxisbezogener Problemfelder sowie die Präsentation der eigenen Forschungsergebnisse gefestigt werden. Themenfelder wie die Globalisierung von Zulieferernetzwerken, Beschaffungsstrategien von Unternehmen, Supplier Relationship Management und Sustainable Supply Chain Management werden im Rahmen des Seminars analysiert und diskutiert.</p> <p>Sprache: deutsch</p> | | | |
| <p>Seminar Management (Dr. Sarah Jastram)</p> <p>Das Seminar behandelt aktuelle Themen in der Management-Lehre. Die Studierenden werden vornehmlich englische wissenschaftliche Fachpublikationen auswerten und die erlernte Theorie anhand von praktischen Fallstudien anwenden und vertiefen.</p> | | | |
| <p>Research seminar Leadership (Prof. Dr. Barbara Beham)</p> <p>Students develop and conduct their own research project on an actual topic in leadership research. Sprache: englisch/deutsch</p> | | | |
| Prerequisites to participate in the module: none | | | |

| Mandatory Elective Module Business Administration: Marketing Responsible: Klapper | Study Points: 6-21 | | | | | | | | | | | | | | | | | | | | |
|--|---------------------------|--|---|---------------|--------|--|---|--|---|--|---|--|---|--|---|--|---|--|---|--|---|
| Goals: | | | | | | | | | | | | | | | | | | | | | |
| <p>Advanced Marketing Modelling: Teaching and in depth discussion of advanced methods to empirically determine the causal relationship between marketing activities and firms' objectives. Special attention is given to modelling the effects of marketing on sales and market share data with discrete choice models for individual purchase data and aggregate sales data. In exercise courses students learn how to apply these methods to real data. Successful participation in this class will enable students to quantify the impact of marketing on key performance measures and to evaluate the success of marketing activities.</p> <p>Customer Analytics and Customer Insights: Teaching and in depth discussion of the basic concepts and methods to gain detailed understanding about firms' (potential) customers and their preferences. These insights will provide the basis for brand management and for strategic marketing decisions, especially the design of new products and the management of products over their life cycle. Students will also learn how to measure customer needs, understand how customers perceive the product and service offerings of a firm and its competitors. We particular focus on estimating consumer preferences for product characteristics and brands within the framework of discrete choice models and conjoint analysis.</p> <p>Marketing Management (if not selected in the General Management): Teaching and in depth discussion of the marketing management process. Special attention is given to strategic marketing and the management of the marketing instruments. Successful participation in this class will enable students to evaluate marketing activities and to understand how marketing affects firms competitive position in the market.</p> | | | | | | | | | | | | | | | | | | | | | |

| Mandatory Elective Module Business Administration: Accounting Courses Responsible: Gassen/Maiterth | | | Study Points: 6-18 |
|---|---------------|--|---|
| Goals: | | | |
| This module contains elective classes for master students. Students do not have to be enrolled into the accounting specialization in order to enroll into these classes. | | | |
| Prerequisites to participate in the module: Students need a thorough understanding of financial accounting, both based on HGB and on IFRS, of financial statement analysis and of group accounting. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial Introduction to Financial Accounting | 2 | 3; Attendance (30 h), Literature study (30 h), Exam preparation (30 h). | The goal of the course is to present students the basics of financial accounting. The course comprises three main parts. The first part deals with the objectives of financial accounting and the question why and how financial accounting is regulated. The second part provides an introduction to group accounting including details on consolidation methods and cash flow statements. The third part focuses on specific accounting rules under International Financial Reporting Standards (IFRS). |
| Lecture/ Tutorial Financial Statement Analysis | 2 | 3; Attendance (30 h), Literature study (30 h), Exam preparation (30 h). | The goal of the course is to offer students the foundations of financial statement analysis. It covers theoretical foundations as well as practical aspects. The course introduces corporate reporting as one of the main information sources for financial statement analysis, and covers topics related to strategy analysis, financial analysis, forecasting methods and valuation models. The last part of the course presents equity security analysis and credit analysis. |
| Lecture/ Tutorial Accounting Theory and Earnings Management | 3 | 6; Attendance (30 h) Literature study (30 h) Preparation of and participation in Tutorial sessions (45 h) Homework (45 h) Exam preparation (30 h) | Institutions of accounting; the role of accounting based information from a valuation and from a contracting perspective; accounting and capital market based asset pricing, incentives and earnings management |
| Lecture/ Tutorial Advanced Topics in Accounting | 2 | 3; Attendance (30 h), Literature study (30 h), Exam preparation (30 h) | Topics include but are not limited to: accounting for lease transactions, accounting for financial instruments, hedge accounting, accounting for stock based compensation, accounting for special purpose entities, special industry accounting, recent regulative changes in standard setting, auditing and corporate governance, valuation based on accounting information, earnings management. |
| Applied Seminar Advanced Cases in Accounting | 2 | 6; Seminar attendance (30h), Literature study (30 h) Preparation, presentation and discussion of the team case-study (60 h), | The cases discussed in this seminar encompass a wide variety of subject, ranging from specific problems in accounting measurement over valuation related problems in IPO or merger and acquisitions settings to problems related to |

| | | | |
|--|---|---|---|
| and Auditing | | Preparation of other cases and participation in the course (60 h). | the identification of fraudulent earnings management |
| Research Seminar Empirical Methods in Accounting and Finance | 2 | 6; Seminar attendance (30h), study of the relevant literature (30 h), preparation, presentation and discussion of the group assignments (90 h), exam preparation (30 h). | This course aims at equipping students with the skill-set to design and conduct empirical studies based on observational (archival) data in the fields of accounting and finance. After successful completion of the course students should understand the fundamentals and common pitfalls of quasi-experimental research design, be familiar with matching mechanisms, instrumental variable and panel data approaches which help with causal inference, be aware of limitations of these research designs, and, using the statistical software packages STATA and/or SAS, have gathered experiences in designing and conducting large-scale research projects. |
| Research Seminar Financial Accounting Research Group | 2 | 6; Seminar attendance (30 h), study of the relevant literature (30 h), preparation and discussion of the assignments (120 h). | This seminar is targeted at interested students which have an active interest in current financial accounting topics and in cutting-edge financial accounting research. The main objective of this seminar is to introduce eligible students to current research in the area of financial accounting and auditing. In this context, we will provide participants with the necessary skills to comprehend common research design choices and to identify shortcomings of these choices. To achieve this, participants of the seminar will be invited to several lectures, tutorials and talks of international guests, which will take place at the institute. Since it is common to discuss the content of these talks beforehand, participants will also be invited to the corresponding discussion meetings at the institute. In addition, we will invite leading industry experts to discuss current financial accounting topics with us in a small colloquial atmosphere. Each seminar period will last for one academic year and we expect participating students to commit to the full year. |
| Lecture/ Tutorial Umwandlung von Unternehmen und Besteuerung (German) | 3 | 4,5; Attendance (30 h), Literature study (30 h), Preparation and participation in tutorial sessions (45 h); Exam preparation (30 h) | Taxation of restructuring of enterprises according to the German Reorganisation Tax Law; tax-optimal design of reorganisation processes, effects of taxation on the company purchase. The classes are held in German. |
| Lecture Steuerwirkungslehre (German) | 2 | 3; Attendance (30 h), Literature study (30 h), Exam preparation (30 h) | Integration of the German profit taxes (income tax, corporation tax and trade tax) in common management decision models to analyse the effects of taxation on business decisions; the focus is on the impact of taxation on corporate investment and financing decisions in a national and international context. The classes are held in German. |
| Lecture/Tuto | 4 | 6; | Taxation of inbound and outbound |

| | | | |
|---|---|---|--|
| rial Internatio- nale Unter- nehmensbe- steuerung (German) | | Attendance (60 h), literature study, preparation (60 h); exam preparation (60 h) | investments, double taxation agreements, controlled foreign corporation rules, optimal policy of investment and financing decisions taking into account taxation. The classes are held in German. |
| Seminar Fallstudien zur Steuer- wirkungs- lehre (German) | 2 | 4,5; Attendance (30 h), Literature study (30 h), Exam preparation (30 h) | The effects of German profit taxes (income tax, corporation tax and trade tax) are analysed applying complex practice-oriented case studies. The classes are held in German. |
| Lecture/ Tutorial Steuerliche Gewinn- ermittlung (German) | 3 | 4,5; Attendance (30 h), literature study (30 h), preparation and participation in tutorial sessions (45 h); exam preparation (30 h) | Tax accounting regulations, relation between tax and financial accounting, taxation of formation and liquidation of an enterprise and tax specifics of partnerships. The classes are held in German. |
| Guest lecture Umsatz- steuer und steuerliches Verfahrens- recht (German) | 2 | 3; Participation in Course (30 h), Self-study (30 h), Exam preparation (30 h) | Students learn about the German value added tax system on the basis of practical examples of tax jurisdiction and tax issues of firms. They get familiar with systematic aspects of German value added tax law. Main topics are deliveries and services, group taxation, input tax deduction and correction of input tax deduction. In procedural tax law students learn to apply the procedural rules of the German fiscal code. In addition, they get to know the interaction of procedural and substantive law. Key points are the tax bill, legal means, the tax appointment period and modification regulations. Furthermore the students are introduced to the German criminal code for tax offences. |
| Guest lecture Internatio- nale Steuer- planung in der Praxis (German) | 2 | 3; Participation in Course (30 h), Self-study (30 h), Exam preparation (30 h) | Variable topics The classes are held in German. |
| Module examinations | | Lecture/Tutorial: Written exam (60 - 120 min) or oral exam, Applied Seminar Advanced Cases in Accounting and Auditing: Preparation, presentation and discussion of the team case-study, participation in the seminar Research Seminar Empirical Methods in Accounting and Finance: Assignments (40 %) and written exam (60 %) Research Seminar Financial Accounting Research Group: Written Reviews Case study seminar: Written or oral exam (60 min) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module Business Administration: Accounting Research Seminar (Master thesis seminar Accounting) | | | Study Points: 6 |
|--|-----|---|---|
| Responsible: Gassen | | | |
| Goals: | | | |
| This seminar aims at developing the research skills which Master students need to develop and write a master thesis in the area of accounting. Students, who wish to write a master thesis at the Institute of Accounting and Auditing, have to enrol in and successfully complete this seminar. | | | |
| Prerequisites to participate in the module: Students need a thorough understanding of the underpinnings of accounting, and have to complete the Master module Accounting as a field of specialization. | | | |
| Course | SWS | SP; work load | Topics |
| Accounting Research Seminar | 2 | 6; Attendance (30 h) preparation of a replication study with given data (90 h) presentation of influential articles of the field (30 h) preparation of a reviewer report for a working paper (30 h) | Students have to identify their own research question and develop a research exposé which provides the motivation for the research question and also explains the methodology the student will be using to address the research question. Based on this research exposé students can apply for a slot in the Seminar (acceptance to the seminar is limited). In the seminar, students will be presented with a methodological walk-through of different areas of accounting research. Also, students will be required to present and summarize influential papers in their respective research areas. |
| Module examinations | | Exposé development (40%), paper presentation (20%), homework (20%), class discussion (20% of final mark) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester or <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module Business Administration: Master Tax Seminar (Master thesis seminar Tax) | | | Study Points: 6-12 |
|---|--|---|--|
| Responsible: Maiterth | | | |
| Goals: | | | |
| The seminar aims at developing the research skills which Master students need to write a master thesis in the area of business taxation. Students, who intend to write their master thesis at the Institute of Business Taxation, are required to complete this seminar successfully. | | | |
| Requirements for participation: Students need a profound knowledge of institutional details and economic effects of business taxation, and have to complete the Master module Accounting as a field of specialization. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Master Tax Seminar (German) | 2 | 6; Seminar attendance (30h), preparation of the seminar paper (90h), presentation of the seminar paper, preparation and discussion of other seminar papers (60h) | During the seminar students deal with current tax issues and tax reforms respectively tax reform proposals in a national and international context. The classes are held in German. |
| Current Issues in Tax Accounting (German) | 2 | 6; Seminar attendance (30h), Preparation of the seminar paper (90h), Presentation of the seminar paper, preparation and discussion of other seminar papers (60h) | In this seminar we discuss varying issues in taxation. The classes are held in German. |
| Module examinations | Seminar paper (50 %), presentation of the seminar paper and discussion of other seminar papers (50 %) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester or <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Administration: Financial Economics Responsible: Adam, Stomper | | | Studienpunkte: 6-18 |
|--|------------------|---|---|
| Goals: This module contains elective classes for master students interested in finance. All courses are taught in English. | | | |
| Prerequisites: Knowledge of the principals of finance theory: capital asset pricing model (CAPM), efficient market hypothesis, Markowitz portfolio selection, Modigliani-Miller theorem, DCF valuation. The last two concepts are covered in the IV Corporate Finance. | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Integrated Lecture Corporate Finance | 4 | 6; Class attendance (60 h) Literature study (30 h) Preparation of and participation in tutorial sessions (60 h) Exam preparation (30 h) | Corporate financing, corporate cash management, capital structure, dividend policy, company & project valuation |
| Lecture/ Tutorial Financial Engineering | 4 | 6; Class attendance (60 h) Literature study (30 h) Preparation of tutorial sessions (60 h) Exam preparation (30 h) | Forwards and futures, option pricing in the binomial model and the Black Scholes model, estimation of risk-neutral densities, and applications |
| Lecture/ Tutorial Asset Management | 4 | 6; Class attendance (60 h) Literature study (30 h) Preparation for tutorial sessions (60 h) Exam preparation (30 h) | Portfolio theory, the Capital Asset Pricing Model, Arbitrage Pricing Theory, Stock Valuation |
| Lecture Real Effects of Finance | 2 | 3; Class attendance (30 h) Literature study (30 h) Exam preparation (30 h) | Effects of financial market development(s) on non-financial markets such as product and labor markets |
| Seminar Real Effects of Finance | 2 | 6; Class attendance (30 h) Literature study (60 h) Preparation of the seminar paper and presentation (90 h) | Effects of financial market development(s) on non-financial markets such as product and labor markets |
| Lecture/ Tutorial Advanced Corporate Finance | 4 | 6; Class attendance (60 h) Literature study (30 h) Preparation for tutorial sessions (60 h) Exam preparation (30 h) | Impact of agency costs and information asymmetries on optimal capital structure, bankruptcy, project finance, payout policy, corporate governance, executive compensation |
| Lecture Private Equity | 2 | 3; Class attendance (30 h) Literature study (30 h) Exam preparation (30 h) | Mergers & acquisitions, private equity, venture capital. This course builds on the materials covered in Advanced Corporate Finance. |
| Case Seminar Corporate Finance | 3 | 6; Class attendance (45 h) Preparation, presentation and discussion of the team case-study (135 h) | This seminar discusses case studies that relate to the materials covered in Corporate Finance and Advanced Corporate Finance |

| | | | |
|---|---|---|--|
| Seminar Advanced Financial Economics – Asset Pricing | 2 | 6; Class attendance (60 h) Literature study (60 h) Preparation of the seminar paper (60 h) | The seminar discusses papers on asset pricing and market microstructure at an introductory PhD level |
| Lecture/ Tutorial Advanced Financial Economics – Corporate Finance | 3 | 6; Class attendance (45 h) Literature study (90 h) Exam preparation (45 h) | The seminar discusses papers on corporate finance at an introductory PhD level |
| Lecture Financial Markets Regulation (PhD Course) or Seminar Financial Markets Regulation (PhD Course) | 2 | 6; Class attendance (30 h) Preparation for Courses (30 h) Literature Study (90 h) Exam preparation (30 h) | This course introduces students to the regulation of financial markets and the participants in these markets at the PhD level. Topics: Impact of financial disclosure requirements on corporate policies, financial market frictions, economics of financial crises |
| Module examinations | | | Lectures: Written exams (60 or 90 min) Lecture or Seminar Financial Markets Regulation (Ph.D. Course): Written exam (120 min) or several research proposals Case Seminar: Case reports (80 %), presentations (20 %) Seminars Advanced Financial Economics II and III: Seminar paper (100 %) Other seminars: Seminar paper (80 %), presentations (20 %) |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester | | |
| Module can be started in | <input checked="" type="checkbox"/> WS <u>or</u> <input checked="" type="checkbox"/> SS | | |

| Mandatory Elective Module Business Administration: Thesis Seminar Corporate Finance Responsible: Adam | Study Points: 6 | | |
|--|------------------------|--|--|
| Goals: This seminar is designed for students who wish to write a master thesis at the institute of corporate finance. Most theses will be of an empirical nature. Therefore, sound econometrical and programming skills are essential. Before selecting this modul , students should have successfully completed the mandatory courses of the Mandatory Elective Modul: Financial Economics | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar Hauptseminar/Thesis Seminar Corporate Finance | 4 | 6; Seminar attendance (60 h) Literature study (30 h) Preparation, presentation and discussion of the seminar paper (90 h) | This course covers advanced topics in corporate finance, as well as major econometric techniques used in empirical corporate finance research. The goal is to prepare students for writing a master thesis at the Institute of Corporate Finance. |
| Module examinations | | Seminar paper (50 %), presentations (50 %) | |

| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Administration: Topics in Theory of Markets and Organizations I/II (Ph.D. – Level) Responsible: Hubert | | | Study Points: 9-18 |
|--|--|--|--|
| Goals: The courses cover recent developments in the theory of coordination within organizations and markets. The focus is on research methodology. | | | |
| Prerequisites to participate in the module: Solid background in microeconomics | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture 1 | 4 | 9; Attendance (60 h) Reading paper(120 h) Preparation of presentations and examination (90 h) | Agency problems, incentive contracts, performance measurement, multitask agency relationship, asset ownership and job design, executive compensation, contests, bargaining theory and coalition formation, merger analysis |
| Lecture 2 | 4 | 9; Attendance (60 h) Reading paper(120 h) Preparation of presentations and examination (90 h) | Vertical structures, hierarchy und decision making in committees, bounded rationality, economic psychology and experiments. |
| Module examinations | Lecture 1: Written exam (90 min, 50 %), presentation (50 % of final mark) Lecture 2: Written exam (90 min, 50 %), presentation (50 % of final mark) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Administration: Topics in Energy and Network Economics | | | Study Points: 6 - 15 |
|---|---|---|---|
| Responsible: Hubert | | | |
| Goals: | | | |
| <p>In many countries network based supply systems (electric power and gas) have seen a major structural change from heavily regulated, vertically integrated monopolies towards systems in which coordination over markets and competition play a larger role. We take these industries as an example to analyze market design and strategic behavior.</p> <p>Students should first take the lecture "network based energy systems". As an option they may complement the lecture with the seminar "energy systems" (presentations only) which is offered in parallel. In the following term, they can choose between one of the main seminars.</p> | | | |
| Prerequisites to participate in the module: The module is for students who have a (MA-level) background in microeconomics, industrial organization, and game theory. The courses "analysis of competition" in combination with "microeconomics" provide the necessary background. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture and Tutorial Network based energy systems | 4 | 6 Attendance (60 h), Preparation (120 h) | Energy an overview, network based energy systems: gas & power, reform of the industry, restructuring and access rights, market design, gaming power markets, nodal pricing, zonal pricing, market coupling, strategic investment in international energy transport systems, energy security, investment and third party access, contracts and competition |
| Seminar A Energy Systems | 2 | 3; Attendance (30h), Preparation (60h) | Each student makes several presentations on different aspects of energy systems. The focus is on presentation skills. |
| Seminar B 'Gaming' and designing energy markets | 2 | 6; Attendance (30h), Preparation (150 h) | Students make presentations and write a thesis paper either on a theoretical topic or on an empirical assessment related to strategic behaviour in energy markets, usually starting from one academic paper. |
| Seminar B Energy Policy | 2 | 6; Attendance (30h), Preparation (150 h) | Students make presentations and write a thesis paper on a broader topic in energy policy. |
| Module examinations | Lecture: Written examination, 90 minutes Seminar A: Presentation (70%), Discussion (30%) Seminar B: Seminar Paper (60%), Presentation (30%), Discussion (10%) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester or <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Business Administration: Real Estate Economics | | | Study Points: 6 |
|--|------------------|--|---|
| Responsible: Hubert | | | |
| Goals: For most people buying or not buying a house is the single most important investment decision in their life. It is taken in an environment which is quite different from the "perfect market set up" which is often investigated in finance. Students shall learn how to address the particularities of real estate investments working with selected contributions from the theoretical and/or empirical literature. | | | |
| Students are expected to write a seminar paper, make a presentation, and participate in the discussion. | | | |
| Prerequisites to participate in the module: This seminar is for students who have a solid background in finance and econometrics and some basic knowledge in real estate economics. It covers a wide range of theoretical and empirical issues in real estate valuation, dynamics of real estate markets and institutional features. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar "Real Estate Economics" | 2 | 6; Attendance (30h), Preparation and Presentation of Seminar paper (150 h) | Selected topics e.g.: Real estate prices and price risk, transaction behaviour, real estate in portfolio, renting versus owning, mobility, real estate and the aggregate economy |
| Module examinations | | Seminar: Seminar Paper (70%), Presentation (30% of final mark) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module Business Administration: Analysis of Competition Responsible: Hubert | Study Points: 6 | | |
|---|--|--|---|
| Goals: | | | |
| <p>The course covers models and tools for the analysis of strategic interaction with competitors and 'complementors'. It is similar to a course in industrial economics, but topics are selected according to their relevance for the study of network based energy-systems (electric power and gas-industry).</p> <p>The course is designed for students in their first semester master studies. It prepares students for the modul: "Topics in Energy and Network Economics".</p> | | | |
| <p>Prerequisites to participate in the module: Previous exposure microeconomics and game theory is useful but not indispensable, as the basic notions of non-cooperative and cooperative game theory will be explained when needed.</p> <p>You should not take the course if you already have taken (master level) courses in microeconomics, game theory and industrial organization.</p> | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture and Tutorial Analysis of Competition | 4 | 6 Attendance (60 h), Preparation (120 h) | 'Co-opetition' & PARTS, using market power, strategic interaction with competitors & complementors, market entry, commitment, vertical chains & networks, boundaries of the firm. |
| Module examinations | Lecture: Written examination, 60 minutes | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester or <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Advanced Microeconomics Responsible: Strausz, Weizsäcker | | | Study Points: 6 |
|---|--|---|---|
| Goals: The lecture plus tutorial listed below are a mandatory course on advanced microeconomics. The course emphasizes a sample of topics ranging from the theory of competitive markets, to industrial organization, welfare economics, information, and incentives. The lectures are supplemented by problem solving exercises and in class presentations by participants. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Introduction to Advanced Micro- economic Analysis | 2 | 3; Attendance (30 h) Reading the relevant literature (60 h) | General Equilibrium; Partial Equilibrium; Externalities; Imperfect Competition; Asymmetric Information; Behavioral Aspects |
| Tutorial Introduction to Advanced Micro- economic Analysis | 2 | 3; Attendance (30 h) Solve exercises and preparations for presentations in class (30 h) Exam preparation (30 h) | Exercises and model application |
| Module examinations | Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Advanced International Trade Responsible: Strausz | Study Points: 6 | | |
|--|--|--|---|
| Goals: This course presents international trade theory at the advanced level. The course focuses on general equilibrium approaches to modeling trading relations. Topics covered include models of trade with constant returns and perfect competition, models of trade with variable returns and imperfect competition, positive and normative analyses of commercial policy, the political economy of trade policy, and topics related to offshoring/outsourcing. | | | |
| Prerequisites to participate in the module: Basics in Microeconomics (general equilibrium, imperfect competition) | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial Advanced International Trade | 2 | 6; Attendance (60 h) Preparation (90 h) Exam preparation (30 h) | comparative advantage, outsourcing, patterns of international trade, instruments of trade policy, monopolistic competition, strategic trade policy, economic geography, political economy |
| Module examinations | Lecture/Tutorial: Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Theory of Incentives Responsible: Strausz | Study Points: 6 | | |
|--|--|--|--|
| Goals: | | | |
| <p>The course reviews the main topics and models of the incentive theory. It focuses on the principal-agent paradigm where the principal delegates an action to a single agent through the take-it-or-leave-it offer of a contract. Major topics are represented by the problem of adverse selection, which occurs when the agent learns some piece of information relevant to the contractual relationship, and the problem of moral hazard, which appears as soon as the agent's actions are not observable. First, the trade-offs that emerge in these contexts are characterized: the rent extraction-efficiency trade-off under adverse selection and the trade-offs between the extraction of limited liability rent and efficiency and also between insurance and efficiency under moral hazard. Then, extensions of the basic framework to more complex environments are discussed. Mixed models with adverse selection, moral hazard and nonverifiability of the state of the world are also treated. Principal-agent models with adverse selection and moral hazard are finally considered in a dynamic context.</p> | | | |
| Prerequisites to participate in the module: Basics in microeconomics "Introduction to Advanced Microeconomic Analysis" and "Game Theory" | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture + Tutorial Theory of Incentives | 4 | 3; Attendance (60 h) Preparation (90 h) Exam preparation (30 h) | The Problem of Adverse Selection, Revelation Principle, Solution Techniques, Ex-Post vs. Ex-Ante Contracting, Limited Liability, The Problem of Moral Hazard, First-Order-Approach |
| Module examinations | Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: European Integration Responsible: Burda | | | Study Points: 6 |
|--|------------------|--|-----------------------------------|
| Goals: To gain a deeper understanding of the real and monetary aspects of European economic integration by applying theoretical concepts and using basic tools of empirical analysis. The lecture course designed to introduce the student to both theoretical and applied issues involving the economic integration process in Europe. The convergence of standards of living, mobility of factors, the role of trade and technology, as well as the regulation of individual national economies will be discussed. In addition the growing constraints on European economic policy via monetary and fiscal integration of Europe will be examined. | | | |
| Prerequisites to participate in the module: basic knowledge in Microeconomics and Macroeconomics | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Lectures on European Integration |
| Tutorial | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Tutorials on European Integration |
| Module examinations | | Lecture I: Written exam (90 min) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester or <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module Economics: Empirical Labor Economics Responsible: Spitz-Oener | Study Points: 6 | | |
|---|--|--|--|
| Goals: This course provides an overview on the economic analysis of labor markets. The emphasis is on applied microeconomics and empirical analysis. Topics to be covered include: labor supply and demand, human capital, education and training, changes in the wages structure and inequality, biased technological change and returns to skills, organizational change and skill demand, the closing gender gap. The introduction of topics will be on textbook level, but the focus will be on the discussion of empirical implementation strategies used in recent publications. | | | |
| Prerequisites to participate in the module: Acquaintance of intermediate microeconomics, labor economics, and econometrics is highly recommended. | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial | 4 | 6; Participate in class (60 h) Home study/work (90 h) Exam preparation (30 h) | labor supply and demand, human capital, education and training, changes in the wages structure and inequality, biased technological change and returns to skills, organizational change and skill demand, the closing gender gap |
| Module examinations | Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Decision-Making under Uncertainty | Study Points: 6 | | |
|---|--|--|--|
| Responsible: Weizsäcker | | | |
| Goals: | | | |
| <p>The goal of this course is to familiarize students with the most important models of economic decision-making under uncertainty. The course's initial part introduces state spaces and other general and basic concepts. The first part also describes how the most widely-used model, expected utility theory, relates to other models. The second part covers expected utility theory in depth, both under the assumption of known probabilities and the assumption of unknown probabilities. The third part generalizes to models of probability weighting (including Prospect Theory) and ambiguity preferences. Examples and exercises are covered in the lecture as well as in the tutorial.</p> | | | |
| Prerequisites to participate in the module: Basic knowledge in microeconomics as covered in "Introduction to Advanced Microeconomic Analysis" | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial | 4 | 6; Participate in class (60 h) Home study/work (90 h) Exam preparation (30 h) | Uncertainty and preferences, risk versus uncertainty, Expected utility under risk and under uncertainty, Risk preferences under expected utility, Probability weighting under risk, Prospect Theory, Ambiguity preferences |
| Module examinations | Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Game Theory Responsible: Strausz | | | Study Points: 6 |
|---|--|--|--|
| Goals: The purpose of this course is to familiarize students with game-theoretic methods that are used in various fields of economics. | | | |
| Prerequisites to participate in the module: Module „Advanced Microeconomics“. | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Normal-form games, extensive-form games, games with incomplete information, standard solution concepts and refinements |
| Tutorial | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Exercises |
| Module examinations | Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Topics in Microeconomics Responsible: Strausz, Weizsäcker | | | Study Points: 6-18 |
|--|------------------|---|---|
| Goals: | | | |
| This module gathers several seminars/lectures on selected topics in microeconomics. Lectures and seminars may be in English or German. Based on the basic knowledge acquired in "Advanced Microeconomics", this module shall enable students to study applications of microeconomic techniques and to analyze microeconomic problems in different fields of economics. | | | |
| Prerequisites to participate in the module: Module „Advanced Microeconomics“ | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Advanced Microeconomic Analysis I (PhD) | 4 | 6; Attendance (60 h) reading (60 h) homework assignments and exam preparation (60 h) | Preferences, decision under certainty, theory of household and firm, general equilibrium. |
| Lecture Advanced Microeconomic Analysis II (PhD) | 4 | 6; Attendance (60 h) reading (60 h) homework assignments and exam preparation (60 h) | Decision under uncertainty, market power, strategic interaction, game theory, asymmetric information, incentives, mechanism design, contract theory. |
| Lecture Regulation in Product Markets | 2 | 3; Attendance (30 h) reading (30 h) homework assignments and exam preparation (30 h) | Antitrust and Merger Regulation; Price and Monopoly Regulation; Environmental Regulation; Regulation in Vertical Markets |
| Seminar Behavioral Economics | 2 | 6; Attendance (60 h) reading literature (60 h) writing and presenting a seminar paper (60 h) | Decision-making under risk and uncertainty, anticipatory utility and other variants of utility, biased expectations, experimental methods, empirical evidence |
| Seminar Microfinance | 2 | 6; Attendance (30 h) Group assignment (120 h) Presentation (30 h) | Microcredit, Microfinance, Microinsurance, Financial Repression, Credit Rationing, Transaction Costs |
| Seminar The Theory of Regulation under Asymmetric Information | 2 | 6; Attendance (30 h) reading literature, giving a presentation (75 h) writing a seminar paper (75 h) | Regulation, asymmetric information, monopoly, principal-agent problem. |

| | | | |
|--|---|--|--|
| Seminar Empirical Methods in Applied Micro-economics | 2 | 6; Discussions (30 h) Presentation preparation (30 h) Seminar paper preparation (120 h) | Microeometrics; Applied Microeconomics; Public Policy |
| Seminar Theory of Market Structure | 2 | 6; Attendance (30 h) Reading literature (60 h) Writing and presenting a seminar paper (90 h) | Institutions; Rational Expectations; Equilibrium; Financial Market |
| Seminar Market Design | 2 | 6; Attendance (30 h) Reading literature (25 h) Writing a seminar paper (90 h) Preparing a presentation (35 h) | Theory: Introduction to market design and mechanism design, auctions, two-sided matching; Applications: cap-and-trade, electricity markets, school choice, position auctions, kidney exchange |
| Seminar Advanced Experimental Economics I | 3 | 6; Attendance (45 h) Reading literature (60 h) Writing a seminar paper and preparing a presentation (75 h) | Economic experiments, social preferences, non-equilibrium beliefs, quantal response equilibrium, econometric estimation |
| Seminar The Economics of Identity and Ethnic Conflict | 2 | 6; Attendance (30 h) Reading literature (60 h) Writing a seminar paper and preparing a presentation (90 h) | Theory: club goods, economics of identity, economics of fractionalization Empirics: measuring conflict and fractionalization, experimental evidence |
| Module examinations | | Advanced Microeconomic Analysis I and Advanced Microeconomic Analysis II: Written exam (90 min) after each course Regulation in Product Markets: written exam (90 min) Decision-Making under Uncertainty: written exam (90 min) Seminar Microfinance: Group assignment paper (70 %), presentation (30 %) Seminar Behavioral Economics: Seminar paper (70 %), presentation (30 %) Seminar The Theory of Regulation under Asymmetric Information: Seminar paper, presentation Seminar Empirical Methods in Applied Microeconomics: Seminar paper (80 %), presentation (20 %) Seminar Theory of Market Structure: Seminar paper (80 %), presentation (20 %) Seminar Market Design: Seminar paper (70 %), presentation (30 %) Seminar Advanced Experimental Economics: Seminar paper (80 %), presentation (20 %) Seminar The Economics of Identity and Ethnic Conflict: Seminar paper (70 %), presentation (30 %) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester | <input type="checkbox"/> 2 Semesters |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester | <input checked="" type="checkbox"/> Spring Semester |

| Mandatory Elective Module Economics: Information Economics Responsible: Strausz | | | Study Points: 6 |
|--|------------------|--|--|
| Goals: | | | |
| <p>The goal of this course is to familiarize students with the analysis of asymmetric information and with its economic effects. The course studies the role of asymmetric information in specific economic markets, such as labour and insurance markets. It shows how and why outcomes in these markets crucially depend on the underlying information structure between market participants. The course discusses the appropriate equilibrium concepts (rational equilibrium, perfect Bayesian equilibrium), the different type of market outcome (separation, pooling, hybrid), the Pareto inefficiencies that are due to asymmetric information, and the analytical complications of multiple equilibria.</p> | | | |
| Prerequisites to participate in the module: Basic knowledge in microeconomics "Introduction to Advanced Microeconomic Analysis" and "Game Theory" | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial Information Economics | 4 | 6; Participate in class (60 h) Home study/work (90 h) Exam preparation (30 h) | Incomplete quality information (Lemons problem), Labour markets with asymmetric information (signaling, efficiency wages, equilibrium unemployment), Insurance markets with asymmetric information (screening), Credit markets with asymmetric information (rationing), Principal-Agent Problems |
| Module examinations | | Written exam (90 min) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | |

| Mandatory Elective Module Economics: Advanced Microeconomics 1 (PhD-level) Responsible: Kamecke | | | Study Points: 9 |
|--|--|--|--|
| Goals: This module teaches fundamental microeconomic concepts and tools on a very advanced level. Both lecture and exercises generate a considerable workload during the whole semester. Students are allowed to quit the course until the Christmas holidays if they find out that they overestimated their willingness and/or ability to understand demanding microeconomic analysis. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture "Advanced Microeconomics (PhD-level)" | 2 | 4,5; Attendance (30 h) Preparation of lecture and exams (105 h) | Theory of consumer, producer, perfectly competitive equilibrium, monopoly, introduction to game theory |
| Tutorial "Advanced Microeconomics (PhD-level)" | 2 | 4,5; Attendance (30 h) Preparation of problem sets and exams (105 h) | Theory of consumer, producer, perfectly competitive equilibrium, monopoly, introduction to game theory |
| Module examinations | In order to encourage continuous preparation the total examination time of 120 min will be split into 3-5 short tests written in selected exercise sessions. These tests are based on the lecture as well as on the problem sets discussed in class. The results form the basis for the grades of the module. A late registration requirement guarantees that the students are free to skip the course after 50% of the tests. | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Introduction to Advanced Macroeconomic Analysis | Study Points: 6 | | |
|---|--|--|--|
| Responsible: Burda | | | |
| Goals: | | | |
| <p>Introduction to Advanced Macroeconomic Analysis (IAMA)</p> <p>In this class, the students will learn the key tools for analyzing a variety of economic models and their policy implications. In particular, the students will learn</p> <ul style="list-style-type: none"> - tools of intertemporal optimization: Euler equations, dynamic programming - econometric tools for analyzing economic data and their practical application, using software such as Eviews. <p>These tools will be applied to a variety of specific models and data sets in order to introduce the students into advanced macroeconomic analysis.</p> | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Key tools for macro- economic analysis and basic applications. |
| Tutorial | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Exercises and literature review |
| Module examinations | Written exam (60 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Advanced Monetary Economics | | | Study Points: 6 |
|---|--|--|---|
| Responsible: Weinke | | | |
| Goals: | | | |
| How to use dynamic stochastic general equilibrium models for positive and normative analysis. | | | |
| Prerequisites to participate in the module: IAMA | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | The lecture develops a stochastic dynamic general equilibrium model featuring monopolistic competition and sticky prices. Compared with the exposition in the course "Monetary Economics" more emphasis will be put on the technical aspects that one needs to understand in order to use this framework. We will also analyze some recent extensions of the baseline model that is at center stage in the course "Monetary Economics". |
| Tutorial | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | The tutorial helps understand the material of the lecture in different ways. First, some additional derivations of theoretical and empirical results are provided. Second, applications of the theory are illustrated. Third, some aspects of the practical implementation of monetary policy are discussed. |
| Module examinations | Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester <u>or</u> | | |

| <p>Mandatory Elective Module Economics: Labour Markets and Social Policy</p> <p>Responsible: Burda / Spitz-Oener</p> | <p>Study Points: 6-12</p> | | | | | | | | | | | | |
|--|----------------------------------|--|--|---------------|--------|-----------|---|--|--|------------|---|--|---|
| <p>Goals:</p> <p>Lecture/Tutorial I</p> <p>The theoretical functioning of labour markets and labour market interventions are of key concern to practical policymaking. A number of relevant issues will be examined in this class. Examples include:</p> <p>What determines the demand for and supply of different types of labour in modern economies? How is labour compensated, and which factors determine the level of wages? How does search and matching in the labour market work, and how can this matching process be influenced by policy e.g. regarding unemployment benefits or certain labour market regulation?</p> <p>Lecture/Tutorial II</p> <p>This lecture examines social policies as well as their economic foundations. Examples of topics covered are:</p> <p>What are the effects of various intergenerational schemes for financing pension systems? Which ones work best and why? What are the consequences of welfare reform? How can one analyze the macroeconomic consequences of reforms of the health sector, the education sector or other sectors which are largely dominated by public policy? How can a society provide insurance against labour market risk? Is there an optimal unemployment insurance scheme?</p> <p>Lecture/Tutorial III</p> <p>The empirical analysis of labour markets is applied to labour supply and demand, human capital, education and training, changes in the wages structure and inequality, biased technological change and returns to skills, organizational change and skill demand, the closing gender gap. The introduction of topics will be on textbook level, but the main focus will be on the discussion of empirical implementation strategies used in recent publications. Exercises will be held in the computer lab and students will learn to work with Stata.</p> <p>Lecture IV</p> <p>Economics is an empirical science. The validity of the competing economic theories and therefore the legitimacy of the application of economic theories to economic policy is an empirical question. This course has two goals. First, it covers basic methods and techniques of the empirical analysis in economics. Second, the students become familiar with the typical line of argumentation in the empirical analysis of current problems in economics. As an integral part of the course applications are implemented in the PC-Pool based on the software package Stata.</p> <p>Seminar</p> <p>The seminar aims at preparing students to present and discuss critically empirical research in all areas of labour economics. It may likewise be viewed as a preparation for an empirical diploma, master or doctoral thesis. Students are free to choose a topic themselves or to work on a topic proposed by the instructor. The topic is expected to be in the field labour economics. Participants are expected to discuss the relevant literature, data sources, methodology, to acquaint themselves with the necessary institutional details and to present and discuss their work.</p> | | | | | | | | | | | | | |
| <p>Prerequisites to participate in the module: none</p> | | | | | | | | | | | | | |

| Mandatory Elective Module Economics: Advanced Labour Economics Responsible: Burda | Study Points: 9 | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|--|------------------------|---|--|---------------|--------|---------|---|--|--|----------|---|---|--------------------------------|------------------------------------|---|--|--|---------------------|--|---|--|------------------------|--|---|--|--------------------------|--|--|--|
| Goals: | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>To gain a deeper understanding of the functioning of labour markets at the level of a doctoral student aspiring to do research in the area</p> <p>The lecture aims at broadening the understanding of labour supply by households and labour demand decision making by firms, and the influence of institutions on the labour market outcome. To this end, several fields of labour economics (human capital accumulation, wage determination, imperfect information) will be covered. In this module the student has the option of pursuing a more formal-theoretic approach to the subject. Like the module "Labour Economics" this module requires attendance of the basic lecture course "Labour Economics".</p> <p>Marshallian analysis of the labour market and comparative statics; basic Hicksian concepts Labour demand and its determinants: Static and dynamic aspects Labour supply and its determinants: Static and dynamic aspects Human capital: Theory and empirical aspects Models of wages and wage determination Imperfect information in labour markets: Search, implicit contracts, efficiency wages Equilibrium models of unemployment and search The economics of labour market institutions</p> <p>The tutorials will revisit these models, cover their formal analysis in detail, and apply them to exercises. The advanced mathematical tutorial will help students to work with formal techniques necessary for success in a research career.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Prerequisites to participate in the module: none | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| Mandatory Elective Module Economics: Advanced Macroeconomic Analysis I (PhD-level) Responsible: Burda / Weinke | Study Points: 6 | | |
|---|--|---|--|
| Goals: | | | |
| <p>In this current research on dynamic economic models will be examined in detail to prepare students for doing research in macroeconomics and related fields. Depending on the approach examined, particular emphasis may be given to the theoretical or to the empirical aspects of the analysis. Examples are</p> <ul style="list-style-type: none"> • Modern variants of the neoclassical growth model • Modern dynamic business cycle theories. • dynamic models of matching on labor markets • models of intergenerational trade (overlapping generations models) • models of intertemporal choice • facts and models of long run growth • dynamic models of international trade • econometric dynamic multivariate models regarding the interaction of major economic time series. The empirics of shocks driving the economy. • econometric panel approaches regarding the functioning and the dynamics of labor markets • numerical solution methods for linearized and non-linearized models. • Models pertaining to asset markets and to the role of money. • models of asset markets resulting from the intertemporal portfolio allocation problem • models of money. • The econometric evidence regarding the role of money and the role of monetary policy shocks. • Models of the interplay between monetary and fiscal policy. • Models of international exchange on goods and asset markets. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | 3; Attendance (30 h), Preparation (30 h), Exam preparation (30 h) | Lectures on Advanced Economic Dynamics |
| Tutorial | 2 | 3; Attendance (30 h), Preparation of exercises (30 h), Exam preparation (30 h) | Exercises |

| Mandatory Elective Module Economics: Advanced Macroeconomic Analysis II (PhD-level) | Study Points: 6 | | |
|---|------------------------|--|--|
| Responsible: Burda / Weinke | | | |
| Goals: | | | |
| <p>This is the second term of a two-term "first-year" sequence in macroeconomics, intended for master and doctoral students with a strong interest in academic research. It requires a solid background in mathematics. Strong emphasis will be placed on acquiring the key tools for advanced macroeconomic analysis suitable for pursuing PhD-level research. The following topics will be taught:</p> <p>A2: Asset pricing; advanced preference theory such as Epstein-Zin; dynamic contracts and applications; growth models, OLG models;</p> <p>B2: Money and models of price and wage rigidities; economic policy and time consistency, applied VAR analysis.</p> <p>This will be complemented by deepening the knowledge regarding mathematical and econometric tools, such as MATLAB and/or EViews.</p> | | | |
| Prerequisites to participate in the module: Advanced Macroeconomic Analysis (Ph.D.). If approved by lecturer Introduction to Advanced Macroeconomic Analysis may also be accepted. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Key tools for macroeconomic analysis, advanced study of topics A2 and B2. |
| Tutorial | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | In-depth review, literature review and exercises |
| Module examinations | | Written exam (90 min) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module Economics: Current Research in Macroeconomics | | | Study Points: 6 |
|---|------------------|--|---|
| Responsible: Burda / Weinke | | | |
| Goals: This seminar aims to teach students to carry out projects at the current research frontier in macroeconomics. | | | |
| Prerequisites to participate in the module: Module „Foundations of Advanced Macroeconomics“ | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar | 2 | 6; Attendance (60 h) Preparation (60 h) Seminar Research Project (60 h) | Carrying out research projects in macroeconomics |
| Module examinations | | Research Paper | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module Economics: Quantitative Macroeconomics and Numerical Methods (Ph.D. Level) Responsible: Ebell | Study Points: 6 | | |
|--|--|--|---|
| Goals: To learn a variety of solution methods for non-linear dynamic stochastic general equilibrium (DSGE) models, which are prominent in modern quantitative macroeconomics. These solution methods may include, but are not necessarily limited to: Log linearization Higher order approximations Policy function iteration Value function iteration In addition, students will learn calibration methods, that is, methods for choosing parameters for the DSGE models. In the practical part of the course (Tutorial), students will implement the solution methods taught in the course using Matlab. A brief introduction to Matlab will also be offered. | | | |
| Prerequisites to participate in the module: none | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 2 | 3; Attendance (30 h) Preparation (30 h) Homework (30 h) | Solution methods for DSGE models in theory |
| Tutorial | 2 | 3; Attendance (30 h) Preparation (30 h) Homework (30 h) | Implementing solution methods for DSGE models in practice |
| Module examinations | 3 homework assignments (take-home exams) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester <u>or</u> | | |

| Mandatory Elective Module Economics: Economic History Responsible: Wolf | | | Study Points: 6-18 |
|---|------------------|--|--|
| Goals: Economic history stresses the long-term perspective and the role of historical case studies for economic decision making. It offers new insights and allows the students to apply their knowledge of economic theory and empirical methods. The aim of the lectures is to give an overview over the economic history of the world, in particular of Europe and Germany. The seminars introduce the students to modern research in economic history. The discussion of recent publications enables students to devise own research questions and research designs for their master's thesis. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial European Economic History I | 4 | 6; Attendance (60 h) Preparation (60 h) Exam preparation (60 h) | European Economic History 1800 - 1914 |
| Lecture/ Tutorial European Economic History II | 4 | 6; Attendance (60 h) Preparation (60 h) Exam preparation (60 h) | European Economic History 1914 – up to now |
| Seminar | 2 | 6; Attendance (30 h) Preparation (60 h) Presentation (30 h) Seminar paper (60 h) | The seminars cover key topics in European economic history, ranging from methods of modern research in economic history, over economic crises to long-run economic developments, and specific historical case-studies. |
| Seminar Data Management and Empirical Economics | 2 | 6; Attendance (30 h) Preparation (60 h) Presentation (30 h) Seminar Paper (60 h) | This research seminar deals with information systems used in Economic history, such as statistical software, database management systems and geographical information systems. |
| Module examinations | | Lectures: Written exam (90 min) Seminars: Seminar paper (70%), presentation (30%) of final mark | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module Economics: Advanced International Trade: Theory and Empirics Responsible: Wolf | Study Points: 6 | | |
|---|---|--|---|
| Goals: | | | |
| The course deals with patterns of international trade, both in theory and empirics. Starting with the classic Ricardian and Heckscher-Ohlin trade models, students will be introduced to modern models, such as Eaton and Kortum (2002), Melitz (2003) and Melitz & Ottaviano (2008). | | | |
| Prerequisites to participate in the module: Basics in both micro and macro economics | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Tutorial Advanced International Trade: Theory and Empirics | 2 | 6; Attendance (60 h) Preparation (60 h) Exam preparation (60 h) | Ricardian trade model, Heckscher-Ohlin trade model, Eaton-Kortum trade model, Melitz-Ottaviano trade model, economic policy, economic history, economic geography |
| Module examinations | Lecture/Tutorial: Written exam (90 min, 70%), Presentation (30%) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input type="checkbox"/> Fall Semester or <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Spatial Economics Responsible: Wolf | | | Study Points: 6 |
|--|------------------|--|--|
| <p>Goals: The students will be introduced to the vast literature on Spatial Economics. The course starts with ideas developed by Von Thünen and Krugman leading to modern theories on the interaction between economics and geography. We will introduce models and empirics for topics such as international specialization, the clustering of industries, the spatial pattern of economic growth, and the relationship between core and periphery within economic regions.</p> | | | |
| Prerequisites to participate in the module: Basics in both micro and macro economics | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar Spatial Economics | 2 | 6; Attendance (60 h) Presentation (30 h) Seminar paper (90 h) | Core and Periphery, Increasing returns to scale, Transport costs, Law of one price, Clustering, Specialization |
| Module examinations | | Seminar: Seminar paper (70%), Presentation (30%) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester | <input type="checkbox"/> 2 Semesters |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester <u>or</u> | <input type="checkbox"/> Spring Semester |

| Mandatory Elective Module Economics: Advanced Topics in Public Economics | | | Study Points: 6-15 |
|---|------------------|--|--|
| Responsible: Wickström | | | |
| Goals: | | | |
| To learn about advanced topics of Public Economics in the cutting point of government and markets | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture/ Seminar Elemente der Finanz- wissenschaft I (German) | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) or Attendance (30 h) Exam paper (30 h) Preparation of presentation (60h) | Various aspects of Public Economics |
| Lecture/ Seminar Elemente der Finanz- wissenschaft II (German) | 4 | 6; Attendance (60 h) Preparation (60 h) Exam preparation (60 h) or Attendance (60 h) Exam paper (60 h) Preparation of presentation (60h) | Various aspects of Public Economics |
| Lecture Theory of Taxation | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Tax incidence Tax shift Optimal taxation Public Enterprise Pricing |
| Lecture Theory of Social Choice | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Collective decisions, Impossibility theorems, Distributive justice, Bargaining |
| Lecture Welfare Theory | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Welfare Theory, Foundations of Cost Benefit Analysis |
| Lecture Theory of Social Policy | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Public expenditures, justice and efficiency, public insurance (e.g. health and unemployment insurance) and redistribution. |
| Lecture Environment al and Resource Economics | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Pollution, Renewable Resources, Exhaustible Resources, Environmental Policy |
| Lecture Environment al Economic | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | Environmental Economic Policy |

| | | | |
|--|---|---|--|
| Policy | | | |
| Lecture The theory of optimal extraction of natural resources | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | The course is an introduction to the theory of the optimal extraction of natural resources. |
| Lecture Development Economics | 2 | 3; Attendance (30 h) Preparation (30 h) Exam preparation (30 h) | The course is an introduction to the principles of Development Economics |
| Seminar Ökonomie und Sprache (German) | 2 | 6; Attendance (30 h) Exam paper and presentation (90 h) Exam preparation (60 h) | Schnittstelle zwischen Ökonomie und Sprache, Soziolinguistik, Ökonomie der Sprache |
| Seminar Environmental and Resource Economics | 2 | 3; Attendance(30 h) Seminar paper (30 h) Preparation of presentation (30h) | Pollution, Renewable Resources, Exhaustible Resources, Environmental Policy |
| Seminar Empirical Distribution Analysis | 4 | 6; Attendance (60 h) Seminar paper (60 h) Preparation of presentation (60h) | This course aims at introducing empirical methods of distributional analysis. |
| Seminar Development Economics | 4 | 6; Attendance(60 h) Preparation of presentation (30h) Case Study (90 h) | Development Economics; influence of trade, distribution, institutions, factor mobility on development; policy analysis |
| Seminar Selected Topics in Development Economics | 2 | 3; Attendance (30 h) Preparation of presentation I (10 h) Seminar paper (30 h) Preparation of presentation II (20 h) | Individual research papers based on background knowledge in development economics |
| Module examinations | | Lecture: Written exam (90 min, 67%) homework (if requested 33%) Seminar: Seminar paper (33-67%), presentation (33%), written exam/case study (if requested 33%) Seminar Development Economics: Presentation (if requested, 25%), case study (75-100%) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input checked="" type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester or <input checked="" type="checkbox"/> Spring Semester | |

| 45035, Social Preferences | | Leistungspunkte: 6 | | | |
|--|---|---|--|--|--|
| <u>Lern- und Qualifikationsziele:</u> | | | | | |
| <p>The students</p> <ul style="list-style-type: none"> - know key experimental evidence on social preferences - can apply the most important models of social preferences to explain key experimental results and know their limitations - can contribute to the debate about the relevance of laboratory experiments on social preference - are able to explain the relevance of social preferences for economic theory and have an understanding how economic models can be extended to incorporate social preferences | | | | | |
| <p>Preconditions:</p> <ul style="list-style-type: none"> - Introduction to Advanced Microeconomic Analysis or equivalent - Knowledge of elementary game theory - Knowledge of statistical analysis will make it easier to follow the data analysis in the experimental papers and thus enable a more critical view, but is not strictly necessary | | | | | |
| Teaching formats | Hours per week, workload in hours | Credits and preconditions for granting | Topics, contents | | |
| Lecture Social Preferences – Theories and Evidence | <u>2 SWS</u> <u>60 hours</u> 25 hours presence in class, 35 hours preparation and learning | 3 credits, participation | <ul style="list-style-type: none"> - Experimental evidence of social preference - Models of social preferences and their applications - Testing models of social preferences - Multiplicity of fairness norms and heterogeneity of social preferences - Relevance and generalizability of laboratory experiments on social preferences - Applications to economic theory | | |
| Tutorial Social Preferences – Theories and Evidence | <u>2 SWS</u> <u>60 hours</u> 25 hours presence in class, 35 hours preparation and learning | 2 credits, participation | <ul style="list-style-type: none"> - Discussions of further literature, examples, and applications of the topics from the lecture | | |
| Final exam | <u>60 hours</u> Exam Social Preferences – Theories and Evidence (90 min) and preparation | 1 credits, Exam Social Preferences – Theories and Evidence, pass | | | |
| Duration | <input checked="" type="checkbox"/> 1 semester <input type="checkbox"/> 2 semester | | | | |

| Mandatory Elective Module Economics: Theory of the State in Economics and in Law | Study Points: 6-18 | | |
|---|---------------------------|--|--|
| Responsible: Blankart / Kirchner | | | |
| Goals: | | | |
| <p>To understand the economic theory of law as a two stage process of collective decisions on law and the applications of law in markets as well as in governments.</p> <p>Seminar:</p> <p>The seminar is aimed at analyzing the institutional rules governing private markets and the state. A distinction is made between decisions on rules and decisions within rules.</p> <p>The seminar is interdisciplinary held jointly by a professor of economics and a professor of law.</p> <p>Students should write essays applying theoretical economic thought to practical problems of legislation.</p> <p>Special attention should be given to an economic analysis of agents in government.</p> | | | |
| Prerequisites to participate in the module: Module „Public Finance and Public Choice I“ | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar | 3 | 6; Attendance (45 h) Preparation and presentation (60 h) Writing essays (75 h) | Case Studies in the Economic analysis of Law and State |
| Module examinations | | Essays (80%), presentation (20%) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module Economics: Applied Microeconomics: Competition Policy Responsible: Kamecke | | | Study Points: 6 |
|---|--|--|---|
| Goals: The participants in this module understand the structure of elementary models in industrial organization and learn how to discuss issues in competition policy with the help of such models. For this purpose the model structure, results and policy implications are presented in the lecture. The exercises concentrate on a thorough discussion of the theoretical models used in the lecture and on their modification for a policy analysis. The students learn to develop simple models to address selected questions of competition policy. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Competition Policy | 2 | 3; Attendance (30 h) Preparation of lecture (40 h) preparation of exam (20 h) | Neoclassical welfare theorems; normative results of static (SCP, dynamic price competition, vertical restraints) and dynamic (patent races, endogenous growth theory) industrial organization theory. |
| Tutorial Competition Policy | 2 | 3; Attendance (30 h) Preparation of exercises (60 h) | Practice of the theoretic analysis of policy question with the help of simple examples. |
| Module examinations | Written exam (90 min) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Selected Topics in Competition Policy Responsible: Kamecke | Study Points: 6 | | |
|---|--|--|--|
| Goals: | | | |
| <p>The participants get to know selected parts of the theory of industrial organization with a special emphasis on their implications for the European competition law. They learn to use formal results in a discussion of controversial political issues. To prepare for this the lecture introduces fundamental theoretical concepts and their application as well as the relevant parts of the competition law. This lecture is concentrated on the first part of the term. In the second part of the term the students demonstrate in their seminar presentations that they understand this method of economic analysis.</p> | | | |
| Prerequisites to participate in the module: Module „Applied Microeconomics“ | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 1 | 1,5; Attendance (15 h) Preparation (10 h) exam preparation (20 h) | One of the topics: cartel prohibition, abuse control, and merger control in the European or German Competition law |
| Seminar | 2 | 4,5; Attendance (30 h) Seminar paper and presentation (105 h) | Discussion of selected problems of competition policy, case studies, modelling issues and/or changes of the law |
| Module examinations | Lecture: Written exam (60 min); Seminar: Paper (80 %), presentation (20 %) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module Economics: Topics in Industrial Organization Responsible: Kamecke | | | Study Points: 6-12 |
|---|-------------------|---|--|
| Goals: | | | |
| <p>In each lecture or seminar the participants study one aspect of industrial organization. In empirical industrial organization they are introduced to theory-based empirical model building in core areas of industrial economics and learn how to implement empirical studies using micro-econometric methods and real-market data. In "Cartel law" they are introduced to the European and German antitrust legislation from an economic point of view. In the seminar "actual problems of economic policy" the participants analyze selected topics discussed in the popular press which are related to the insights from one of these lectures, while the seminar "Applied Industrial Organization" discusses various issues in the field of industrial organization. In this module it is also possible to get credit for courses from the module "topics in microeconomics" or from further courses in the field of industrial organisation which the candidate passed in other universities.</p> | | | |
| Prerequisites to participate in the module: Module „Applied Microeconomics“ | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Empirical Industrial Organization | 2 | 3; Attendance (30 h) Preparation (20 h) Exam preparation (40 h) | Structural approach in industrial economics; analyses of firm behaviour in dynamic markets. |
| Tutorial Empirical Industrial Organization | 2 | 3; Attendance (30 h) Preparation (20 h) Exam preparation (40 h) | Empirical model building and micro-econometric methods; computer implementation using real-market data. |
| Lecture Cartel Law for Economists | 2 | 3; Attendance (30 h) Preparation (20 h) Exam preparation (40 h) | European and German cartel law from an economic perspective. (So far this lecture has always been taught in German.) |
| Seminar „Aktuelle Probleme der Wirtschaftsp olitik – Thema Umwelt“ (German) | 2 + field trip | 6; Seminarteilnahme (30 h), Anfertigung und Präsentation von Seminararbeit (60 h) Exkursion (60 h + 30 h Vor- und Nachbereitung) | Diskussion von ausgewählten Themen aus dem Bereich Umweltökonomik und –politik. |
| Seminar Applied Industrial Organization | 2 | 3; Attendance of seminar (30 h) Seminar paper and presentation (60 h) | Discussion of selected problems of industrial organisation, case studies, experimental evidence, modelling issues and/or changes of the institutional environment. |
| Module examinations | | Lectures: Examination (60 min, 90 min if exercises and lecture are examined); Seminar: Seminar paper and presentation | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester | <input type="checkbox"/> 2 Semesters |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester or | <input checked="" type="checkbox"/> Spring Semester |

| Mandatory Elective Module Economics: Datengrundlagen der Wirtschaftspolitik (DGWP) Responsible: Schmerbach | Study Points: 6 | | |
|---|---|---|---|
| Goals: | | | |
| The seminar will be held in German. | | | |
| Im Vordergrund des Gesamtkonzeptes stehen | | | |
| | <ul style="list-style-type: none"> - das Wecken des Interesses der Studierenden für statistische Fragestellungen und Probleme in Politik und Wirtschaft, - die Vermittlung der Arbeitsweise der amtlichen und nichtamtlichen Datenproduzenten auf nationaler, europäischer und internationaler Ebene, - die Qualität und Aussagefähigkeit ökonomischer Daten, - der kompetente und verantwortungsvolle Umgang mit verfügbarem Datenmaterial aus amtlichen, nichtamtlichen und medialen Datenquellen - eigenständige Datenrecherchen, - selbständige wissenschaftliche Arbeit mit amtlichen und nichtamtlichen Originaldaten unter Einbeziehung statistischer Methoden zur Bereitstellung von Informations- und Entscheidungsgrundlagen, - Hinweise zum Einsatz moderner Computerprogramme. | | |
| Prerequisites to participate in the module: Module „Statistics“ | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar DGWP | 3 | 6; Attendance (45h) Preparation and presentation (65h) Seminar paper (70h) | Bevölkerungsstatistik, Arbeitsmarktstatistik, Produktionsstatistik, Konjunkturtests, Verbraucherpreisstatistik (Messung der Teuerung), Expertenvorträge und Ko-Referate zu Themen des Seminars, Problemdiskussionen |
| Module examinations | | Seminar paper (70 %), presentation (30 %) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module QM: Operations Research Responsible: N.N. | | | Study Points: 6-18 |
|---|------------------|---|--|
| Goals: | | | |
| <p>The „Elective Module Operations Research“ (for master students) is composed of fundamental and advanced courses as well as special topic courses and seminars. It offers the opportunity to become a specialist in Operations Research applications. The basic courses (OR I and OR II) cover classical material on linear and nonlinear programming. The advanced courses (OR III and OR IV) are devoted to dynamic programming and applied project work. They aim to provide students with the opportunity to gain enhanced theoretical knowledge and theory oriented as well as applied project experience. As part of the module special topic courses on a variety of business management specializations are offered, e. g. Revenue Management, Operational Risk Management, Operations Management, Financial Engineering, Queueing theory, inventory theory, logistic and supply chain management, simulation studies, stochastic modelling and optimization algorithms, etc. Within special seminars students will learn to use and to apply OR-software packages.</p> | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Basic Lectures | | | |
| Lecture/ Tutorial OR I | 3 | 4,5; Attendance (45 h) Preparation and homework assignments (60 h) Exam preparation (30 h) | Simplex algorithms, theory on duality and sensitivity analysis, production-, cutting-stock and blending problems, staffing and scheduling problems, quadratic optimization |
| Lecture/ Tutorial OR II | 3 | 4,5; Attendance (45 h) Preparation and homework assignments (60 h) Exam preparation (30 h) | Integer programming with the view towards applications, knapsack problem, transportation and assignment problems, network flow optimization and project planning |
| Advanced Lectures | | | |
| Lecture/ Tutorial OR III | 3 | 4,5; Attendance (45 h) Preparation and homework assignments (60 h) Exam preparation (30 h) | Deterministic and stochastic dynamic programming; solution algorithms, business and economic applications |
| Lecture/ Seminar OR IV | 3 | 4,5; Attendance (45 h) Preparation, presentation and homework assignments (30 h) Project work (60 h) | Lectures based on research articles, presentation of thesis and project work |
| Special lectures | | | |
| Every lecture marked as Special OR lecture in the university calendar | 3 | 4,5; Attendance (45 h) Preparation and homework assignments (60 h) Exam preparation (30 h) | There will be special lectures on OR topics every semester. |
| Seminars | | | |
| Software in Operations Research | 2 | 6; Attendance (30 h) Preparation (30 h) | Introduction into the usage of, e. g. AMPL, OPL, AIMMS, NEOS, etc.; syntactic elements of model languages; linear, piecewise linear, |

| | | | |
|--------------------------|---|---|--|
| | | Seminar paper and presentation (90 h + 30 h) | quadratic and integer valued optimization problems |
| Software project | 2 | 3; Implementation, documentation und presentation (90 h) | Developing software packages; long term projects |
| Research Seminar | 2 | 3; Attendance (30 h) Reports and presentation (60 h) | Lectures on research projects |
| Module examinations | | Lecture/Tutorial OR I: Written exam (120 min, 100 %) or written exam (120min, 80 %) + homework assignments (20 %) Lecture/Tutorial OR II: Written exam (120 min, 100 %) or written exam (120min, 80%) + homework assignments (20 %) Lecture/Tutorial OR III: Written exam (120 min, 100 %) or written exam (120min, 80 %) + homework assignments (20 %) Lecture/Seminar OR IV: Homework assignments (20 %), presentation (40 %) and project work (40 %) or presentation (30 %) and seminar paper (70 %) Seminar Software in OR: work reports (50 %), presentation (40 %), exercises (10 %) Seminar Softwareproject: reports (30 %) and software with software documentation (70 %) Lecture/Tutorial OR Special: Written exam (120 min, 80 %) and homework assignments (20 %) or written exam (100 %) or oral exam (100 %) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module QM: Multivariate Statistical Analysis Responsible: Härdle | | | Study Points: 6-9 |
|---|--|---|---|
| Goals: | | | |
| <p>Data records which are to be analysed by means of statistics often consist of many variables. While the connections between two variables are easily accessible, a group of several variables is not easily examinable in its structure. "Multivariate statistics" imparts procedures which allow an analysis of high-dimensional data records. The course aims to introduce the basic concepts of statistical programming languages as R or Matlab and its application.</p> | | | |
| Prerequisites to participate in the module: Knowledge of basic statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Multivariate Statistical Analysis I (MVA1) | 4 | 6; Attendance (60 h) Self-study (60 h) Exam preparation (60 h) | MVA1: Graphical display of multidimensional data, Repetition: matrix algebra, linear model, correlation, Multivariate random variables, Multinormal distribution, Maximum likelihood theory, Principal components, Discriminant Analysis, Cluster Analysis. |
| Lecture Statistical programmin g languages (XIC) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Data Analysis and programming statistical algorithms in the programming languages R or Matlab |
| Module examinations | MVA1: written exam (120 min) or working paper and eventually presentation or homework XIC: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module QM: Advanced Statistics Responsible: Härdle | Study Points: 6-15 | | |
|---|---------------------------|--|---|
| Goals: | | | |
| <p>The courses and lectures will give the students a thorough insight into theoretical aspects as well as practical aspects of advanced statistical methods (R, Matlab and/or SPSS). The lectures cover different aspects in statistics:</p> <ul style="list-style-type: none"> - The course Statistical Programming Languages aims to introduce the basic concepts of statistical programming languages as R or Matlab and its application. - The course Non- and Semiparametric Modelling gives an overview over the flexible regression methods. - The lecture Multivariate Statistical Analysis 2 further develops methods presented in the first part of the lecture and deals with problems which arise in the analysis of real world data as well as some advanced methods. In the tutorial the students apply the methods to multivariate data with statistical software. - The lecture Selected Topics in Banking and Insurance deals with specific topics connected either with Banking (e.g. the issues of assessment of the quality of a credit to its risk of defaults) or Insurance (e.g. with claim size distributions, ruin problems, heavy tailed risks, premium, principles and risk measures and loss reserving in insurance). - The seminar Numerical Introductory Course treats problems which arise in the implementation of statistical methods, e.g. Optimization. - In the seminar What is statistics? – From the historical perspective historical aspects of the development of statistics will be treated. - The lectures Data analysis I and II focus on practical steps in data analysis with SPSS and R. We cover various topics in uni-, bi- and multivariate descriptive statistics, tests and regression methods. - The lecture Statistics of High-Dimensional Time Series provides an overview of statistical methods used for the analysis of high-dimensional time series. | | | |
| Prerequisites to participate in the module: Knowledge of basic statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis and the module „Multivariate Statistical Analysis“ | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Statistical programming languages (XIC) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Data Analysis and programming statistical algorithms in the programming languages R or Matlab |
| Lecture Non- and Semiparametric Modelling (NPM) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | NPM: Histogram, Nonparametric Density Estimation, Nonparametric Regression, Additive Models, Linear Models, Generalized Linear Models, Additive Models, Single-Index Models, Generalized Partial Linear Models, Generalized Additive Models |
| Lecture Multivariate Statistical Analysis II (MVA2) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | MVA2: decomposition of data matrices by factors, Factor analysis, Multidimensional scaling, Canonical correlations, Correspondence analysis, Projection pursuit, Conjoint measurement analysis, SIR |
| Tutorial Multivariate Statistical Analysis II (UE MVA2) | 2 | 3; Attendance (30 h), Preparation for tutorial sessions (30 h), Solving problem sets (30 h) | UE MVA2: The tutorial aims at practical exercises done with statistical software packages (R, SPSS, Matlab). |
| Lecture Selected Topics in Banking and | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | SCR: Selected Topics either in Banking, e.g. Credit rating, or Insurance. For details see the commented schedule of lectures. |

| | | | |
|--|---|--|---|
| Insurance (SCR) | | | |
| Seminar Numerical Introductory Course (NIC) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | NIC: Numerical Linear Algebra, Curve Fitting, Optimization, Random Number Generation, Numerical Solutions of Stochastic Differential Equations |
| Seminar What is statistics? – From the historical perspective (HIST) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | HIST: In the seminar we will investigate elements of the history of statistics, mathematical statistics as well as economical statistics, from the 17th/18th century until the present time. |
| Seminar Privatissimu m Statistik (PRI) | 2 | 3; Attendance (30 h) Preparation of presentation (10 h) Seminar paper (50 h) | PRI: The seminar is a preparation for master thesis. |
| Vorlesung Datenanalys e I | 2 | 3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h) | DAT1: Wdh. Statistik I&II, Fragebogenkonstruktion, Datenbereinigung, Ausreißer, Fehlende Werte, Univariate und Bivariate Statistik (Grafiken, Kennzahlen und Tests) |
| Übung Datenanalys e I (UE DAT1) | 2 | 3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h) | UE DAT1: In der Übung werden praktische Aufgaben zum Vorlesungsstoff mit SPSS und/oder R gelöst. |
| Vorlesung Datenanalys e II | 2 | 3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h) | DAT2: Multivariate Statistik, Lineare Regression, Nicht- und semiparametrische Regression, Item-Response-Modelle, Strukturgleichungsmodelle. |
| Übung Datenanalys e II (UE DAT2) | 2 | 3; Präsenzzeit (30 h) Selbststudium (30 h) Prüfungsvorbereitung (30 h) | UE DAT2: In der Übung werden praktische Aufgaben zum Vorlesungsstoff mit SPSS und/oder R gelöst. |
| Seminar Datenanalys e (DAT) (German) | 2 | 3; Attendance (30 h) Preparation of presentation (10 h) Seminar paper (50 h) | DAT: Das Seminar richtet sich an Studierende, die einen konkreten Datensatz mittels statistischer Methoden (z.B. im Rahmen von Projekt- oder Abschlussarbeiten) analysieren wollen. |
| Lecture Statistics of High- Dimensional Time Series (STS) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Topics include: the dynamic semiparametric factor model, statistics of multivariate time series models, non-parametric and flexible time series estimation, variable selection and empirical pricing kernel estimation. |
| Module examinations | | XIC, NPM, MVA2/UE MVA2, SCR, DAT1, DAT2, STS: Oral exam (30 min) or written exam (90 min) working paper and eventually presentation or homework NIC, HIST, PRI, DAT: Working paper (80%) and presentation (20%) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module QM: Statistics and Finance Responsible: Härdle | | | Study Points: 6-15 |
|--|------------------|---|--|
| Goals: The course "Statistics of Financial Markets 1" starts with an introduction into the basic concepts of option pricing and its probabilistic foundations. Next, stochastic processes in discrete time are presented and the Wiener process is introduced. Ito's Lemma is derived and the Black-Scholes (BS) Option model is presented leading to the analytic solution for the BS Option price. Numerical solutions via binomial or trinomial tree constructions are discussed in detail. The course "Statistics of Financial Markets 2" starts with an introduction into the basic concepts of time series and its application. The course gives an overview over risk management models and reviews the current value at Risk (VaR) methodology. The course "Selected topics of mathematical statistics" covers a part of mathematical statistics which deals with the limiting behavior of different sample statistics, U -statistics, M -, L - and R -Estimates. It is laying a bridge between the probability theory and the mathematical statistics by manipulating with "probability" theorems to obtain "statistical" theorems. The Seminar "Mathematical Statistics" allows for the presentation of research results from the discipline of mathematical statistics. The Seminar "Economic Risk" allows for the presentation of research results from the discipline of Quantitative Finance. The lecture "Statistical Tools for Finance and Insurance" introduces modern statistical tools as applied to finance and insurance. Each part of the lecture contains content with a high focus on practical applications. The course entitled "Advanced Methods in Quantitative Finance" covers material that is beyond the scope of the course "Statistics of Financial Markets". | | | |
| Prerequisites to participate in the module: Knowledge of basic statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture Statistics of Financial Markets I (SFM1) | 4 | 6; Attendance (60 h) Self-study (60 h) Exam preparation (60 h) | SFM1: Financial derivative, Option management, Basic concepts of probability theory, Stochastic processes in discrete time, Stochastic Integrals and differential equations, Black-Scholes option pricing model, Binomial model for European options and American options, Exotic options and interest rate derivatives |
| Lecture Statistics of Financial Markets II (SFM2) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | SFM2: Basic concepts of statistical models, ARIMA model, Time series of stochastic Volatility, Nonparametric model on financial time series, Value at risk and back testing, Copulas, Extreme value, Neuronal network |
| Lecture Selected topics of mathematica l statistics (SMS) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Limiting behavior of different sample statistics U-statistics, M-, L- and R-Estimates. This course gives better understanding for the basic tools learned in the elementary Statistics I and II, like Law of Large Numbers, Central Limit Theorem, Kolmogorov-Smirnov and Cramer-von-Mises tests, sample mean and sample variance behavior, etc. |
| Lecture Advanced Methods in Quantitative Finance (AMF) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Energy options and knowledge of econometric tools and stochastic finance, robust techniques for financial time series |

| | | | |
|--|---|---|---|
| Lecture Statistical Tools for Finance and Insurance (STF) | 2 | 3 Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Modern statistical tools applied in finance and insurance |
| Seminar Mathematical Statistics (MSS) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Presentation of research results in topics in mathematical statistics |
| Seminar Economic Risk (QFS) | 2 | 3; Attendance (30 h) Self-study (30 h) Exam preparation (30 h) | Selected Topics of Economic Risk |
| Module examinations | | SFM1: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework SFM2: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework SMS: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework STF: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework AMF: oral exam (30 min) or written exam (90 min) or working paper and eventually presentation or homework MSS: presentation (30 min) or working paper QFS: presentation (30 min) or working paper | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module QM: Privatissimum Statistik Responsible: Härdle | | | Study Points: 30 |
|--|------------------|---|-------------------------|
| Goals: The seminar "Privatissimum" is designed to help students in the preparation and completion of their Masters thesis. The thesis must be dedicated to a chosen statistical subject. At the seminar any technical problems or drawbacks are presented and the relevant statistical procedures and results collectively discussed. | | | |
| Prerequisites to participate in the module: Knowledge of basic statistical concepts and an understanding of a broad spectrum of statistical methods for data analysis. | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar Privatissi- mum Statistik (PRI) | 2 | 30; Attendance (30 h) Preparation of presentation (60 h) Master thesis (450 h) | PRI: Master Thesis |
| Module examinations | | Master thesis (75%) and presentation (25% of final mark) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module QM: Econometric Methods Responsible: Hautsch | Study Points: 9 | | |
|--|--|---|--|
| Goals: To gain a deep understanding of advanced econometric methods <u>The lecture</u> aims at providing students with methods to perform own econometric analysis. Topics like the generalized linear regression model, dummy variables, the consideration of stochastic regressors, nonlinear regression models, SUR models and the specification and estimation (2SLS, 3SLS) of simultaneous equation models are covered. Furthermore, asymptotic and test theory is treated. In <u>the tutorials</u> theoretical exercise questions and empirical applications of the advanced methods will be discussed. | | | |
| Prerequisites to participate in the module: Module „Introduction to Econometrics“ (or equivalent) | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 6; Visiting the lecture (60 h), Preparation for courses (60 h), Exam preparations (60 h) | Generalized linear model, stochastic regressors, nonlinear regression models, Specification, and simultaneous equation models |
| Tutorials | 2 | 3; Attendance of sessions (30 h), Preparation for and review of tutorial sessions (60 h) | Theoretical exercise questions, empirical examples. |
| Module examinations | Written exam (180 minutes) | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <input type="checkbox"/> Spring Semester | | |

| Mandatory Elective Module QM: Time Series Analysis Responsible: Hautsch | | | Study Points: 6-9 | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---|---------------|--|---|--------|---------------|---------------|--------|---------|---|--|---|----------|---|---|---|-----------------------|---|---|----------------------------------|---------------------|--|--|--|------------------------|--|---|--|--------------------------|--|--|--|
| Goals: To gain an understanding of econometric time-series methodology The lecture gives an introduction to time series analysis. The focus is on univariate modelling tools. We cover different types of stochastic processes like ARIMA and GARCH models, deal with the unit-root methodology and forecasting procedures. Multivariate extensions are demonstrated, with emphasis on vector autoregressive (VAR) processes and its application in causality and impulse response analyses. Non-stationary systems with integrated and co-integrated variables will also be treated. In the tutorials the time series methods are applied to empirical data. We will intensively make use of econometric software packages. Seminar Economic Risk: Presentation of research results in the field of Quantitative Finance | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Prerequisites to participate in the module: Module „Introduction to Econometrics“ (or equivalent) | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| Mandatory Elective Module QM: Selected Topics in Econometrics Responsible: Hautsch | Study Points: 6 | | |
|---|------------------------|--|---|
| Goals: To understand and to learn how to apply advanced methods in certain special fields of econometrics. The lecture(s) and/or seminar deal with specific topics in Econometrics. Topics may cover nonlinear and nonparametric time series analysis, econometric forecasting, resampling methods or Bayesian econometrics. The students will learn, for example also in tutorials, how to apply the advanced methods to empirical data. To this end we will rely on the use of econometric software. To complete the module students may choose courses of 6 SP. | | | |
| Prerequisites to participate in the module: Module „Econometric Methods“ | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar/ Lecture/ Tutorial | 4 | 6; Attendance (60 h) Preparation for courses (60 h) Exam preparation (60 h) | Presentation of advanced methods in special fields of econometrics; Use of econometric software and application of econometric methods |
| Module examinations | | Seminar: Seminar paper and/or oral presentation Lecture: Written exam (90 min if 4 periods/week or 60 min if 2 periods/week) or oral exam | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester or <input checked="" type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester <input checked="" type="checkbox"/> Spring Semester | |

| Mandatory Elective Module QM: Econometric Projects Responsible: Hautsch | Study Points: 6 | | |
|--|------------------------|---|--------------------------------|
| Goals: | | | |
| <p>To learn how to apply econometric methods for empirical analysis. During the seminar the students will conduct an own empirical study. The students learn how to apply different econometric methods to real data. This includes empirical data-handling and the ability to translate an economic model framework into an econometric model that can be estimated. Furthermore, the students learn how to present their study in written and oral form.</p> | | | |
| Prerequisites to participate in the module: Module "Econometric Methods" and one other complementary or compulsory course in econometrics | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Seminar | 2 | 6; Attendance (30 h) Seminar paper (90 h) Presentation (45 h) Assignments (15 h) | Conduct own empirical analysis |
| Module examinations | | Seminar paper and oral presentation | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module QM: Analysis of Panel Data Responsible: Hautsch | | | Study Points: 6 |
|--|------------------|---|--|
| Goals: The course aims at providing the basic concepts and methods for analyzing panel data. The lecture introduces different error component regression models with fixed and random effects. It covers tests of hypotheses with panel data as well as techniques for serial correlation, heteroscedasticity, simultaneous equations, dynamic models and models for qualitative dependent variables. In the tutorials the methods are revisited and applied to empirical data. | | | |
| Prerequisites to participate in the module: Module „Econometric Methods“ | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 3 | 4,5; Attendance (45 h) Preparation (45 h) Exam preparation (45 h) | Basic concepts, error component regression models with fixed and random effects, tests of hypotheses with panel data, serial correlation and heteroscedasticity, simultaneous equations, dynamic models, models for qualitative dependent variables. |
| Tutorial | 1 | 1,5; Attendance (15 h) Preparation (15 h) Exam preparation (15 h) | Theoretical exercise questions, application of methods to empirical data. |
| Module examinations | | Written exam (90 min) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input type="checkbox"/> Fall Semester | <input checked="" type="checkbox"/> Spring Semester |

| Mandatory Elective Module QM: Multiple Time Series Analysis Responsible: Hautsch | Study Points: 6 | | |
|--|------------------------|--|---|
| Goals: To gain a deep understanding of advanced multiple time series methods and their applications. The lecture gives an introduction to multiple time series techniques and will cover vector autoregressive (VAR) processes, VAR estimation, VAR order selection and model checking. Non-stationary systems with integrated and co-integrated variables will also be treated. The use of VAR models in forecasting, causality and impulse response analysis will be explained and illustrated using empirical examples. | | | |
| Prerequisites to participate in the module: Module „Econometric Methods“ | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 4 | 6; Attendance (60 h) Preparation (30 h) Exam preparation (45 h) Assignments (45 h) | Vector autoregressive (VAR) processes, co integrated VAR models, forecasting, causality and impulse-response analysis |
| Module examinations | | Written exam (90 min) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring Semester Semester <u>or</u> | |

| Mandatory Elective Module QM: Microeometrics Responsible: Hautsch | | | Study Points: 6 |
|---|------------------|---|--|
| Goals: To gain a deep understanding of models and methods for qualitative and limited dependent variables and their applications. The lecture gives an introduction to models for qualitative and limited dependent variables and will cover logit and probit models for binary dependent variables, multinomial logit and probit models for unordered and ordered categories. In addition, models for censored and truncated data and models with sample selection problems as well as models for duration and count data will be discussed. The use of these models will be explained and illustrated using empirical examples. | | | |
| Prerequisites to participate in the module:: Module „Introduction to Econometrics“ (or equivalent) | | | |
| | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture | 3 | 4,5; Attendance (45 h) Preparation (45 h) Exam preparation (45 h) | Models for limited dependent variables including logit and probit models, models for censored and truncated data, sample selection problems and models for duration and count data |
| Tutorial | 1 | 1,5; Attendance (15 h) Preparation (30 h) | Solving problems and computer tutorials |
| Module examinations | | Written exam (90 min) | |
| Duration of the module | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | |
| Module can be started in | | <input checked="" type="checkbox"/> Fall Semester or | <input checked="" type="checkbox"/> Spring Semester |

| Mandatory Elective Module QM: Financial Econometrics Responsible: Hautsch | | | Study Points: 6-9 | | | | | | | | | | | | | | | | | | | | | | | | |
|---|------------------|--|--|--------|------------------|---------------|--------|---------|---|--|--|---|---|---|---|---------------------|--|--|--|------------------------|--|---|--|--------------------------|--|---|--|
| Goals: To gain an understanding of econometrics methods for the analysis of financial market data The lecture deals with the statistical properties of financial market data and econometric methods that can be used to analyze these data. We will study procedures to test for the efficient market hypothesis and become familiar with methods to model the mean and the volatility of financial data series. Besides the application of nonparametric and classical test procedures, the focus will be on time series methods and models. In particular, ARMA and GARCH models will be covered. Empirical illustrations and exercises are incorporated into the lecture. Seminar Economic Risk: Presentation of research results in the field of Quantitative Finance | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Prerequisites to participate in the module: Module „Econometric Methods“ | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| Mandatory Elective Module QM: Advanced Econometrics Responsible: Hautsch | Study Points: 6 | | |
|---|------------------------|--|---|
| Goals: | | | |
| <p>This course deals with advanced estimation techniques in modern econometrics. Main topics include generalized methods of moments (GMM) estimation for single-equation models and multiple-equation models, information theoretic approaches, pseudo-maximum likelihood methods as well as empirical likelihood techniques. Furthermore, an introduction to Bayesian econometric methods will be given. Here the focus is on fundamental principles of Bayesian inference, Markov chain Monte-Carlo (MCMC) methods as well as different applications of Bayesian inference. Finally, non- and semiparametric methods in econometrics are covered. We will study basic Kernel density estimation, nonparametric regression techniques and estimation of partially linear and additive models. A deep knowledge of the techniques conveyed in this course is extremely useful since they are applied in various areas in modern econometrics, including time series econometrics, micro econometrics, panel econometrics as well as financial econometrics.</p> | | | |

Competency Targets of the Elective Modules in the Master's Programm Business Information Technology

- Students acquire supplementary and additional basic information and special knowledge from related academic disciplines, which can be used within the field of economics (contextual knowledge).
- Students develop a good command of interdisciplinary problem-solving methods. They will be taught and trained (on the basis of well-chosen examples) to develop research questions and to work independently at the intersection between computer science and economics.
- Students learn to develop and use internal and external resources.
- Students will be able to expand and to deepen their individual profiles.
- Students learn to be flexible, to be able to respond to quick or sudden changes and differing and varied situations, and indeed, to help shape such developments
- Students learn to perceive their own expectations, values and norms as well as the expectations, values and norms of others, to differentiate among them, and to treat others with respect and tolerance. They will be able to reflect on their own experiences and to create a link between such experiences and their current work as well as to question their own actions.
- Students learn strategies to manage their time, to acquire knowledge, to reach decisions, to find solutions to problems and to manage projects.
- Students are able to work in teams and to contribute independently and competently to solving problems.

Kompetenzziele des Wahlbereiches im Masterstudiengang Wirtschaftsinformatik

- Die Studierenden erwerben ergänzendes und weiterführendes Grundwissen und Spezialwissen aus verwandten Wissenschaftsdisziplinen, das in Beziehung zum Fachgebiet gesetzt werden kann („Kontextwissen“).
- Die Studierenden lernen, weitere fächerübergreifende Problem-lösungsmethoden zu beherrschen. An den Schnittpunkten zwischen Informatik und Wirtschaftswissenschaften werden anhand ausgewählter interdisziplinärer Schwerpunkte die Entwicklung von Fragestellungen und selbständiges wissenschaftliches Arbeiten verstärkt vermittelt und trainiert.
- Die Studierenden sind der Lage, interne und externe Ressourcen zu erschließen.
- Die Studierenden sind in der Lage, erworbene individuelle Profile zu erweitern und zu vertiefen.
- Die Studierenden sind so flexibel, sich auf schnelle oder plötzliche Veränderungen und unterschiedliche Situationen einstellen zu können und somit in der Lage, diese aktiv mitzugestalten.
- Die Studierenden lernen, eigene und fremde Erwartungen, Normen und Werte wahrzunehmen, zu differenzieren und damit umzugehen (Toleranz). Sie können die eigenen Lebenserfahrungen reflektieren und Verbindungen zur aktuellen Arbeit herstellen sowie das eigene Handeln hinterfragen.
- Die Studierenden verfügen über effiziente Arbeitstechniken wie Zeitmanagement, Wissenserwerb, Entscheidungsfindung, Problemlösungs-techniken und Projektmanagement.
- Die Studierenden besitzen die Fähigkeit, in einem Team zu arbeiten und einen eigenständigen und kompetenten Beitrag zur Projektlösung zu leisten.

| Elective Module: Variable Module for completing courses inside the economic department | Study Points: 3-11 | | |
|---|--|---|--|
| Responsible: Examinations Commission | | | |
| Goals: | | | |
| Acquisition of knowledge in the fields of business administration and/or economics and/or quantitative methods. | | | |
| Students may fill the difference between the points acquired in the mandatory, mandatory elective and elective modules and the total amount of 120 SP with this module. The maximum admissible amount is 12 SP. | | | |
| The approvable courses for this module are courses within the Economics Department which are not part of a mandatory module and are rewarded with less than 6 SP. | | | |
| Prerequisites to participate in the module: none | | | |
| Course | Periods/ Week | SP; work load | Topics |
| Lecture or Tutorial or Seminar | 2-8 | 1 Period/Week generally relates to 1,5 SP or 1,5 ECTS. The work load is partitioned, 1 SP matches 30h. | Various (Courses at large, from other courses of studies as well) |
| Module examinations | Written exam, seminar paper and presentation, oral exam The required examinations will be announced at the beginning of the semester. | | |
| Duration of the module | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semesters | | |
| Module can be started in | <input checked="" type="checkbox"/> Fall Semester <u>or</u> <input checked="" type="checkbox"/> Spring Semester | | |

| | | | |
|---|----------------------------|--|---|
| Wahlmodul: Variables Modul zur Ergänzung des Wahlbereiches Verantwortlich: Prüfungsausschuss der Wirtschaftswissenschaftlichen Fakultät | Studienpunkte: 3-11 | | |
| Goals: Erwerb von Kenntnissen in Betriebs- und/oder Volkswirtschaftslehre und/oder in quantitativen Methoden. Durch dieses Modul können Studienpunkte im Umfang der Differenz der in Pflicht-, Wahlpflicht-, bzw. Wahlmodulen erworbenen Studienpunkte zu dem Gesamtumfang von 120 Studienpunkten erworben werden. In diesem Modul sind maximal 12 SP zulässig. In diesem Modul sind ausschließlich Lehrveranstaltungen der Wirtschaftswissenschaftlichen Fakultät enthalten, für die weniger als 6 SP vergeben werden und die nicht Bestandteil eines Pflichtmoduls sind. | | | |
| Voraussetzungen für die Teilnahme am Modul: keine | | | |
| | | | |
| Lehr- und Lernformen | Präsenz-SWS | Anzahl der SP/Arbeitsleistungen | Lernziele, Themen, Inhalte |
| Vorlesung oder Übung oder Seminar | 2-8 | 1 SWS entspricht in der Regel 1,5 SP sowie 1,5 ECTS. Die Arbeitsleistung ist differenziert und wird mit 30 h je SP angesetzt. | Differenziert (Lehrveranstaltungen, auch fachfremder Studiengänge) |
| Modulprüfungen | | Klausur, Seminararbeit und Präsentation, mündliche Prüfung Die relevanten Prüfungsleistungen werden spätestens zu Semesterbeginn bekannt gegeben. | |
| Dauer des Moduls | | <input checked="" type="checkbox"/> 1 Semester <input type="checkbox"/> 2 Semester | |
| Beginn des Moduls | | <input checked="" type="checkbox"/> WS <u>und/oder</u> <input type="checkbox"/> SS | |

| | |
|---|--|
| <p>Elective Module for courses outside of the economic department which students may select on their own initiative</p> <p>Responsible: Examinations Commission</p> | Study Points: 3 - 11 |
| <p>Goals:</p> <p>According to § 6 Abs. 5 of the study regulations students may take courses, up to a total of 11 SP, outside of the Economic Department. The goal of this is to enable students to acquire further qualifications which are either subject-specific, or are foreign to the field of economics, or are interdisciplinary, so that they may further their professional orientation.</p> | |
| <p>The prerequisites for attendance and participation are to be found in the regulations of the respective departments</p> | |
| <p>When considering the examinations, tests and study points, the examinations commission for the Master Program in Business Information Technology will decide on the basis of the following criteria:</p> <ol style="list-style-type: none"> 1. Only examinations, tests and study points can be taken into consideration which were acquired in the course of academic studies. Both completed modules or individual courses from modules may be taken, in as much as the regulations of the respective course of studies allow this. In particular, academic achievements, examinations and study points for language courses, sports courses and courses taken at the Career Centre, as well as study points for courses which were not acquired within a degree programme cannot be taken into account. 2. Only those study points from courses which were successfully completed with coursework or an examination can be taken into consideration. Those courses for which the student received study points only on the basis of attendance cannot be taken into consideration. 3. Only examinations, tests and study points, can be taken into consideration, which are documented by a Transcript of Records or by a certificate of achievement. The certificate verifying this must contain the following information: <ul style="list-style-type: none"> • Title and form of the course or courses • Level of these courses (Master, diploma - main studies, Ph.D. program) • Form of the coursework done in the course and/or of the examinations • Grade • SP or ECTS-points (if in the regulations or stipulations of the respective course of studies nothing is said regarding SP or ECTS-points, then alternately proof of the semester week hours will suffice). 4. Those study points which were acquired in one and the same course, cannot be divided among different modules. 5. Examinations, tests and study points which were acquired outside of the Humboldt University, will be accredited according to the stipulations of the ASSP. In addition, numbers 1 – 4 (see above) still apply. Those examinations, tests and study points which were acquired in courses, the basic and essential content of which were already successfully completed in courses taken at the Economics Department cannot be taken into consideration. | |
| <p>Module Examinations</p> | <p>The examination regulations of the other departments apply in regard to the examinations.</p> |

| | |
|---|---|
| Außerhalb der Wirtschaftswissenschaftlichen Fakultät frei wählbare Lehrveranstaltungen | Studienpunkte: 3 - 11 |
| Lern- und Qualifikationsziele: | |
| <p>Gemäß § 6 Abs. 5 Studienordnung können im Umfang bis zu 11 SP auch außerhalb der Wirtschaftswissenschaftlichen Fakultät Lehrveranstaltungen frei gewählt werden. Ziel ist es, fachspezifische, fachfremde oder fächerübergreifende Qualifikationen im Hinblick auf die weitere berufliche Orientierung zu erwerben.</p> | |
| Voraussetzungen für die Teilnahme: gemäß Bestimmungen der jeweiligen Fächer | |
| <p>Über die Berücksichtigung der Studienleistungen, Prüfungen und SP entscheidet der Prüfungsausschuss Wirtschaftsinformatik nach folgenden Maßgaben:</p> <ol style="list-style-type: none"> 1. Berücksichtigt werden Studienleistungen, Prüfungen und SP, die in Studiengängen erworben wurden. Es können ganze Module oder einzelne Lehrveranstaltungen aus Modulen belegt werden, sofern die Bestimmungen des jeweiligen Studienganges dies zulassen. Nicht berücksichtigungsfähig sind insbesondere Studienleistungen, Prüfungen und SP aus Sprachkursen, Sportkursen und Kursen des Career Centers sowie aus Kursen, die nicht in Studiengängen erworben wurden. 2. Berücksichtigt werden nur SP aus Lehrveranstaltungen, die mit einer Arbeitsleistung oder Prüfung abgeschlossen wurden. Nicht berücksichtigt werden SP, die ausschließlich für die Anwesenheit in Lehrveranstaltungen erworben wurden. 3. Berücksichtigt werden nur Studienleistungen, Prüfungen und SP, die in einem Transcript of Records bzw. Leistungsnachweis dokumentiert wurden. Der Nachweis muss folgende Angaben enthalten: <ul style="list-style-type: none"> • Titel und Art der Lehrveranstaltung(en) • Studienniveau (Master, Diplom Hauptstudium, Doktorandenprogramme) • Form der Arbeits- und/oder Prüfungsleistung(en) • Note • SP bzw. ECTS-Punkte (falls in den Bestimmungen des jeweiligen Studienganges keine SP oder ECTS-Punkte ausgewiesen sind, alternativ Nachweis der Semesterwochenstunden). 4. Bei der Berücksichtigung sind SP, die in ein und derselben Lehrveranstaltung erworben wurden, nicht auf mehrere Module aufteilbar. 5. Studienleistungen, Prüfungen und SP, die außerhalb der Humboldt-Universität zu Berlin erworben wurden, werden nach Maßgabe der ASSP anerkannt. Ergänzend gelten die Ziffern 1 bis 4. Nicht berücksichtigt werden Studienleistungen, Prüfungsleistungen und SP aus Lehrveranstaltungen, deren Inhalte im Wesentlichen bereits erfolgreich an der Wirtschaftswissenschaftlichen Fakultät absolviert wurden. | |
| Modulprüfungen | Für die Prüfungen gelten die Prüfungsbestimmungen der anderen Fächer. |
