Professor Dr. Christian D. Schade

Registration
Seminar on Entrepreneurship and Innovation Theory
Summer Term 2022
(Registration Deadline: 31.03.2022)

Title: "Neuroscience, mindfulness and economic decision-making"

Abstract: Neuroscientific applications in economics have become widespread. Also, mindfulness has recently become an important buzz word in management and entrepreneurship. This seminar explores both neuroscientific methods and applications in economics as well as the basics of mindfulness in philosophy and Buddhism as well as its current applications. At the core of the seminar is a discussion of the intersect between the concepts of neuroscience and mindfulness.

We expect our seminar participants to be interested in interdisciplinary research and to be willing to spend time with interesting, albeit challenging concepts they might not have been in touch with during their previous studies. An interest in empirical methodologies from different disciplines (i.e., fMRI, EEG, economic experimentation, mindfulness studies etc.) might be helpful.

Herewith, I register for the Seminar on Entrepreneurship and Innovation Theory in the Summer Term 2022.

Topics will be allocated to the participants on **April 25, 2022** (4 pm to 6 pm; Spandauer Straße 1 Room 21 b). In case I cannot attend this meeting, I will contact Maria Karsten (maria.karsten@hu-berlin.de) and will be allocated one of the remaining topics. I accept this topic with my signature on this registration form (may be emailed).

Deregistration is possible in written form until **May 9th, 2022 at the latest**. Any withdrawals after this date cannot be accepted. A failure to submit the paper and non-attendance of the seminar will result in failing this course. Costs for accommodation and travel have to be covered, in any case.

I agree to receiving information via email and to the recording of my personal data for the purpose of the seminar organization.
